Passion, Excellence, Innovation

Three driving concepts that have accompanied us every single day throughout our journey. Three pillars upon which we have created and shaped our reputation, and through them we have been able to deliver unique products and services.

Passion is where it all began: our founder and Managing Director, Luca Scribani Rossi, won an Olympic Bronze Medal at Los Angeles '84 in Olympic Skeet, after a successful career in the discipline. Since the foundation of Beretta Australia in 2000, Luca has brought his wealth of experience from the World of High Performance Sport to that of business, maintaining the same commitment, attention to detail and attitude to success that made him a champion on the shooting range.

The same passion is now shared by thirteen full time employees and five 'on the road' representatives. In only eight years, we have rapidly risen to being one of the major players in the Australian market. Not only do we distribute and wholesale to Australia and New Zealand (through the subsidiary Beretta New Zealand), but also to China (including Taiwan and Hong Kong), South Korea, Philippines, India, Singapore, Malaysia, Indonesia, Pakistan, Sri Lanka, Bangladesh and New Caledonia. We therefore trade our products in a 2.5 billion strong market.

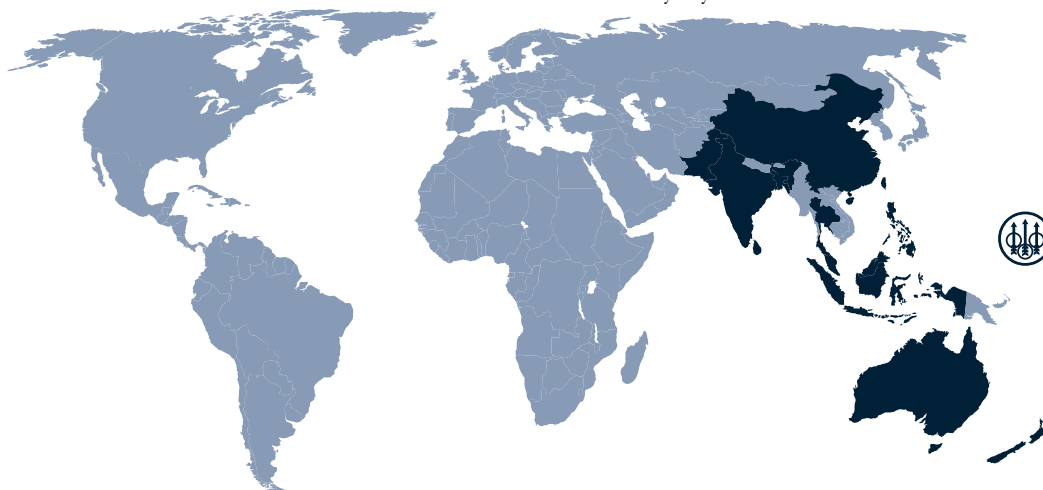

Excellence is our credo, perfection is our trademark, because your satisfaction is our ultimate goal. Constant reliability and utmost quality are what we deliver, because our products are what we believe in most. That is undoubtedly why the best Australian shooters have chosen Beretta Australia. One of the best shooters in Australian history, Russell Mark (Gold and Silver Olympic Medallist and five-time Olympian), is our Ambassador. Together with Russell, Adam Vella, Bronze Olympic Medal at Athens 2004, Lauryn Mark, double Gold Commonwealth Games Medallist

and John Younger, multi National Sporting Champion, are our representative athletes. Our mission is to provide them with the best possible support to achieve their goals. The same unfailing support we offer them, we are proud to offer to you, because we think everyone deserves their chance at becoming an Olympic Champion.

Innovation is what makes us exceptional. We are the distributor for the finest brands in the firearms, optics, ammunition, clothing and accessories industries, and our range grows every year with the latest technologies from all over the World. Yet technological innovation is not enough for Beretta Australia, innovation in customer service is what we value above all. We are well aware of the diverse needs of all our customers, and we strive to provide every possible product for all your potential requirements. As an example of how important personalisation is for us, we offer complimentary gun fitting for every Beretta and Franchi shotgun purchased.

When it comes to our sport, we spare no effort. We consider the strengthening of the shooting culture in Australia a priority and we know that through our activities we can teach the responsible use of firearms. A landmark day in the history of clay target shooting in Australia took place in October 2007. Beretta Girl Action attracted an astonishing number of girls and women who had never tried the sport before. That day helped to change many misconceptions and assumptions about firearms, their use and forever dismissed the myth that clay target shooting is strictly a male dominated sport. Beretta Girl Action was repeated in October 2008, with 420 girls attending and over 1000 general public, while Beretta Open Days have been run with overwhelming success in the last three years.

Passion, Excellence, Innovation. That is what you will find in each page of this catalogue and in each one of our products because that is what our company is built on, and that is what we strive for every day.

 **BERETTA**
AUSTRALIA

FIELD

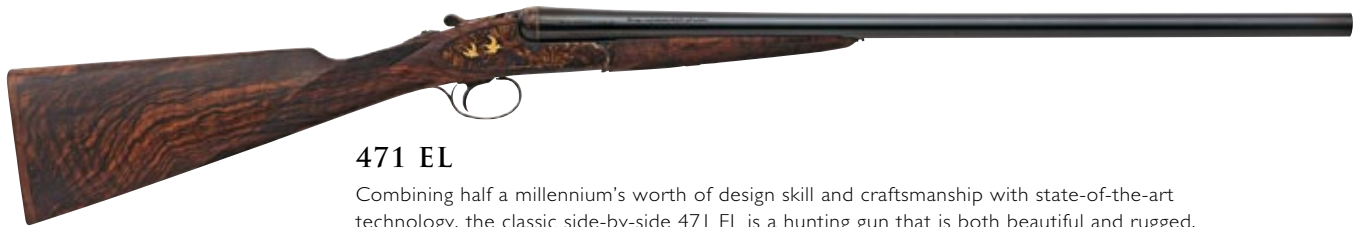

At the core of Beretta is a passion. An understanding of the wild places. The cold fields of winter. The high grass and the low marsh. Rain and sun. Man and dog. It's understanding that is pure and real. It lives in the deepest reaches of the hunter's heart. The innermost corners of the shooter's soul.

And it's everywhere. A field in Tuscany. A lake in Victoria. The flash of a tail. The thunder of wings. And then there is stirring. The relentless search for balance.

Between what has gone before and what is yet to be. Between then and now and tomorrow. This is the passion that drives Beretta. It's in our genes. And so too is it in our hearts. It's why Beretta exists. And it's why it has endured for nearly 500 years. Because one purpose. One passion.

FIELD SIDE BY SIDE

471 EL

Combining half a millennium's worth of design skill and craftsmanship with state-of-the-art technology, the classic side-by-side 471 EL is a hunting gun that is both beautiful and rugged. Its lines and finishes recall the best of a bygone era. The classic English-style buttstock and splinter fore-end are made of oil-finished select walnut. Case-hardened sideplates with Beretta's unique colouring process are decorated with eye-catching gold-filled game bird scenes.

471 SILVER HAWK

Extensive scroll and floral engraving and a gold-filled hawk's head on the top lever make the 471 Silver Hawk a prestige item you'll be proud to carry in any company. Just like the 471 EL, this side-by-side's receiver is made of a steel alloy and it's rich in nickel, chromium and molybdenum for durability and beauty. Both shotguns feature barrels joined to the monoblock by a laser system that creates the strong, secure Beretta barrel assembly.

The 12-gauge Optimachoke® tubes feature longer tapered construction, assuring greater pellet concentration and better distribution of shot.

The sideplates of the 471 EL are attached without visible screws, for a classic understated look.

FIELD OVER & UNDER

SV10 PERENNIA

SV 10 PERENNIA III **NEW**

In a traditional firearm, like the over-and-under, the task of the designer is even more difficult. The design is constrained by the dimensions, the function of the parts, by the weight and balance of the components, by the ergonomics of the shapes, by tradition.

The **NEW** Beretta SV10 Perennia over-and-under is the best example of how all of these characteristics may be blended together in the correct proportions in order to reach a single goal, a grand result of elegance, modernism, efficiency and style.

OPTIMA BORE
HP

686 SILVER PIGEON S

With the same level of mechanical refinement as Beretta's higher end over and unders, this entry-level shotgun offers an economical way to enjoy both the aesthetics and quality of a prestigious Silver Pigeon. The extensive floral and scroll engravings are executed on a satin nickel-alloy finished receiver that is exceptionally resistant to wear and corrosion. And the dual-cone locking mechanism stands up to years of constant shooting.

686 WHITE ONYX

At some point in every sportsman's hunting life - whether as a novice or a seasoned shooter in need of an additional gauge - a no-nonsense, versatile tool is called for. The 686 White Onyx, with its streamlined stock design for fast target acquisition, top mounted bolt-lug design for secure barrel lockup, and easy maintenance, fits the bill. The satin nickel frame is accented with Beretta's Dura-Jewel finish for a classic look.

FIELD OVER & UNDER

687 SILVER PIGEON III

There's no need to sacrifice style for function with this attractively priced member of the Silver Pigeon family. The distinctive 687 Silver Pigeon III has all the features of the S and II, but with more extensive engraving, including game scenes, on the frame. Available in a trim and racy 28 gauge made on its own properly scaled frame, this finely crafted shotgun with natural pointability is up to any hunting challenge.

687 SILVER PIGEON IV

Beretta shotguns are carried with pride on every continent. The 687 Silver Pigeon IV is expressly styled to satisfy those who desire a classic blued finish. In contrast to most Beretta over and unders, it has a rich, classic black frame, accented by "gold" inlays that reflect the typical quarry for each gauge. It's a striking gun that stands out—even among other Berettas.

687 SILVER PIGEON V

The pinnacle of the Silver Pigeon line, this prestigious over and under is stocked in richly figured, oil finished walnut and detailed with gold game bird inlays and a Beretta gold medallion underneath. The receiver is treated with Beretta's proprietary process that imparts a classic colour-case finish that ensures metallurgical integrity and a distortion-free part. A joy to own and shoot, thanks to Beretta's superior mechanical refinement and innovative technology, the Silver Pigeon V will last for generations.

FIELD OVER & UNDER

687 DIAMOND PIGEON EELL

In Italian, EL stands for extra lusso (extra luxury). The EELL designation takes that quality to an even higher level. This is an over and under with the feel and allure of a classic game gun for the discriminating sportsman who appreciates all the finer points of a well-made shotgun. The patented locking system creates a particularly slim receiver, making it one of the most elegant, finely balanced and responsive shotguns in the world. The extensive hand-chased engraving, floral or game scenes, combined with the highly figured oil-finished walnut, makes a classic statement of your good taste. The 687 Diamond Pigeon EELL is also available in 20/28 gauge Combo set.

687 EL GOLD PIGEON II

Striking figured walnut and distinctive engraving make the 687 EL Gold Pigeon II a luxurious hunting arm that will satisfy your need for a personalised field shotgun. The exceptionally strong, reliable, low-profile receiver is enhanced with deep relief engravings. The stocks and fore-ends are cut from superior quality walnut and built to withstand a lifetime of use and to guarantee a perfect balance and quick target acquisition. This is a gun that will be the companion of a lifetime.

ULTRALIGHT DELUXE

When game trails are long and terrain is rugged, every ounce comes to tell as the hours pass. The Ultralight is a 12 gauge that carries like a small bore. The key to the Ultralight's feathery feel is a light but strong aluminium frame, reinforced at the breech face and shoulders with hard, durable titanium. In this Deluxe version, Beretta has added highly figured oil-finished walnut stock and full floral engraving with gold-filled game birds.

