WWW.BERETTAUSA.COM

The Beretta legacy of craftsmanship and innovation dates back to 1526. Since then, its firearms, clothing and accessories have continued to define the art of hunting and shooting, creating new traditions in quality for each generation. A direct reflection of this heritage, the new product introductions for 2004 are no exception:

- 687 Silver Pigeon III & V
- A391 Xtrema 3.5 Max 4 HD
- Stampede Inox & Stampede Marshall
- U22 Neos Carbine Kit
- 92/96 Steel I
- Cougar Inox
- DT10 Trident L Sporting
- T3 Varmint & T3 Tactical
- Sako 75 Models in 270 & 300 WSM
- Beretta Hunting & Shooting Clothing
- Beretta Knives & Shooting Accessories

In this catalog you will find the Beretta products that are currently offered for sale in the USA. We encourage you to visit a Beretta dealer near you to see their selection of products available.

Visit www.berettausa.com or call 1.800.528.7453 to find the Beretta dealer nearest you. Dealers listed on our website with the following Dealer Showcase symbol  offer the widest range of firearms, clothing and accessories.

Note: Prices and specifications in this catalog supersede all previous publications and are subject to change without notice.

Note: Beretta USA UPC ID Number is 0-82442.

THE WORLD OF BERETTA - AN INTERNATIONAL LEGEND

Published to celebrate the 475th Anniversary of the world's oldest gunmaker and oldest industrial firm, "The World of Beretta – An International Legend" is a fascinating 400 pages-plus journey through the unique history and culture of Fabbrica d'Armi Pietro Beretta S.p.A.

World-renowned firearms and engraving expert R.L. Wilson guides us through ten scintillating chapters, fully illustrated with over 380 photographs, plus drawings, paintings and engravings. As well as showcasing the development of the company's innovative firearms throughout the generations, this comprehensive work also provides a rare, intimate glimpse into the proud Beretta family.

Please see page 141 for more information.

DEALERS

The following pages list dealers that stock Beretta products. Dealers marked with an asterisk (*) are Beretta Showcase Dealers. These showcase dealers carry the widest selection of Beretta products. We encourage you to visit the one nearest you and welcome to the World of Beretta.

FIELD GRADE SHOTGUNS

To some hunters a Beretta is a far off goal. It is what we will own when we have arrived at the pinnacle of success. To others, Beretta shotguns should be a collection that belongs in a glass case cradled in crushed velvet. While it is true that few match the fine workmanship of a Beretta, there is also no shotgun more deserving of a day in the field.

Beretta's line of field guns has the perfect shotgun for any shooter. From the unmatched value of the Onyx series, to the hard-hitting power of the Xtrema, to the amazing detail of the Diamond Pigeon, Beretta has the shotgun that is right for any hunter.

FIELD GRADE OVER-AND-UNDERS

ONYX SERIES—WHITE ONYX

Onyx is one of Beretta's most versatile shotgun lines, and includes something for every style of hunting, whether it's quail with a 28-gauge or geese with a 3½" 12-gauge. The White Onyx has a satin nickel frame, accented with Beretta's Dura-Jewel machining. It features a gloss-finished select walnut stock with a Schnabel fore-end and classic

two-point diamond cut checkering. The Onyx Pro 3.5 12-gauge has a heavy-duty all-matte finish. Rugged, attractive and with the prestige of the Beretta name, Onyx means value for the American hunter.

WHITE ONYX
J6862K6

The natural metal frame offers the distinctive dura-jewel design for a uniquely classic look.

Beretta over-unders are known for their slim, low profile receivers that let the shotgun rest low in the hands for better pointability.

The action is closely inletted into the walnut stock for beauty and durability.

ONYX SERIES—WHITE ONYX

**Fit, Feel and Function...
in Every Beretta Shotgun!**

STREAMLINED ERGONOMIC STOCK DESIGN that ensures comfort, natural feel, perfect eye-hand coordination and fast target acquisition. A Beretta shotgun adjusts to you, not the other way around.

TOP MOUNTED LOCKING LUG DESIGN creates a lower profile receiver for perfect barrel alignment with hand and eye, aiding instinctive mount, swing and follow through. This unique Beretta design improves ergonomics, reduces felt recoil and muzzle rise and makes the shotgun a true extension of the shooter. The conical wedge locking lugs are self-adjusting, increasing tightness of the closure with every round fired.

LOW PROFILE BOX LOCK DESIGN allows Beretta's 12 gauge over-and-under receiver to be as compact and light as many competitor's 20 gauge receivers.

HAMMER FORGED STEEL, CHROME LINED, ULTRA-CONCENTRIC BARRELS combine effortless balance, strength and resistance to corrosion and residue build-up. Bore and chamber are chrome lined for durability. Barrels can be interchanged, easily and economically, between gauges, to maximize versatility.

THE VAULT-LIKE BOX LOCK RECEIVER is constructed with walls twice as thick as other competitors, and is completely enclosed to prevent dirt from entering the working mechanism. Machined from solid steel alloy forgings for durability, the receivers tight tolerance ensures that the gun does not fall open when loading and reloading.

ONE-PIECE, SPRING-LOADED EJECTORS have fewer moving parts to ensure simplicity of operation and allow slimmer fore-end design that doesn't interfere with instinctive grip or hand-eye coordination.

MINIMAL AND EASY MAINTENANCE Though most field guns will never be used enough to require refurbishing, the unique Beretta receiver design, perfected over millions of rounds fired in competitive target shooting, allows for easy and affordable replacement of components susceptible to wear, such as the hinge pins and conical locking lugs. Easy access to all parts is guaranteed for cleaning and replacement.