"Being a shooter most of my life, I have had the opportunity to shoot a variety of shotguns on the market. Since choosing to shoot a Beretta in 1999, my scores instantly increased helping me to achieve my sporting ambitions. The Beretta DT-10 I currently shoot fits like a glove, leaving me never in doubt that the gun will assist me in hitting more targets. Beretta Australia has great firearms and the best all around service."

Lauryn Mark

Dual Commonwealth Games Gold Medallist and Olympian

COMPETITION

The scorecard, the moist palms, and the line up of like-minded competitors might indicate otherwise. But as the clays fly across your line of vision, you stand alone, competing against no one but yourself. Every inch of your being is focused, balanced, alert, working in unison. There's no denying you are here to win, to stand proudly on the podium. But more than anything else you are here to perform unfalteringly. To prove you've shot your very best.

To compete successfully, any shooter requires dependable performance. Not just from himself, but from his shotgun and the specialised apparel and accessories that work together to give him a competitive advantage.

Designed for maximum performance in any event, Beretta's competition guns are the epitome of the craft, a testament to optimum control, reliability and balance. Now that you hold a Beretta Competition shotgun, the Olympic Podium is not that far away.

BERETTA IN COMPETITION

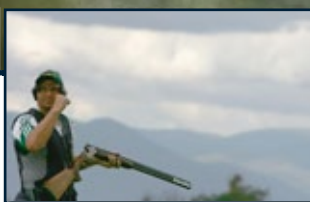

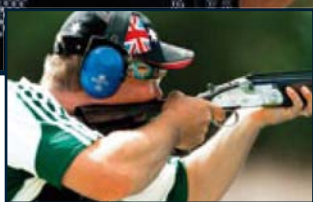

A prestigious list of some of the most respected and talented names in the sport of competitive shooting who embody the winning spirit of Beretta. From the Olympics to regional shoot-offs, a Beretta is usually in the hands of the champion. Beretta's gallery of champions from around the world are a testament to their skill, determination and performance under pressure. Like Beretta's competition guns, they represent the epitome of their craft.

"I've been shooting the Beretta DT 10 for more than 8 years now and that partnership has seen many victories in National and World events. The reliability and performance that comes with shooting the DT 10 gave me the piece of mind with my equipment choice which left breaking the target the only thing I had to worry about."

Adam Vella

Bronze Olympic Medallist

The first Olympic Gold Medal in Beretta's history was won in Melbourne 1956 in Olympic Trap.

COMPETITION 682 GOLD E

DOUBLE TRAP

X TRAP

The Evolution of a Winner

Numerous design refinements and the recent modern restyling, render the victorious Beretta 682 Gold E more captivating and its performance even more competitive. Together with the exclusive dual colour finish and modern ellipsis graphic motif with the Beretta "gold" logo, the contrast between the glossy and matte parts ensures an extraordinary beauty to the receiver. Beretta's electroless nickel finish provides added protection against the elements.

Optima-Bore® – Optimachoke®

Some models of the 682 Gold E feature the new Optima-Bore® barrel profile that reduces felt recoil and improves shot distribution. The new long and thin Optimachoke® tubes, also available in the extended version, ensure consistent shot distribution year after year. Top and side ribs are ventilated to dissipate heat as well as improve pointability and target acquisition. They differ from model to model. Barrels are chrome lined internally and have a deep blued finish.

Adjustable Stock with Memory System

Stocks are matched to each individual shooting discipline. Wood density is selected for strength, and wood grain is carefully laid out to avoid weak areas. The exclusive, newly designed checkering on the grip and fore-end guarantees a firm hold even in the most adverse weather conditions. Some versions of the 682 Gold E feature, as standard or on request, a totally adjustable stock equipped with the Memory System. The adjusting device is made from carbon reinforced technopolymer guaranteeing robustness and durability.

Adjustable stock with memory system. The adjusting device is made of carbon reinforced technopolymer guaranteeing robustness and durability.

SPORTING

The single trigger is adjustable for length of pull.

Special Beretta nickel based treatment.

Details that make a difference.

Triggers on all 682 E's are adjustable for length of pull, fit to three positions to better fit the gun to the shooter's hand and shooting style. Two trigger shoes are supplied: one with a canted surface for right-or left-handed shooters and one with a wide, symmetrical face. Trigger pull is precise and lock times assured through the use of powerful coil springs and sturdy alloy firing pins. Exceptional durability is ensured by self-adjusting, dual conical locking lugs, replaceable hinge pins and barrel shoulders, hard chrome-lined barrels and chambers, and obviously thanks to the quality of raw materials, the precision of machining and the perfection of heat and surface treatment. A newly designed ABS hard case, featuring the exclusive double handle, is included.

COMPETITION DT 10 TRIDENT

TRAP/DOUBLE TRAP

Features, dimensions, weight, balance, point of impact...everything in Beretta's competition over- and unders, the DT10 Trident, has been professionally refined to meet and surpass the technical requirements of serious competition. You'll never have to worry about a broken spring or clogged mechanism thanks to the DT10's quick-detach, removable trigger group. Specific features are the international style select walnut stock, the competition beavertail fore-end, the special top rib with white or red front sight.

X TRAP

A shotgun that's at home at any level of competition. From competitions at your home club to the Olympics, the DT10 X Trap is Beretta's top-of-the-line competition shotgun. Comes standard with Optima-Bore® barrels with Optimachoke® tubes. The Montecarlo adjustable stock features the patented Memory System. Wide beavertail fore-end, tapered progressive top rib, white front sight with mead bead are standard.

SPORTING

For sporting clays, the DT10 Sporting is the shotgun of choice. Like all Beretta DT10s, it features an ergonomic top lever and a detachable trigger assembly that can be removed from the receiver without tools for cleaning or maintenance. This masterpiece also offers a modified cross-bolt locking system with superior strength and Optima-Bore® barrels with Optimachoke® tubes. The single trigger is selective, the stock boasts a rounded rubber recoil pad, the fore-end is Schnabel.

SKEET

For skeet devotees, there's no finer choice than the DT10 Trident Skeet, no matter what level of competitive shooting you participate in. The skeet version with adjustable stock allows you to regulate your personal sight picture. Beretta's patented "Memory System" lets you remove and replace the comb without losing your individual settings. The Optima-Bore® barrel system with Optimachoke® tubes improves shot pattern distribution and velocity, felt recoil reduction.

"Throughout my entire International Shooting career, I have only used one brand of shotgun. Beretta. In my opinion there is no other option. No other gun manufacturer can offer the reliability, service, style and performance that Beretta can. It's simple. If you want to go for Gold, go for Beretta."

Russell Mark

World and Olympic Champion

Named by the ISSF as 'Best in History in Olympic Double Trap'

THE 1526 COLLECTION

Even the most simple Beretta firearms show an exhaustive attention to detail. Imagine, then, the results when Beretta gives master gunsmiths, engravers and barrel makers total freedom in the processes of personalising Beretta's THE 1526 COLLECTION long guns.

These are engineering masterpieces, created by master craftsmen following a flawless manufacturing tradition of almost five centuries.

Premium guns define Beretta. It's the representation of living at its very best. It's passion, in its purest essence. You won't find any finer example of Beretta's heritage of unflagging dedication to extraordinary performance and outstanding quality than these Premium Guns, which are enveloped in the Italian sense of craftsmanship and style unrivalled worldwide.

THE 1526 COLLECTION GIUBILEO SERIES

GIUBILEO

The splendid Giubileo over-and-under, made in 12, 20, 28 and .410-gauge models, is distinguished by rich, baroque spiral and floral engravings on the receiver and sideplates, and by its exquisitely proportioned construction. There are no screws on the plates, allowing the master engravers to express their artistry in full, while the internal surfaces and mechanisms are impeccably polished. The elongated trigger guard, the safety and top lever are also completely engraved. The stock and fore-end, made from the highest quality walnut, are finely checkered.

GIUBILEO II

Almost five centuries of tradition have produced the elegant lines, rich engravings, innovative technology and superior durability of the side-by-side Giubileo II, masterfully crafted in 12 and 20 gauge. The receiver features side panels that cleverly hide hinges and hinge pins that are applied without screws. The top mouldings of the receiver, coined in relief, make this wonderful side-by-side even more slender and elegant. The extended trigger guard, wisely encased within the grip, and the oriented screws immediately show Beretta's care and attention to the finer details.

All action parts enrichly engraved and combine with elegant lines provide an exquisitely proportioned masterpiece.

THE 1526 COLLECTION DT 10

DT 10 TRIDENT EELL

Competitors feel a special admiration for the shotgun that accompanies them to the podium. Since the beginning of international competition, Beretta has accompanied more medallists than any other brand of shotgun. The DT10 Trident EELL over-and-under was developed for discerning shooters, rolling performance and elegance into a truly durable, secure investment. The perfectly coupled components and the elegant, fully engraved, hand-finished receiver put this shotgun into the exclusive category of a Beretta THE 1526 COLLECTION.

DT 10 TRIDENT L

Available with a fine English scroll or with a floral motif engraving with birds on the side panels, this model shows the same attention in the manual working of the whole gun and the same methodical care already reserved to the DT10 Trident EELL.

DT10 TRIDENT EELL

English scroll or game scenes engraving extends to the side plates in this premium grade competition gun.

DT10 TRIDENT L

A true competition over and under with the finish of a deluxe gun, able to satisfy the most discerning shooters.

THE 1526 COLLECTION SO SERIES

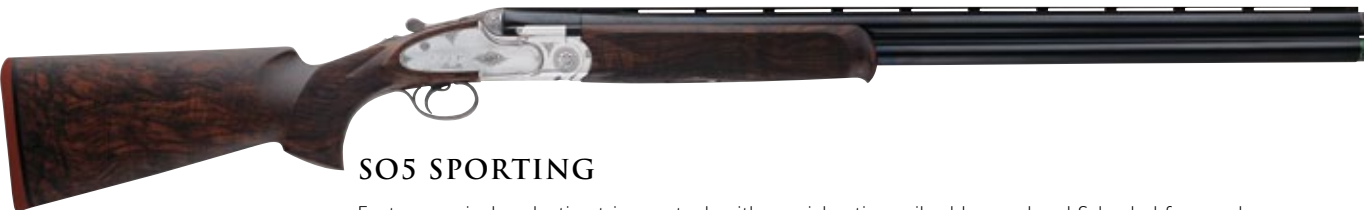

SO5 TRAP

Features a single, non-selective trigger, an International-style or Montecarlo stock with special trap rubber recoil pad and heavier Beavertail competition fore-end. The barrels are specially weighted to afford the perfect equilibrium for Trap shooting.

SO5 SKEET

Features a competition skeet stock with deep diamond hand-cut checkering and a heavier Beavertail competition fore-end. Hand-checked buttplate or special rubber recoil pad are available on request. The short barrels and light weight enhance swing and pointability. They can be ordered with special Skeet chokes or interchangeable Mobilchoke® tubes.

SO5 SPORTING

Features a single selective trigger, stock with special anti-recoil rubber pad and Schnabel fore-end. Barrels are medium weight and have Mobilchoke® choke-tubes, which can be changed quickly and easily. This model can be supplied with the new Optima-Bore® barrels that enhance felt recoil reduction and, thanks to the new Extended Optimachoke® tubes, improve shot pattern concentration and distribution.

With numerous gold medals in the Olympics and other prestigious international competitions, the best shooters in the world consider the SO5 over-and-under the finest competition shotgun ever made. The SO5 is handcrafted to meet the requirements of every shooting discipline and can be further personalised for peak performance. This elegant champion's sleek profile enhances swing and pointability. Its sideplates are beautifully hand engraved and the trigger plate is embellished with a 24-carat fine gold inlay of the "P. Beretta" signature on the coin silver finish.

THE 1526 COLLECTION SO SERIES

SO6 EELL (ALSO AVAILABLE WITH PISTOL GRIP)

Embellished with the finest hand engraving, proudly signed by the engraver, the SO6 EELL sidelock shotgun is sought after by connoisseurs who desire to be one of the few to own such a masterpiece. Pick one up and you know it is special—each of its elegant details, from the sophisticated engravings to the gold-inlaid animals to the dimensions of the walnut briar stock and receiver, is executed to suit the personal tastes and requirements of its owner. The Master Gunsmiths' handwork is evident everywhere, from the hand-cut deep diamond checkering to the hand-file cut ventilated rib. Prized for their beauty and uniqueness, each SO6 EELL is built to perform to the highest standards, decade after decade, generation after generation.

SO10 EELL (ALSO AVAILABLE WITH PISTOL GRIP)

Seventy years after the first modern Beretta over-and-under (the S1 launched in 1933), a new true sidelock shotgun is born: the SO10 EELL over-and-under. It is the deserving successor of the famous Beretta SO series, hunting and competition shotguns that have earned their reputation, on the Olympic podium and on the most exclusive hunts in the world, from Europe to America to Africa, for being the most functional, elegant and exclusive over-and-under in the world. Drawing from this very long experience, and under the dedicated guidance of the Beretta family, the most gifted designers and gunsmiths of the company have created the new SO10 EELL, a synthesis of aesthetic refinement, function and performance that place it at the peak of the world's prestigious over-and-under offerings.

In Italian, EL stands for extra lusso (extra luxury). The prized double “E” double “L” designation takes that quality to the highest level of luxury.

THE 1526 COLLECTION

IMPERIALE MONTECARLO

A shining example of what can be achieved when free reign is given to Master Gunsmiths in the crafting of personalised luxurious shotguns and when Master Engravers are able to express their artistry in full, the Imperiale Montecarlo is a masterpiece destined to become a part of gunmaking history. The deeply blued Demibloc barrels of the Imperiale Montecarlo side-by-side boast numerous, exclusive qualities that have determined its fame as a great hunting and competition gun. They begin with the special steel that assures extremely high resistance and outstanding tensile strength and conclude with the exclusive cold blueing of the barrels that give them an extraordinary deep glossy black colour. The final result will astonish even the most refined connoisseur.

DIANA

The totally hand-made work (receivers are hand-sculpted, mouldings are double chiselled, hammers are totally hand-crafted) has been performed by Mr. Bortolo Gitti and Mr. Claudio Fioretti, the same talented craftsmen working on the Imperiale Montecarlo and the new Beretta SO10 premium guns. Triple compass turn lug fitting, lock and extractor mechanism crafting, polishing, finishing: it's all executed by hand with maniacal care. Carefully finished by hand the barrels boast the exclusive cold blueing, giving them an extraordinary deep glossy black colour and an elevated resistance to corrosion.

THE 1526 COLLECTION EXPRESS RIFLES

455 EELL EXPRESS

In designing the 455 EELL Express, Beretta left nothing to chance in ensuring the absolute mechanical and engineering integrity required to handle the specialised loads, mandatory for stalking dangerous game — like the receiver made of special high-strength steel and forged with an elongated 60 mm plate to compensate for stress when shooting. Or the reinforced receiver sides that can withstand the tremendous pressure of high-powered cartridges. With the highly detailed game scene engraving and intricate scrolling, this makes for one superbly finished rifle.

SSO6 EELL EXPRESS

For dedicated big game hunters worldwide, a Beretta SSO6 EELL Express rifle in the hand means a trophy on the wall. This is no ordinary firearm. The SSO6 Express EELL delivers a potent combination of ultra-strong receiver and carefully crafted barrels to comfortably handle today's powerful ballistics with remarkable accuracy. Hand-finished, hand-checked stocks and fore-ends from highly selected walnut, and a colour-casehardened receiver sporting 24-carat gold inlaid animals add masterful touches to this magnificent rifle. Hand engraved hunting scenes available on request.

BERETTA AUSTRALIA SERVICE

Beretta Australia offers a complimentary stock fitting service to all new Beretta and Franchi competition guns.

At Beretta we understand the importance of gun fit and how it affects performance. We have highly qualified staff to accurately measure and modify shotgun stocks to suit you - free of charge.

Our fully equipped workshop enables us to perform the required modifications to exact tolerances and a level of finish second to none.

Should you require or desire a fully custom made stock, we have a large range of Turkish walnut stock blanks to select from and the skills and equipment to turn out a magnificently finished, perfectly fitting stock to your exact measurements.

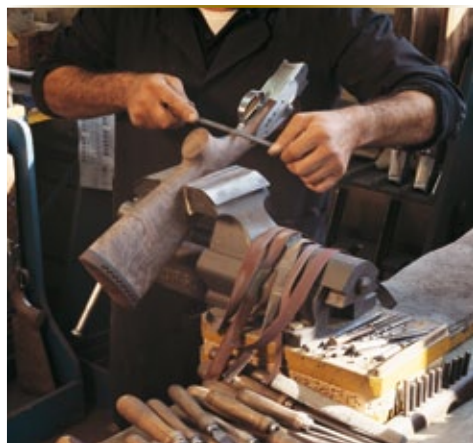

Greg Chan, a coach of the Australian Olympic Shooting Team from 1995-2007 will oversee gun fitting and custom stock requirements. His vast knowledge and experience at the elite level is now available to all Beretta owners.

Beretta Australia also attends many National Championships and hosts Beretta Open Days at venues around Australia. At these events we offer our gunsmithing and fitting service free to Beretta firearm users.

Beretta Australia's gunsmith Sergei Yauhleuski was the Australian Olympic Team Gunsmith at the 2000 Sydney Olympic Games after which he joined Beretta Australia to make his skill and experience available to Beretta owners. Sergei is considered a Maestro in the industry and his stock work is regarded as the best available, as many of Australia's top shooters will vouch for.

Beretta Australia also offers free servicing of Beretta and Franchi competition guns at selected national championship events.

Customer service is our priority and we will endeavour to ensure that it is never compromised.

SEMI AUTOMATICS

It is elegant yet efficient. Sleek yet strong. With slim, graceful lines that leave an indelible impression at first sight, created by internationally renowned design studio, Giugiaro Design.

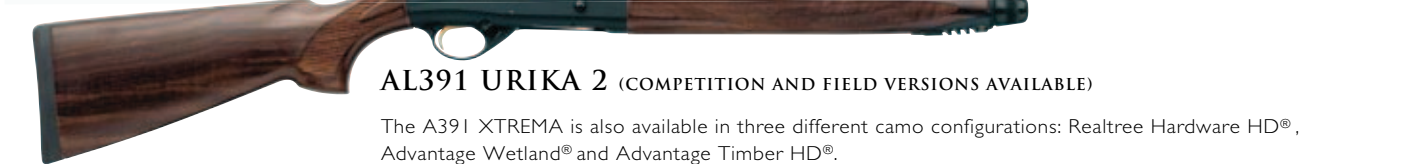

It is the product of a commitment to craftsmanship and manufacturing excellence that has inspired Beretta's endeavours for nearly 500 years: it is the Beretta semiautomatic shotgun, a masterpiece of precision, elegance and mechanical efficiency, built to be the perfect hunting companion or an unfailing and exclusive competition gun. It is unrivalled.

BREAK-OPEN BARREL

UGB25 Xcel

The operating principle of the Beretta UGB25 Xcel semiautomatic gun with break-open barrel is based on short recoil, which keeps the internal parts of the gun clean even after prolonged use. The short recoil (and low barrel axis position) almost completely compensates for muzzle jump during firing, with quicker and easier realignment of the barrel on the target for the next shot. The low barrel axis position transmits the recoil forces in line with the shooter's shoulder, thus minimising felt recoil.

Unlike conventional fixed-barrel semiautomatic shotguns, this new type of break-open design enables the shooter to immediately determine the condition of the shotgun (loaded or unloaded), while allowing others to see the gun clearly in "safe" mode with an open action.

The Beretta UGB25 Xcel features the unmistakable touch of Giugiaro Design. The ergonomically rounded back of the light alloy receiver fits smoothly into the stock, allowing quick and instinctive target acquisition. The polished sides contrast pleasingly with the other matte anti-glare surfaces. The streamlined receiver and the newly designed fore-end with its extended checkered configuration combine to give the UGB25 Xcel an extremely attractive look.

The exclusive use of special spring dampers on the barrel monobloc allows, when shooting, to dissipate in heat a part of the barrel kinetic energy, decreasing the stress for the parts and in the meantime increasing the shotgun life.

UGB25 Xcel. The single barrel offers the advantage of maintaining the point of impact of the second shot exactly in line with that of the first shot, thus ensuring excellent performance.

MULTI ADJUSTABLE STOCK
Optional Beretta Recoil Reduction System significantly reduces felt recoil.

BARRAGE TRAP (ALSO AVAILABLE WITH ADJUSTABLE STOCK)

BARRAGE SPORTING (ALSO AVAILABLE WITH ADJUSTABLE STOCK)

Franchi **BARRAGE**

The over and under with an extraordinary firing action, engineered for the challenges of every-day use.

Every challenge is first and foremost a challenge with ourselves. Being able to count on a precise, technically reliable weapon is the first step towards hitting the mark. BARRAGE over and unders are designed to offer perfect shouldering and unique ease of handling, thanks to the distribution of weight and to the selective grip engineered in full respect of the DESIGNEDforUSE® principle. The titanium treatment, precious side plates in pure silver and the TRUGLO® sight system make BARRAGE over and unders elegant, sturdy and perfect for any discipline.

DESIGNEDforUSE® is the new design concept devised by Franchi to improve shotgun use by increasing its efficiency, simplicity and comfort.

The Barrage Trap is standard with 3/4 & full fixed chokes, cased and available with 30", 1.52 Kg (average weight) barrels. The Barrage Sporter is standard with 5 extended chokes and cased.

Franchi Woomera has been designed and conceived for the Australian market only.

With a limited production of only 100 shotguns (with serial number from WMAUS001 to WMAUS100), Woomera has to be considered a must for all Franchi lovers. Features a right hand side with Gold Duck and Ayers Rock and a left hand side with Gold Pheasant and Opera House.

Steel Shot proof with Fleur de Leis proof mark.

Don't miss out on the opportunity to own one of these limited and exclusive guns.

A History of Affordable Quality Firearms

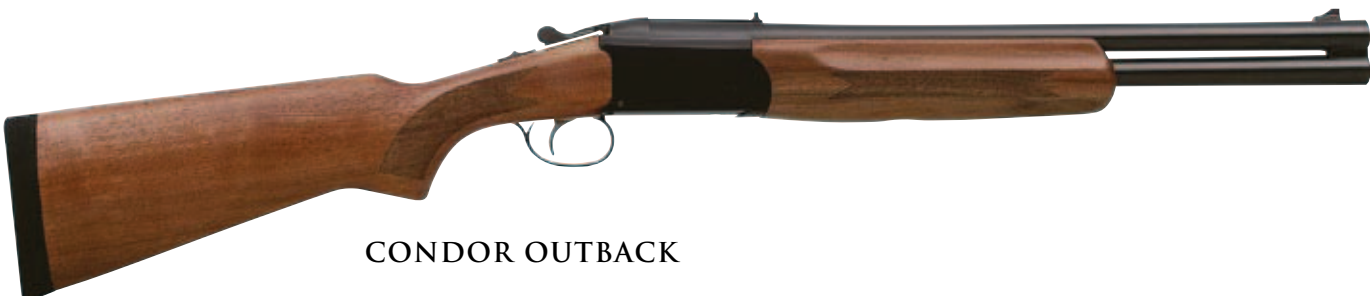

For the better part of a century, the name Stoeger has been associated with fine firearms.

After starting its adventure in 1923 in the U.S, the Stoeger company was purchased by Finnish rifle manufacturer Sako. In 2000, Sako was acquired by the Beretta Holding S.P.A. and Stoeger was placed under the ownership of Benelli USA., where it remains today as a member of the Benelli USA. family of companies. The technology and expertise of Benelli USA are integral to Stoeger's manufacturing processes. All Stoeger products guarantee affordable quality and solid value. Furthermore, the Stoeger range covers a number of different applications that will make this product the perfect answer to all your needs.

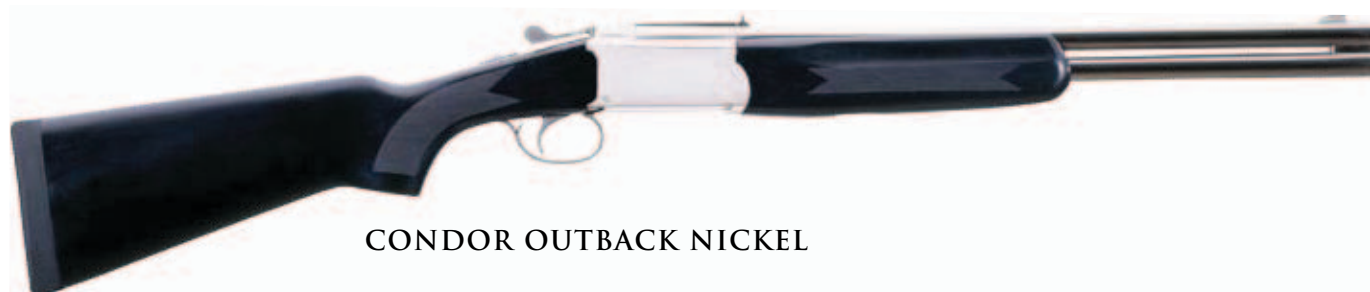

CONDOR DELUXE ENGRAVED

M2 Field *with ComforTech™*

Barrel Length	Stock	Overall Length	Average Weight
M2 Field 20-Gauge 2¾"			
28"	Synthetic	49.3"	7.0 lbs.

M2 COMFORTECH® 28" MC

M2 ComforTech® is a durable and reliable arm, chosen by the hunter or sportsman who wants the latest technology in a shotgun. The significant reduction in muzzle jump and the rapid sight acquisition ensure unequalled performance and comfort. M2 is a rugged, versatile shotgun, totally reliable in all conditions, whether used for law enforcement, hunting or sport shooting.

Supersport *with ComforTech™*

Barrel Length	Stock	Overall Length	Average Weight
SUPERSPORT 12-GAUGE			
28"	Carbon Fibre Finish	49.6"	7.2 lbs.
30"	Carbon Fibre Finish	51.6"	7.3 lbs.

SUPERSPORT COMFORTECH® 28" or 30"

The SuperSport ComforTech® as seen on the Benelli USA website, is the ultimate "speed gun" for sporting clays. The ComforTech® recoil-dampening system reduces felt recoil by 48% and allows the shooter to recover for the critical second shot up to 69% faster than other comparable shotguns – that's fast! In most sporting clays tournaments, only one clay separates the winner from the losers. With the SuperSport's superior reliability, faster recovery time, less recoil and denser shot patterns, it's almost like having an unfair advantage.

SUPER BLACK EAGLE II

Barrel Length	Stock	Overall Length	Average Weight
SUPER BLACK EAGLE II 12-GAUGE 2¾" AND 3½"			
28"	Synthetic	49.6"	7.3 lbs.

SUPER BLACK EAGLE II COMFORTECH® 28" MC

Super Black Eagle II ComforTech®. Innovative lines, non-reflective black and a design rich in character distinguish the SBE II ComforTech®. The exclusive ComforTech® patent ensures superior performance and comfort when shooting. The special Technogel® recoil pad is anatomically shaped to increase the area in contact with the shoulder and decrease the force of impact when firing. Grip and fore-end are finished with "Air Touch" checkering for a sure grip of the stock. The cryogenic treatment improves barrel lift and ensures perfect stability and precision while shooting.

SEMI AUTOMATIC

RAFFAELLO 26" or 28", MC.

An unmistakable line defines the design of the receiver and trigger guard, highlighting the refined elegance and the beauty of this model. The purity of the lines and the polishing of its surfaces are the only decorative elements of the Raffaello receiver, simple and elegant with its black satin finish, anodised surfaces. The walnut wood is finely knurled on the shaft and grip.

RIFLES

For every hunter, the thrill of the hunt is paramount. Everything about it, from spectacular wilderness hunting fields, to the perfect fit and feel of a superbly crafted rifle, feels right. No one understands it better than Sako.

Sako Finland is a home to some of the world's finest hunting and sporting rifles: both Sako and Tikka offer the best technology and their legendary accuracy in one single piece of art.

Here at Beretta Australia we are hunters, exactly like you. We share the same excitement you feel when you rest your cheek against the smooth finish of the comb, while aiming at your desired trophy. That's why we make Sako and Tikka available to you: we give you the very best of everything, because passion has no compromises.

INTRODUCING THE NEW

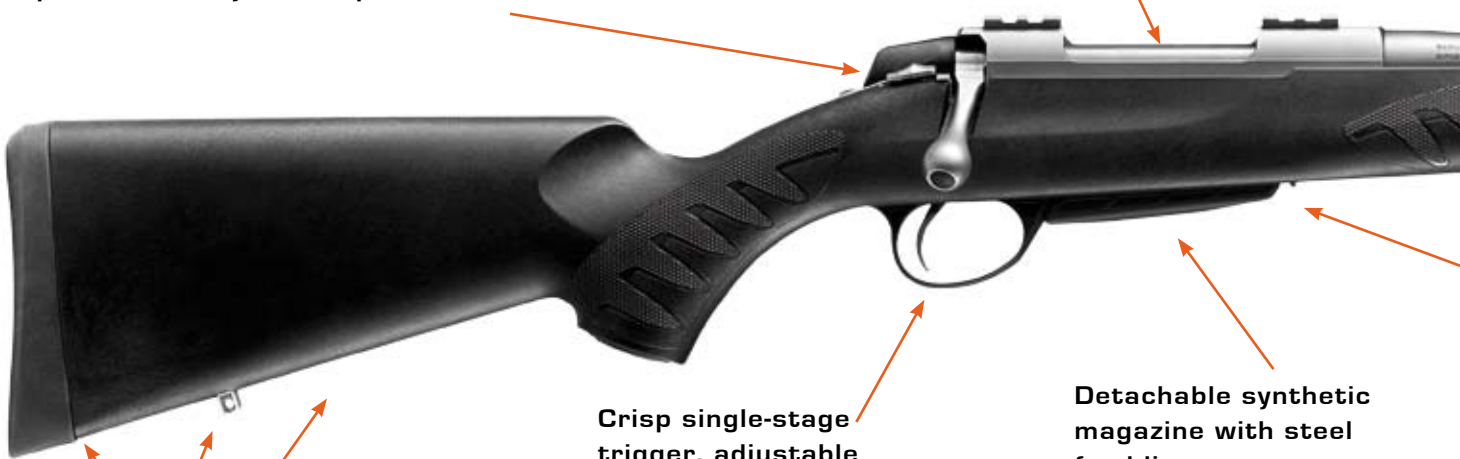

Sako A7

Any rifle can boast technology but in the end it all comes down to accuracy, and Sako enjoys the reputation throughout the world for producing the most accurate production rifles on the planet. Beretta's new Sako A7 represents the beginning of a new era for hunters, joining Sako's legendary Finnish tradition of accuracy and reliability with today's hunting needs. With better out-of-the-box accuracy and reliability than any other rifle brand on the market, the new Sako A7 boasts match-grade performance with a price never before seen on a match-grade hunting rifle.

Machined, two-piece bolt with three locking lugs and a short, ultra - smooth 70 - degree bolt lift.

2-position safety with separate bolt release button.

Synthetic stock with rubber recoil pad and sling swivel mounts.

Crisp single-stage trigger, adjustable from 2-4 pounds.

Detachable synthetic magazine with steel feed lips.

Length of pull: 14 inches. Cartridges capacity: 4 rounds. Finish: Synthetic

Sako 85 rifles share demanding design principles, adhering to both tradition and innovation, allowing riflemen to choose a model to perfectly fit different preferences and needs. The Sako 85 range offers different stock styles and barrel options combined with a comprehensive calibre selection. When you buy a Sako, you get a thoroughly tested quality rifle. Each rifle is shot at the factory to make sure it shoots as a Sako should.

Each Sako 85 is individually factory tested and guaranteed to shoot five shot groups of 1 MOA or less out of the box.

The special 2-way Sako Safety System locks both the trigger and the bolt handle. A unique bolt release button of the Sako Safety System allows you to load or remove a cartridge from the chamber with the safety engaged.

The new, patented, Total Control Magazine Latch prevents accidental release of the detachable stainless steel magazine under the heaviest recoil or the harshest of hunting conditions. If desired, the magazine may be reloaded without being removed from the rifle.

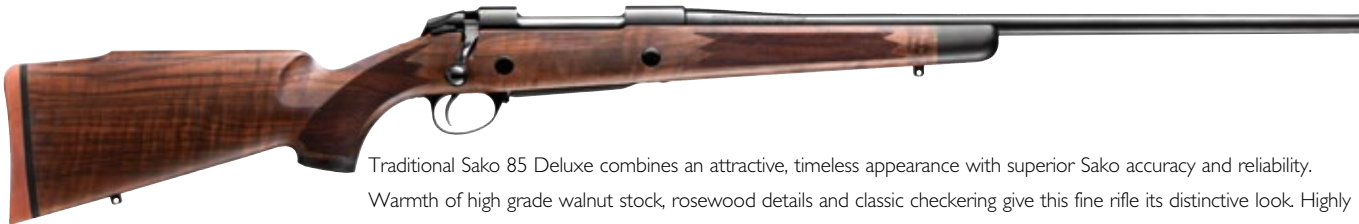

The Sako 85 actions are available in 5 different lengths, providing the very best functions for each cartridge size. All Sako 85 models feature controlled cartridge feed (Sako Round Control System) to virtually eliminate double feeding or cartridge jam. The Sako tumbolt handle gives natural hand position during bolt operation, which allows very quick repeated firing.

The weight of pull of the single-stage Sako 85 trigger unit is adjustable from 1 to 2 kg (2 – 4 lbs). An optional single-set trigger is also available for most Sako 85 models. The trigger of the Sako 85 rifles is protected by an extremely durable, steel trigger guard. The Sako 85 stock, with its straight comb without cast, minimises felt recoil.

SAKO 85 DELUXE

Traditional Sako 85 Deluxe combines an attractive, timeless appearance with superior Sako accuracy and reliability. Warmth of high grade walnut stock, rosewood details and classic checkering give this fine rifle its distinctive look. Highly polished metal parts, fixed magazine and the Sako pistol grip inlay are just a couple of the custom features that Sako offers for this “standard” factory-made rifle.

SAKO 85 BAVARIAN

The Sako 85 Bavarian is a masterpiece combining high grade walnut stock in traditional European style with the superior performance and technology of the Sako 85 series. Under its stylish exterior design are new modern features and attention to detail, which enhance the experience of owning and shooting one of the world's most popular and respected rifles.

SAKO 85 HUNTER

Calling the Sako 85 Hunter “standard” is a serious matter of understatement: loaded with Sako features like the legendary Sako accuracy, smooth bolt operation and perfect balance, it is a delight to own and shoot. The Sako 85 Hunter features high-grade walnut stock and satin-like blued finish on the barrel and receiver. Sako 85 Hunter model is available with blued or stainless metal parts. Optional iron sights are available for the blued barrel.

SAKO 85 HUNTER STAINLESS

The Sako 85 Hunter Stainless features high-grade walnut stock and weather resistant stainless steel Barreled action and metal parts. Loaded with Sako features like the legendary Sako accuracy, smooth bolt operation and perfect balance, it is a delight to own and shoot. This Sako 85 model is a mix of classic warmth of wood and contemporary highlights.

SAKO 85 HUNTER GREY LAMINATED STAINLESS

The Sako 85 Grey Laminated Stainless has a high-grade stainless steel barrel, receiver and bolt. The grey, matte-lacquered laminated hardwood stock provides a stable platform to hold up in the toughest conditions. With its grey streamlined stock and stainless hardware, the Sako 85 Laminated Stainless is well matched with a silver grey scope and scope mounts to form one of the best-looking hunting rifle ensembles in the world.

SAKO 85 KODIAK

This modern newcomer of the Sako 85 family is made with a true hunter in mind. The straight, weatherproof stock is made of grey laminated hardwood and reinforced with two cross-bolts. The short, free floating "bull" barrel features adjustable open sights and band type front swivel. All metal parts are made of stainless steel or are specially coated to ensure excellent wear and corrosion resistance.

SAKO 85 FINNLIGHT

Sako 85 Finnlight is for those who go deeper into the wild for their enjoyment. On mountain trails, trekked heights and long distance walks, some hunters prefer high performance full size rifles that are light in weight. The fluted barrel of the Finnlight is just one of the many features that make it ideal for the hunter seeking a light rifle that's perfectly trimmed. The Sako 85 Finnlight is also an excellent choice for women and younger shooters.

SAKO 85 SYNTHETIC STAINLESS

Sako 85 Synthetic Stainless is an all-time favourite giving you trouble-free ownership and the firmest hold you have experienced. Black grip areas against the black satin-like stock create a stunning profile. Stainless steel barrel and receiver are non-reflective and give all-weather durability for years.

SAKO 85 VARMINT

The Sako 85 Varmint is a long-range hunting rifle built to deliver pinpoint accuracy for hunting and target shooting. The heavy, free-floating barrel diminishes vibration and recoil, and makes it easy to zero in and stay on target. Selected walnut used in Varmint rifle stock enhances both comfort and accuracy, and features an extra wide, flat-bottomed beavertail fore-end and more pronounced pistol grip for better bench shooting position.

SAKO 85 VARMINT LAMINATED STAINLESS

The Sako 85 Varmint Laminated Stainless comes with all the same qualities as the Varmint, but with its stainless metal parts and stable laminate stock, it is perfect in rough conditions. The fluted barrel accelerates barrel cooling and furthermore, gives this beautiful rifle an extra dose of good looks.

Sako Quad rimfire rifle is an excellent example of trailblazing innovation and out-of-the-box thinking. Four barrels and four calibres, all in one unique rifle. This Sako innovation enables for interchangeable barrels to be changed in seconds – without losing the point of impact. So, there is no more need to ponder whether you have chosen the best small-bore calibre when you can have them all in one package!

The Sako Quad is made with the best materials, using cold-hammered forged precision barrels and Sako workmanship to produce flawless accuracy and operation. Sako Quad has been a runaway success with shooters, offering both practical versatility and serious performance. With the Sako Quad, you can mix and match parts to create the firearm you need to suit the activity you're engaged in.

Quad case

The best way to store and display your Sako Quad. Sturdy aluminium construction, prominent Sako Quad logo on front. Internal compartments to hold replacement barrels and most accessories.

Barrels can easily be changed by using the Sako Quad barrel tool.

From left to right: 17 Mach2, 22LR, 17HMR, 22WMR. All calibres designed for specific shooting needs.

Barrels colour coded for easy identification.

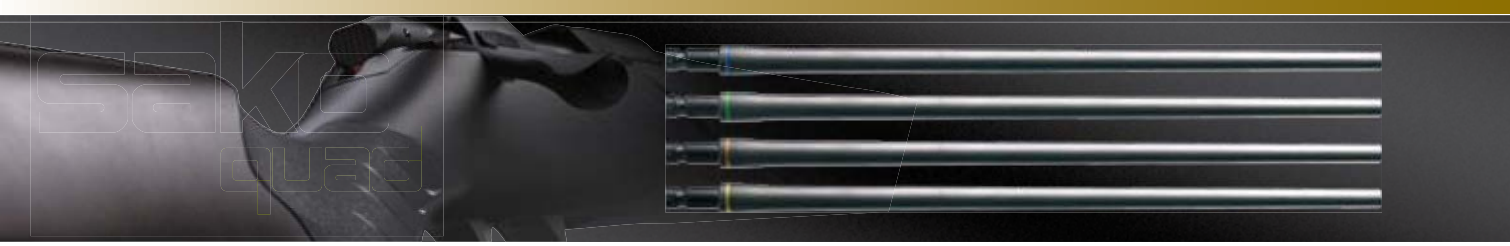

On offer are several different stock options. A modern and stream-lined stock design. The stock material is either selected walnut or glass-fibre reinforced copolymer.

Sako Quad magazines are correspondingly colour coded and can house two different calibres.

Colour coded Burris scope 3-9 developed exclusively for Sako, memorises the point of impact for each calibre. (Not Included)

SAKO QUAD HUNTER

Sako Quad Hunter was designed to look and feel like traditional Sako hunting rifles, but all features in it are up-to-date. The full-size walnut stock offers the same out-of-the-box accuracy as all legendary Sako hunting rifles.

SAKO QUAD SYNTHETIC

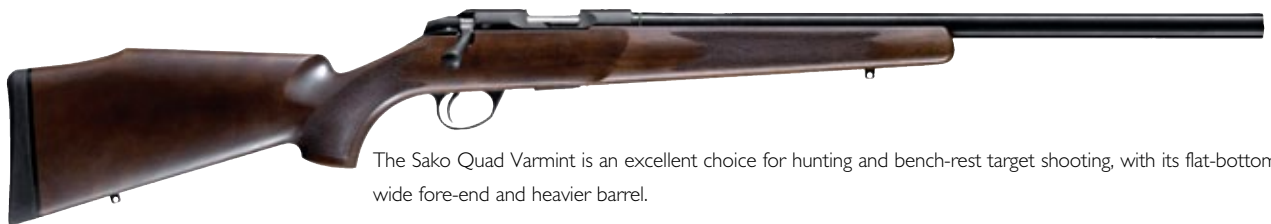

Sako Quad Synthetic comes with stylish modern synthetic stock, blued barrels and black rubber recoil pad. Sako Quad butt stock spacers are available for modifying the length of pull.

SAKO QUAD HEAVY BARREL

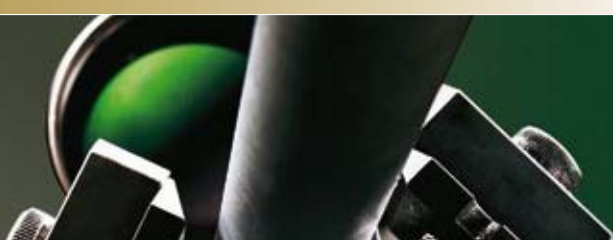

Sako Quad Heavy Barrel takes more shooting without getting heated up. The Monte Carlo type cheek piece on black synthetic stock offers great bench shooting position.

SAKO QUAD VARMINT

The Sako Quad Varmint is an excellent choice for hunting and bench-rest target shooting, with its flat-bottomed extra wide fore-end and heavier barrel.

Sako TRG is a total accuracy concept designed for one job only: to hit the target. This spectacular result of 100% Sako innovation gives you performance that transcends the highest demands for accuracy, reliability and versatility. The TRG is designed to meet individual tasks, and adjusts to each shooter's personal style, build and posture. Super target grade barrels, specially made for TRG, are cold-hammer forged. The solid vault-like action is also hammer forged from special steel alloy. The sturdy bolt with three locking lugs feeds rounds unflinching from the center-line of a detachable staggered magazine. Bolt lift angle is only 60° for fast bolt throw. The target trigger is a fully adjustable two-stage unit. The integral 17 mm axial rails with recoil stop-slots on the top of the receiver allows a quick and perfect scope mounting.

SAKO TRG 42 & 22

The TRG 42 in 300 Win Mag and 338 Lapua Mag is a true long-range precision tool already adopted by numerous military and law-enforcement special units worldwide and also suitable for competition.

SAKO TRG 42 & 22

The TRG 22 in 308 Win handles a multitude of accuracy tasks: it is a thoroughbred 300 m ISSF standard competition rifle, a CISM competition winner.

Adjustable for height and cast-off/on. Cheekpiece adjustable laterally and with spacers also vertically. Specially designed contour allowing for steady and firm firing position.

Especially designed for sniping this new bipod lets the rifle "hang" below the hinge-point offering very steady shooting position even with large and heavy scopes on the rifle. (NOT INCLUDED)

Tactical scope mount for modern three turret tactical scopes (30 and 34 mm tube diameter). 0.5 degree elevation allowance (30 MOA) for better adjustment range capability. (NOT INCLUDED)

Highly effective three-chamber muzzle brake. (NOT INCLUDED)

SAKO OPTILOCK BASES AND RINGS

Optilock bases and rings are machined from a solid block of steel, Cr-Mo alloy or stainless, just like our rifles. The front bases have a solid angled left side and a similarly angled right side with a clamping device.

Optilock rings are available in four heights and two diameters: 25,4 (1 in) and 30 mm to fit any scope. The inner scope saver ring is made of polymer and acts as a ball bearing to prevent the scope tube from being deformed.

The scope mount bases are available in four models for Sako and two for Sako TRG-22/42 rifles. Choice of right base model depends on action length, scope tube length and eyerelief that is needed.

Optilock Weaver base makes the use of Optilock rings possible in all rifles with Weaver or Picatinny rails.

General Features:

DOVETAIL RAILS

Integral tapered dovetail rails on the Sako rifle actions feature a limiter pin slot for Optilock bases and ring mounts.

LIMITER PIN

Limiter pin of the Optilock base fits perfectly to integral tapered dovetail rails on the Sako actions. The combination of the dovetail rails and Optilock mounts is the smartest way to mount a scope on a high-power rifle.

POLYMER RING

The inner Optilock scope saver ring is made of polymer and acts as a ball-bearing to prevent the scope tube from being deformed.

QUICKMOUNT

All Optilock rings can be fitted with the Optilock Quickmount bases. The adjustable levers of the Quickmount make removal and remounting of the scope precise and easy.

PACKAGES

Optilock rings and bases are sold in separate packages. Rings can be paired with any of the bases.

Custom Quality right out of the box

www.berettaaustralia.com

A STUNNING OUT-OF-THE-BOX ACCURACY D

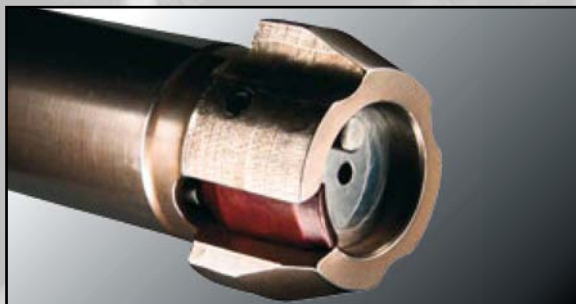

We welcome every rifle owner, regardless of price or make preference to come and compare the Tikka T3's performance against their old rifles. We believe the only way to match a T3 is to go to a custom shop and pay several times the price. Tikka T3 offers no gilded engravings, no extra cup holders or delicate polished wood - just incredible out-of-the-box accuracy, silky smooth operation and uncompromising reliability with Sako's beautiful finish and rigorous attention to detail as standard. With the Tikka T3, you hit one of the most difficult targets in the shooting world: true value.

We believe in simple things that work. With Tikka you need no special modifications, re-bedding or add-on devices. You just need to take it out of the box, fire a couple rounds for the sighting in and you're set. That is the out-of-the-box accuracy Tikka is famous for. Simple. When choosing a new rifle check the facts, compare the quality of Tikka T3 against any other rifle on the market, take it in your hands and let your hunter's instincts decide.

The two-position safety catch is easy and precise to operate. The two red dots seen in the picture indicate that the rifle is ready to fire.

The T3 bolt has a counter-bored bolt head and twin locking lugs. Reliable spring-steel extractor and a strong spring and plunger ejector.

Both bolt, handle and trigger are blocked when the safety is on. The stop bolt is located inside the receiver.

Single-stage pull with positive trigger feel. Easily adjustable through the magazine well from 1 to 2 kg (2 to 4 lbs). All models are available with a single-set trigger option.

DELIVERING PERFORMANCE OF 1 MOA OR LESS

SOUL & BODY

COMBINING PERFORMANCE WITH VALUE

A good grip for a firm grip. The durable stock is made of glass fibre reinforced copolymer polypropylene, and features a palm swell.

A good and even muzzle crown is essential for the finest accuracy. Tikka barrels are hand crowned for a perfect finish.

The T3 cold hammer forged precision barrels are free-floating in models with wooden stock. Thus you get the best game-getting accuracy.

The magazine release latch in front of the magazine is flush fitted, to protect you from unintentional release. The latch is horizontally grooved for improved contact.

Straight, true-feeding single-column detachable magazines for fast and sure feeding. Made of strong fibreglass reinforced composite, ensuring durability.

The T3 action features a large, flat bedding surface and a large recoil lug against an accurately inlaid stock-vital for out-of-the-box accuracy. The ejection port is optimised, making the receiver more rigid and inherently accurate.

A STUNNING OUT-OF-THE-BOX ACCURACY D

TIKKA T3 HUNTER

LEFT-HANDED
ALSO AVAILABLE

The Tikka T3 Hunter is made for the hunter who is looking for top performance and innovation, but prefers a classic style and feel. The high-grain walnut stock is selected and shaped by Sako master gunsmiths. The T3 Hunter offers an extensive calibre selection for hunting and sport shooting. An "old-world" platform based on modern thinking, taking you to a new level in accuracy, reliability ...and shooting enjoyment.

TIKKA T3 HUNTER STAINLESS

The Tikka T3 Hunter Stainless provides classic style and feel with stainless metal parts. The oiled stock is made of selected high-grain walnut. Free-floating barrel, receiver, bolt and bolt handle made of stainless steel make T3 Hunter Stainless perfect for all conditions. Widest calibre selection of the stainless Barreled Tikka T3s.

TIKKA T3 LITE

LEFT-HANDED
ALSO AVAILABLE

The Tikka T3 Lite has all black stock with blued cold-hammer forged free-floating barrel. The light but sturdy T3 TrueBody glass fibre reinforced polymer stock is pure Sako innovation. The straight stock combines high performance and light weight. Positive checkering for comfort and firm grip in all conditions. Improve your marksmanship today with this stealthy T3 challenger.

TIKKA T3 LITE STAINLESS

LEFT-HANDED
ALSO AVAILABLE

T3 lite stainless will be your trusted, hard-wearing companion, offering spotless long-term performance. The T3 metal parts are made of Sako's high-grade stainless steel and the stock is glass fibre reinforced copolymer, both giving you the double advantage of easy maintenance and great looks. Whatever the weather, with a Tikka T3 Lite Stainless in your hands, you will always shine.

DELIVERING PERFORMANCE OF 1 MOA OR LESS

TIKKA T3 LAMINATED STAINLESS

This model combines all-weather durability and stability with pinpoint accuracy. The free-floating, high-grade stainless steel barrel is cold-hammer forged. Also the receiver, bolt and bolt handle are stainless steel. The stock is made of grey matte-laquered laminated hardwood providing stability and extreme durability. Add stainless Tikka Optilock™ scope mounts and a silvery grey scope – you'll have a stylish and faithful companion for years ahead.

TIKKA T3 CAMO STAINLESS

The Tikka T3 Camo Stainless is designed for a serious shooter who is ready to "rough it" for best results. The barrel is non-reflective stainless steel and the camouflage (Realtree Hardwoods® HD™) patterned fibreglass reinforced copolymer stock completely blends in with the surroundings.

TIKKA T3 BATTUE

The short Barreled Tikka T3 Battue is specially designed for hunts where shots will be taken at running game over relatively short distance. It's also the top choice for a hunter who treks and hunts in heavy cover. Perfect balance and highly visible battue sights with TruGlo® optic fibres enable fast and easy aiming.

TIKKA T3 BATTUE LITE

The short Barreled Tikka T3 Battue Lite is specially designed for fast target acquisition. Perfect balance and highly visible battue sights with TruGlo® optic fibres enable fast and easy aiming. Topped with a rifle scope and Optilock™ scope mounts, the T3 Battue Lite has the accuracy to reach game even at longer distances. The fibreglass reinforced polymer stock makes the rifle lighter in weight and adds weather resistance.

A STUNNING OUT-OF-THE-BOX ACCURACY D

TIKKA T3 VARMINT

The heavy, free-floating precision barrel of Tikka T3 Varmint effectively eliminates vibration and does not overheat even in fast-paced varmint shooting. The receiver and barrel are made of high grade blued Cr-Mo steel. T3 Varmint comes with a 3, 5 or 6-round detachable magazine. The synthetic stock has a extra-wide fore-end for bench resting and the swivel stud accommodates both a bipod or a sling.

TIKKA T3 VARMINT STAINLESS

LEFT-HANDED
ALSO AVAILABLE

The heavy, stainless steel barrel of Tikka T3 Varmint Stainless effectively eliminates vibration and does not overheat even in fast paced varmint shooting. T3 Varmint Stainless comes with a 3, 5 or 6-round detachable magazine. Synthetic stock has a extra-wide fore-end and cheek piece. When it comes to consistent, predictable accuracy, be it in range or long distance, T3 Varmint is hard to out-shoot.

TIKKA T3 SUPER VARMINT

The newest member of the T3 Varmint family is the full-bodied stainless rifle Tikka T3 Super Varmint. T3 Super Varmint comes with a 3, 5 or 6-round detachable magazine. Synthetic stock has a extra-wide fore-end and cheek piece. Adjustable cheek piece and integral scope mount rails for Optilock scope mounts. Super Varmint features a Picatinny rail on top of the receiver as a standard.

TIKKA T3 TACTICAL

When it comes to accuracy, the Tikka T3 Tactical is in a class of its own. The free-floating barrel is made of match grade Cr-Mo steel and manufactured by a precision cold-hammer forging process. The action and the barrel surfaces are manganese phosphatised for lasting protection against the elements and wear. The modern Teflon coated bolt has two front locking lugs and springloaded plunger ejector with 70 degree opening angle for fast, smooth and reliable operation. The 2-way safety locks both the bolt and the trigger. The trigger unit is adjustable with hand-honed sear/trigger without creep. Single set trigger is optional.

The stock is made of fibreglass reinforced copolymer polypropylene. The cheek-piece is adjustable at 5 mm interval up to 25 mm. The adjusting wheel can be fitted on either side of the stock.

The detachable straight-feeding single column magazine is silent, durable and non-rusting. The standard 5/6-round magazines are tailored for each calibre for ultimate reliability and performance. New colour coded magazines optional make the use of different loads easy to separate.

Specially developed for heavy duty use by law enforcement agencies and tactical competition shooters. The action and free-floating, heavy barrel surfaces are manganese phosphatised for lasting protection. Muzzle thread for optional Sako muzzle brake. The Picatinny rail on the top of the action takes any Weaver or U.S. Mil. Std. 1913 compatible mounts. The recoil pad is made of black rubber and the length of pull may be adjusted with spacers. The standard 5-round magazines are tailored for each calibre for ultimate reliability and performance.

TIKKA OPTILOCK BASES AND RINGS

The Tikka Optilock mount keeps the scope centred in all conditions. The scope rests in the grip of a revolutionary ball-bearing type ring. Unlike conventional mounts, the Optilock's polymer rings distribute the clamping force evenly along the scope shaft, ensuring that your valuable optics will not be twisted or scratched. With Optilock mounts, the scope and mounts are easily mounted and removed as one unit without affecting the point of impact. The limiter pin in the mount base and the limiter pin slot on the receiver enable fast and accurate remounting of the scope/mount unit and guarantee stability of mounting. Optilock bases and rings are machined from a solid block of Cr-Mo alloy or stainless steel. Bases and rings are also available with phosphatized finish. The base design with its clamping device connects to the Tikka T3 rifle's integral dovetail rail on the receiver.

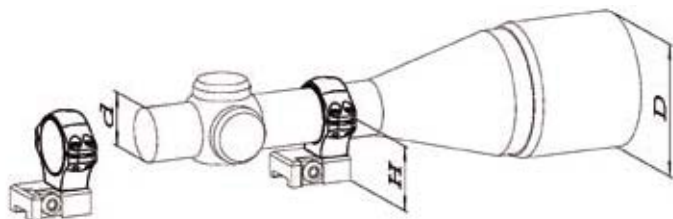

Tikka Optilock base and ring mounts are available in 1"/26 mm and 30 mm diameters and four heights, blued or stainless steel to fit any scope.

POLYMER RING

The inner Optilock scope saver ring is made of polymer and act as a ball-bearing to prevent the scope tube from being deformed.

PACKAGES

Optilock rings and bases are sold in separate packages. Bases can be paired with any of the Rings.

Stoeger® AIRGUNS

Stoeger X Series are modern, high-tech air rifles with the look and feel of quality European sporting arms. Developed by Italian engineers and designers, Stoeger air rifles combine rugged, efficient design with quality manufacturing. Stoeger air rifles are suitable for shooting interests from plinking and target shooting to pest control and small-game hunting.

X Series airguns are chambered for .177 calibre or .22 calibre with hard-hitting lead pellets.

They are powered by a fast and convenient break-barrel, spring-and-piston system. Every Stoeger airgun is ready to shoot with a single cocking stroke—requiring no CO2 cartridges or propellant cans.

The entire line of Stoeger X Series air rifles displays the refined lines and modeling of European sporting arms, combined with the rugged, efficient design and quality manufacturing you expect from Stoeger Airguns.

- * Chambered for .177 calibre, with hard-hitting lead pellets
- * Powered by a fast, convenient, break-barrel spring-and-piston system
- * Ready to shoot with a single cocking stroke
- * No expensive CO2 cartridges or propellant cans needed
- * Propel pellets at blazing speeds
- * Suitable for a variety of shooting interests
- * Improved automatic safety
- * Precision, fibre-optic front and rear sights
- * Fully adjustable rear sights with knobs for elevation and windage
- * Green, fibre-optic rear sighting inserts for maximum visibility
- * Polymer hood to protect front sight
- * Red, fibre-optic front sighting insert for fast, accurate target acquisition
- * Range of stocks available in Monte Carlo or straight-comb style
- * Stock finishes include quality hardwood, lightweight black synthetic, and Advantage Timber® HD™ camo
- * Some stocks feature checkered panels on grips and fore-ends
- * Non-slip, rubber butt-pads for comfort
- * Solid shoulder mounts
- * Scope combo packages available

The X5 is a great entry-level air rifle with style, performance and power. Features an ergonomic cocking grip that lets you fully charge the rifle with less effort, shot after shot and can shoot lead pellets up to 640 feet per second.

The rifled steel barrel of the X5 airgun provides accuracy and years of service.

The X5 comes standard with front and adjustable rear sights with fibre-optic inserts—green front and two-dot, red rear—to make target acquisition easy in any light or weather conditions.

All X5 receivers come with integral dovetail scope rails.

The X5 is mounted in a hardwood, Monte Carlo-style stock for quick target acquisition. The raised, ambidextrous cheek-piece lets you shoot comfortably, regardless of hand preference. A rubber butt-pad is standard for a solid shoulder mount. For added security and control, the X5 has an automatic, ambidextrous safety mounted on the back of the receiver.

Add greater precision to your shooting with a factory-installed, 4x32 power riflescope on the X5 Combo. The X5 air rifle is the ideal airgun for target shooting, plinking and eradicating small pests.

The X10 is a European-style air rifle that offers state-of-the-art performance and power. Its reliable, spring-piston break-action with ergonomic cocking grip for easy charging give you the power to propel .177 lead pellets at a potent 1.000 feet per second. The straight-comb-style hardwood stock of the airgun is a hunter's favourite. It is fitted with a rubber butt-pad for a solid shoulder mount and improved control. The X10 is also available with a lightweight, all-weather black synthetic straight-comb stock.

The rifled, blued steel barrel of the Stoeger X10 guarantees accuracy and years of service. It comes with standard fibre-optic front and adjustable rear sights. The fibre-optic inserts—single green front and two-dot, red rear—make target acquisition easy in varied light and weather conditions.

All X10 receivers feature an integral dovetail scope-rail. For added security and control, the X10 features an automatic, ambidextrous safety mounted on the rear of the receiver. The trigger can be screw-adjusted for second-stage length.

Add an extra level of performance by selecting any of the X10 Combo models. They come with a 4x32 power riflescopes. The handy X10 is ideal for plinking and all kinds of target shooting, and takes the field with sufficient power for pest control and small-game hunting.

The Stoeger X50 is the magnum choice for all air rifle chores and challenges, from plinking and target shooting to pest control and small-game hunting. A robust, spring-piston, break-action system gives you the power to drive .177 lead pellets at a potent 1200 feet per second.

The airgun has an ergonomic cocking grip that assures fast and easy, single-stroke charging on each and every shot. The blued-steel, rifled barrel provides accuracy and years of service. It comes with standard, fibre-optic front and adjustable rear sights. Target acquisition is quick and easy with green front and two-dot, red rear fibre-optic inserts. All X50 receivers feature an integral dovetail scope-rail.

For added security, the X50 features an automatic, ambidextrous safety, easily accessible on the rear of the receiver. The trigger assembly can be screw-adjusted for second-stage length.

X50 models are mounted in Monte Carlo-style stocks for improved control and target acquisition. The raised, ambidextrous cheek-piece lets you shoot comfortably, regardless of hand preference. Checkering on the pistol grip and fore-end ensures a firm grip in wet weather. A rubber butt-pad provides a solid shoulder mount. Stocks are available in rugged black synthetic and genuine Advantage Timber® HD™ camo. Add an extra level of performance by selecting any of the X50 Combo models with factory-mounted, 3-9x40AO parallax adjustable riflescopes.

WESTERN GUNS

The cowboy mystique lives on. From the prairies of Nebraska to the deserts of New Mexico, it runs through the veins of those who treasure tradition and revel in glories past. The spin of the cylinder, the glint of the nickel barrel, the sheer thrill of breaking open a six-shooter or the adrenaline rush of firing a fast handling, lever-action rifle.

There's nothing that quite compares to that exhilaration. But more than anywhere else, the heritage of the Old West runs deep in the heart of the Western Shooter. And finds its fulfilment in that moment when you test yourself, using those classic firearms that defined a fabled era, against the legends of the American frontier.

Authenticity and performance is what matters above everything else to the Western Shooter. This is why you'll find an extraordinary combination of both in Beretta and Uberti's lineup of Old West firearms. These fine firearms are for the Western Shooter who demands absolute truthfulness to the 19th century originals as far as dimensions, feel and functioning, coupled with Beretta-style reliability, safety and performance.

WESTERN GUNS GOLD RUSH, 1873 RENEGADE, STAMPEDE BUNTLINE

GOLD RUSH RIFLE

The Beretta Gold Rush Rifle follows the same philosophy as Beretta's Stampede revolver: combining the looks and feel of the Old West original with modern safety and reliability. Chambered for the 45LC and the 357 Mag/38 Special, the Gold Rush is a fast-handling pump-action longarm perfect for Cowboy action shooting, small-game hunting and informal target practice. Discrete modifications have been incorporated that greatly enhance safety and reliability.

GOLD RUSH CARBINE

Like the Gold Rush Rifle, the Gold Rush Carbine is a testament to authenticity coupled with modern performance. Compared to the original, several enhancements have been made. A solid transfer-bar safety mechanism is housed in the hammer, making the gun absolutely safe to load and unload without having to lower the hammer. Feeding is improved considerably by ensuring that each cartridge is perfectly in line with the chamber. And a redesigned cycling mechanism makes it possible to obtain the desired speeds without jams.

GOLD RUSH DELUXE

The Beretta Gold Rush Deluxe Rifle and Carbine embody the same high standards in engineering and performance as the Beretta Gold Rush and Carbine, with some important aesthetic differences. Features of the Gold Rush Deluxe include charcoal-blued barrels, jewelled hammer and trigger and German silver medallion inlaid into the stock. The Deluxe walnut stock and fore-end have special fish-scale checkering, oil finish and Beretta "three-arrow" logo engraved in the checkering pattern.

STAMPEDE BUNTLINE CARBINE

In 1873, it is said that dime novelist Ned Buntline presented Colt revolvers with shoulder stocks to the most famous men of the Old West, including lawmen Wyatt Earp and Bat Masterson. The Buntline revolver was one of the first reliable repeating rifles, battle-tested in the Mexican War as well as Indian Wars of the Southwest.

The new Beretta Stampede Buntline revolver is a true working replica of the famous Buntline, featuring the same great performance and reliability as Beretta Stampede revolvers, including the innovative transfer bar safety, which allows the revolver to be safely loaded with six cartridges rather than five and an open chamber. Hooked trigger guard, 18-inch barrel, brass crescent butt plate, checkered stock, inlaid gold Beretta medallion on both sides.

WESTERN GUNS STAMPEDE

STAMPEDE NICKEL

There's no gun more quintessentially American than the single-action revolver. The Beretta Stampede combines the feel and handling qualities of the original "hogleg" with a transfer-bar safety system that makes it safe to carry with all six chambers loaded. The beauty is in the accurate details. The fixed front sight is true to the original. And with the frame dimensions closely matched to the 19th-century originals, the Stampede feels slender and very responsive in the hand.

STAMPEDE DELUXE

The Stampede Deluxe features a frame finished in Beretta Colour-Case, which duplicates the classic look of colour-casehardening to capture the romance of the Old West. Select walnut grips and a lustrous charcoal-blued barrel and cylinder complete the picture. Whatever your choice, the transfer-bar safety system will allow you to safely load all six chambers without fearing an accidental discharge.

STAMPEDE OLD WEST

It is hard to think about the American Old West without mentioning the Colt Single Action Army revolver, as it has become the icon for all the romance and adventure of the Old West. Often called the "Peacemaker"®, the Single Action Army revolver was the sidearm of choice for legendary figures like Wyatt Earp, Doc Holliday, Bat Masterson, Teddy Roosevelt and notorious outlaws including the Daltons, Billy the Kid and Black Bart. Today, the legend of the American Old West lives on through the Beretta Stampede Single Action revolver. From the multiple clicks of the hammer to the feel of the grip, the Stampede is true in every detail, bridging Old West authenticity with Beretta's reliability, safety and performance.

STAMPEDE MARSHALL

The internal features may be the same as Beretta's other single-action Stampedes, but the walnut birdhead grip gives the Marshall a distinction all its own. Chambered in .45 Colt and .357 Mag, this handsome replica has a 3 1/2-inch blued barrel and cylinder, Beretta Colour-Case frame and incorporates the most modern safety features. The feel and functioning are just like the originals, with a multiple-click single-action hammer mechanism and a half-cock position that allows the cylinder to spin free.

WESTERN GUNS STAMPEDE, LARAMIE NICKEL

STAMPEDE PHILADELPHIA CUSTOM ENGRAVED MATCHED PAIR

Any cowboy would be proud to fill his holster with these matching Stampedes. Inspired by the limited edition Philadelphia Centennial engraving (1876), this matched pair is laser-engraved then hand-finished on the receiver cylinder and barrel. The walnut grips feature checkering and inlaid gold Beretta medallions. Gold-filled "1" and "2" on top of backstrap; paired serial numbers; 5½-inch barrels. Calibre: .45 LC.

STAMPEDE GEMINI, MATCHED PAIR

This handsome matching pair of Stampedes features German silver trigger guards and backstraps. The wood grips are hand-rubbed, oil finished and fitted with a gold Beretta medallion. In addition to matching paired serial numbers, Beretta has stamped the "UGB" inspector cartouche on the outside panel of each grip. These stamps match the side of the serial number prefix. 5½-inch barrels. Calibre: .45 LC.

STAMPEDE BISLEY NICKEL

Old West firearm connoisseurs will be pleased by how true to the original this replica looks and feels, although it incorporates a transfer-bar safety and is manufactured of durable modern materials. Instead of taking the easy road and "dressing up" this Stampede as a Bisley, Beretta built this revolver from the ground up around a true Bisley frame — which is somewhat taller than that on its standard single-action cousin. The distinctive Bisley grips in imitation Bakelite, hammer and wide trigger are also a precise replica of the originals as far as dimensions, balance and feel.

LARAMIE NICKEL

The Laramie replicates a break-open revolver popular in the Old West for its quality, accuracy and for the speed at which it could be loaded and unloaded. Upon releasing the top latch located in front of the hammer, the revolver could be instantly unloaded by "breaking it open," thus allowing all six empty shells to fly out of the cylinder. Beretta has improved upon the 19th-century original by reinforcing the top latch, thus making the revolver much more durable and ensuring you years and years of trouble-free enjoyment.

PISTOLS

90TWO

90TWO

The revolutionary Beretta 90two pistol introduces new improvements to form, fit and function while maintaining the integrity and reputation of its predecessor, the legendary Beretta 92/96 Series. Featuring a technopolymer removable single-piece wraparound grip in two sizes (standard and slim), increased magazine capacity, internal recoil buffer (softer shooting, less felt recoil), captive recoil spring guide assembly and quick assembly feature, the 90two has evolved to individually fit the hand of each operator, while maintaining accuracy and reliability.

The 90two comes with a large array of safety features:

90two Type F. Double/single action. Ambidextrous manual safety on the slide with hammer decocking function, automatic firing pin block safety.

90two Type G. Double/single action. Ambidextrous manual lever on the slide with hammer decocking function with the return of the lever to the firing position, automatic firing pin block safety.

90two Type D. Double action only. Without manual safety-hammer decocking. The spurless hammer, after each shot, returns to the decocked position. Automatic firing pin block safety.

87 TARGET

87 TARGET

The 87 Target is a .22LR single-action pistol designed for practical shooting and training. The 6" (150 mm) long barrel is covered by a lightweight alloy sleeve that accepts optical sighting systems (Weaver interface). The sights are adjustable, and the magazine features a sturdy rubber pad. The frame has a bevelled part for the easy insertion of the magazine. Standard grips are plastic, however walnut grips are available on request. Trigger pull is very light and crisp. The pistol is designed to remain upright when set down on a flat surface, ready to be quickly gripped, magazine loaded and raised to the target (.22LR Practical Shooting).

PISTOLS 92

92FS

From the jungle heat of Panama to the sandstorms of Iraq, the U.S. Armed Forces have counted on Beretta pistols for almost two decades of distinguished service. The 92FS, Beretta's premier full metal gun, most resembles the military M9 9mm pistol. Accurate out of the box, this workhorse features an open slide design that virtually eliminates jamming, a safety system that combines decocking with a positive thumb safety, and a combat muzzle crown. Beretta's proprietary black, non-glare Brunton finish gives your 92FS a wear-resistant coating, which means it will stand up to any special duty.

92FS INOX

The slide, barrel and many other key components of 92 FS Inox are made with stainless steel. The alloy frame is anodised to match perfectly the colour and finish of inox parts. The rubber grips come with a stippled texture and hex key grip screws.

.22 LR PRACTICE KIT

Build your shooting skills with the optional .22 conversion practice kit for the 92FS. It's easily installed and removed.

92 STEEL-I

The Beretta Steel-I is the synthesis of the long-standing experience made with the model 92 and reconfirms Beretta's attention to steel framed semiautomatic pistols. Designed with extreme care to detail, the Steel-I is created with true connoisseurs, expert marksmen and collectors in mind. The pistol is available in calibres, in the traditional single/double action version. The exclusive Steel-I model sports numerous special features, like the frame manufactured with high resistance steel, an ergonomic vertical grip also suitable for small handed shooters, a slide widened near the slide rails, an ambidextrous frame mounted safety lever, a skeletonised hammer to reduce lock time. The Beretta Steel-I pistols are qualified to compete in the IDPA competitions.

OPTICS

The eye is the most significant window to the world. Only visual perception has the power to leave the clearest, most indelible impression on our mind. We decide to which extent we are effected by the mysteries of the world surrounding us.

Burris makes tools that let you take in every detail. Binoculars engineered clear and powerful to penetrate the twilight. Superb spotting scopes that get you up close and personal with the most elusive game. Rugged rifle scopes so precise, long-range shots become second nature. All at prices that won't damage your financial environment.

Open your eyes to exceptional performance and value.

Mother Nature reveals her most intimate secrets at first light. Deer on the move. The bravado of a rutting Red as challengers approach. Ducks preening in the mist. The breath of a bedded Sambar deer. Look closely. It's all there. You just have to see the light.

Burris makes tools that let you take in every detail. Binoculars engineered clear and powerful to penetrate the twilight. Superb spotting scopes that get you up close and personal with the most elusive game. Rugged rifle scopes so precise, long-range shots become second nature. All at prices that won't damage your financial environment.

See the light at a Burris dealer near you.

Our customers tend to be pretty hardcore. They're the guys who eat, sleep and breathe hunting. Guys who would never let a little thing like pouring rain or sub-freezing temperatures put a damper on a hunt.

Dawn-to-dusk hikes in brutal terrain. Hours of glassing. Wet feet. Cold coffee. No problem. They simply come with the territory.

To these guys, there's nothing better than fresh tracking snow, a breeze in their face and a rifle that will put bullets on the money from one post code to the next. Which is exactly why they choose Burris optics.

We share their passion. We've been there, done that. And it shows in every riflescope, binocular, and spotting scope we make.

To build a Burris scope, we start with some of the world's best glass, then grind and polish it to exacting tolerances. We index-match our HiLume® multi-coating to every lens so each surface transmits 99.5% of the light.

That optical excellence makes a huge difference in the critical half-light of dawn and dusk.

We assemble those lenses in the toughest 6061T6 aluminium outer tubes made. Double spring tension secures the internal tube. All adjustment systems are positive, repeatable, steel-on-steel, with audible clicks. That translates to unfailing shot-to-shot accuracy, no matter how hard you hunt or how heavy a magnum you shoot.

Every molecule of moisture is purged from the scope by injecting it — 24 times to be exact — with laboratory-grade dry nitrogen. Once the moisture is gone, Burris-exclusive quad seals make sure it stays gone.

For life.

We manufacture most of our products in the USA, in our own factory. We're sticklers for detail — maybe even a little obsessive. We back most of what we make with a Forever Warranty.™ Our customers head for the hunting grounds confident that their optics will deliver all the performance they paid for.

Okay. We admit it. We're pretty hardcore when it comes to how our riflescopes and other optics perform. But our customers wouldn't have it any other way.

SEE THE LIGHT™

BLACK DIAMOND™ RIFLE SCOPES

Engineered specifically for the rigors of long range shooting, Burris started with a 30mm tube then added multi-coated optics precision-ground from superior glass. The end product is a scope that delivers extraordinary sharpness, contrast and clarity that out-shines even high dollar European scopes.

4X-16X-50MM

6X-24X-50MM

8X-32X-50MM

LASERSCOPE™ RIFLE SCOPES

The new Burris LaserScope doesn't look like a conventional rifle scope. But then there's nothing conventional about how it performs. With premium quality 4X-12X Burris optics at its core, you can depend on a bright, crisp, and extremely clear field of view. Packed with state-of-the-science micro-circuits and precision beam splitter, the advanced laser rangefinder is at minimum, the equal to any stand-alone unit. But hard hunting and magnum recoil will not stifle its performance. The Burris legacy of unfailing shot-after-shot accuracy continues.

Even with the superb optics and leading edge rangefinding performance, the most amazing feature of the LaserScope is its affordable retail price.

4X-12X-42MM

EURO DIAMOND™ RIFLE SCOPES

Feature for feature, the stunning Euro Diamond™ Rifle Scopes deliver optical performance virtually identical to higher priced, ultra-premium scopes. Engineered with a proprietary light management system, precision-ground optical glass, Euro Diamonds provide a level of sharpness well beyond what the human eye can process.

By utilising Posi-Align Offset Inserts in Signature Rings, you can virtually sight-in your gun without moving the scope adjustments. By keeping the internal optics centred, you'll see through the scope all of the clarity, sharpness, and brightness that the optics designers intended for you to see. The offset inserts also correct for any misalignment caused by receiver holes drilled off centre, or the bases or rings being slightly off perfect centre. And for you 1000-yard shooters, the need for expensive tapered bases or shimming becomes a hassle and expense of the past.

Solid Steel Rings

You could buy a pair of Burris solid steel rings purely for their beauty. But it's their absolute, unflinching strength that will earn your respect. Each ring is machined from a solid block of steel to exacting tolerances. The top and bottom are performance-matched.

HY-SKOR

At Beretta Australia we are all shooters, exactly like you. We share your same passion, we feel the same enthusiasm and we look after our guns as you do, with great respect and care. We know the importance of a well-constructed, sturdy and resistant safe, which is at the same time able to look great and fit any environment.

When it comes to quality and safety we accept no compromises: that is why we decided to bring HY-SKOR back. This time we offer even more: every safe incorporates the revolutionary Swing 'N' Slide locking mechanism, widely known for being the safest on the market.

We are proud to say that there is no safer place than a HY-SKOR safe!

HS1

Safest small Gunsafe on the market.

HS2

Great value for money in this 60 Kg safe able to store up to 6 guns.

HS3

When looks do matter, HS3 is your best bet!

HSCHI

Over 150 Kg, no bolting down required.

HSCH2

The biggest safe in the line and the biggest safe on the market.

HSFR1

Fire resistant and weighs 300 Kg.
You won't find anything better!

APPAREL & ACCESSORIES

WATERFOWL XTREMA GEAR- WATERPROOF

Xtrema Gear is Beretta's collection of bags designed especially for waterfowl hunting. Built to take what nature dishes up, the bags are sealed on the outside to keep the insides dry. The brushed, 800-denier polyester fabric is coated with polyurethane and RF welded together to be tough, quiet, and waterproof. And they even float — what more could you want?

The Original Super-Sling® Family are the World's Best Selling Slings, earning The Outdoor Connection the unique distinction of being called "The Sling Company".

The creation of The Original Super-Sling began in 1983, in Waco, Texas, when Floyd Hightower developed the innovative wide sling that is adjustable with one-hand. Being an avid hunter and shooter himself, he wanted to create a sling that would help hunters improve their marksmanship while providing a safe and comfortable carrying strap. On the weekends, Floyd assembled the slings in his garage, and on the weekdays he would drive from dealer to dealer selling the slings. This marked the beginning of The Original Super-Sling Family with the patented feature known as the Rapid One-Hand Adjustment™.

MUZZLEMATE®

MuzzleMate is the easiest, fastest way to clean all of your firearms barrels safely. It eliminates the exposure to hazardous solvents, patches and odours. Fits rifles, pistols, shotguns and can be used with all types of cleaning tools.

Code: MM0316

**The ONE SIZE FITS ALL
Firearm Cleaning Shield.**

CLAMP IT ON AND CATCH THE MESS!

EAR PAL

Electronic Earmuffs EM501

EarPal EM501 takes care of your hearing and protects you from noises that exceed 85dB. The stereo quality sound in both ear cups amplifies weak tones while eliminating noises above 85dB. EarPal EM501 is your ideal companion on the shooting field and in all loud environments including airports, factories and car racing circuits.

Earmuffs EM101

EarPal PM101 takes care of your hearing and reduces noises 15-30dB to protect your ears from loud sources.

The ultimate hunting tool has finally arrived.

Predator Evolution XR operates 24/7 in those special areas where you hunt to help you scouting and monitoring your prey movements. It features high resolution day/night video clips (up to 30 sec.), 2.0 Megapixel colour images during the day and 1.3 Megapixel B&W images during the night, all glass lenses for superior clarity and a 3.5" touch screen that displays four split images at one time also allowing to highlight any image.

Exclusive to Beretta Australia

- Additional new software able to transfer images from CFC (Compact Flash Card) to USB.
- Automatic changeover from day to night
- Ability to lock the image/recordings to prevent accidental deletion!
- Extended battery Jack.

KICK-EEZ® carries a wide selection of shotgun recoil pads designed to meet all your shooting needs. **KICK-EEZ®** recoil pads are ideal for hunters, recreational and competitive shooters. **KICK-EEZ®** recoil pads are made of Sorbothane® which is scientifically proven to be the finest cushioning material available!

Sorbothane® maintains stability and damping over a broad temperature range, enabling it to isolate damaging vibrations and impact shock in varied conditions (Sorbothane® is also used by NASA as an Isolator to protect shuttle cameras from violent forces during lunches). Its near faultless memory ensures a return to original shape, even after repeated compressions.

This is the reason we can confidently state that our recoil pads are the very best shotgun recoil pads on the market today! In fact, a test recently conducted by Experimental Services, Inc.* from Akron Ohio, proved **KICK-EEZ®** claim — of all the models tested, the three highest rated were **KICK-EEZ®** recoil pads. The wide range includes: Pre-Fit Recoil Pads, Grind-To-Fit Recoil Pads and Slip-Over Recoil Pads to suit the most diverse needs.

With market research for components on the international markets, with highly dedicated and specialised personnel, with over 100 years of loading experience and the assistance of the most advanced technology available, RC cartridges have to be considered the best cartridges in the World. Part of the Beretta Australia family since 2000, RC cartridges have accompanied several Champions to the Olympic Podium, including Australian Gold Olympic Medallist Russell Mark.

The RC range includes Game Loads, Competition Loads, as well as Special Steel Loads, perfect for waterfowl shooting.