	WHITE ONYX
Action	Low profile, improved box lock
Gauge	12, 20, 28
Chamber	3"
Wood Finish	Gloss
Stock/Fore-end	Walnut, checkered
Stock Drop - Comb	1.50"
Stock Drop - Heel	2.36"
Recoil Pad	Full black rubber

Sight	Metal front-bead
Weight	6.7 lbs (12-Gauge)

MOLDED CASE INCLUDES:

- 5 Choke Tubes
- Choke Tube Wrench
- Sling Swivels
- Beretta Oil
- Butt Plate or Recoil Pad

FIELD GRADE OVER-AND-UNDERS

ONYX SERIES—ONYX PRO & ONYX PRO 3.5

Many hunters would like to use an over-under in the field, but fear damaging fine woods and metal finishes. That's no excuse with the Onyx Pro Series. These guns are every bit as rugged as they are beautiful: they can take the harshest environment all day and still gleam in the gun rack when you've cleaned them.

The key is Beretta's exclusive X-tra Wood, an all-over synthetic waterproof film that covers the stock wood, both protecting it and providing a dramatic grain pattern. The butt stock is fitted with a recoil-killing Gel-Tek Pad, while the fore-end is a comfortably husky beavertail.

DIAMOND-PROFILE CUT CHECKERING

ONYX PRO
J6862A6

X-tra Wood and a lustrous frame finish make the Onyx a striking example of the gunmaker's art. As with the White Onyx, the Onyx Pro offers Dura-Jewel enhancements.

Beretta's proven combination of tang safety and barrel selector puts you fully in control.

Molded Case Includes:

- 5 Choke Tubes
- Choke Tube Wrench
- Sling Swivels
- Beretta Oil
- Butt Plate or Recoil Pad

MODEL	CAT. CODE	UPC CODE	GAUGE	BARREL	CHOKE*	MSRP

*See page 46 for choke tube information.

ONYX SERIES—ONYX PRO & ONYX PRO 3.5

The Onyx Pro frame is blued, with Beretta's Dura-Jewel machining accenting subtle markings and a gold trigger.

The barrels are fitted with extended Mobilchoke tubes for fast switches when hunting conditions change. Five tubes are supplied with each Onyx Pro shotgun: full, improved modified, modified, improved cylinder and cylinder. Onyx Pro—take it anywhere!

The recoil reducing Gel-Tek pad keeps your shoulder fresh through hundreds of rounds.

TruGlo® sight and extended Mobilchoke tubes.

X-Tra Wood gives your shotgun the look of premium walnut, with the durability of a synthetic stock.

TRUGLO
WHEN BRIGHTNESS COUNTS™

The following program is applicable to the original owner of any Beretta X-Tra Wood finished shotgun purchased in the United States during 2003 and 2004 (Onyx Pro and Teknys series only).

Beretta USA will replace or refinish, at its sole discretion, any X-Tra Wood stock and/or fore-end that has been damaged superficially by the original owner of the shotgun. The program will not cover modified stocks or fore-ends. All specialized stock hardware (recoil pads, cheekpieces, adjustable combs, Morgan pad systems, etc.) will be returned to the owner. Beretta will install only factory original stocks & fore-ends.

The charge for this service is:

\$199.00 for the Teknys Semi-Automatic

\$249.00 for the Onyx Pro Over-and-Under

Includes fitting charges to over & under shotguns.

The refurbishment program is valid for a period of three years from the date of purchase only if the owner returns the Beretta "1+2" Warranty card to Beretta USA (or registers online at www.berettausa.com).

After this three-year period, or if the owner does not enroll in the "1+2" Warranty, Beretta USA will charge standard parts & labor charges in effect at the time of the refurbishment request.

This program does not replace or invalidate any portion of Beretta USA's existing warranty policy.

The customer is responsible for the delivery of the shotgun to Beretta USA. Beretta USA will pay for the shipping costs associated in returning the shotgun to the customer. This program may be canceled at any time, without prior notice, by Beretta USA and is valid only in the United States.

If you have any questions about this program, please contact Beretta USA's Customer Service Department at 800-636-3420. Wood Refurbishment Program.

PIGEON SERIES — SILVER PIGEON S & SILVER PIGEON S COMBO

The Silver Pigeon S marks the dividing line between Beretta's more economical double guns and the highly decorated luxury models. While popularly priced, it offers the aesthetics and materials of the premium over-unders. The frame has extensive, but refined, floral and scroll decoration that will make this shotgun a source of pride for years to come.

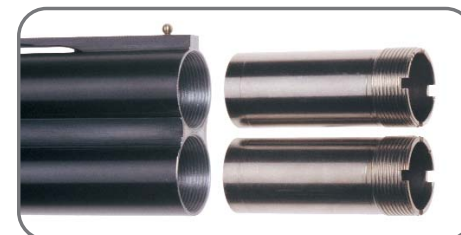

It has the same dual-cone locking mechanism that lets Beretta over-unders stand up to years of constant shooting and to be passed on from generation to generation. Placing the locks between the barrels allows a low frame profile that gives Beretta over-unders an unmatched lively feel and natural pointability.

SILVER PIGEON S
J686S10

Attractive scroll and floral decoration distinguish the Silver Pigeon S.

The Mobilchoke field set gives you a choke for every range.

The trim proportions of the Beretta frame make this gun a classic.

The Silver Pigeon S has the decoration one might expect in a more costly shotgun.

PIGEON SERIES—SILVER PIGEON S & SILVER PIGEON S COMBO

As befits a field gun that will be used in exciting hunting situations, the safety is automatic, resetting each time the Silver Pigeon is opened for reloading. Select the top or bottom barrel to fire first by sliding a catch inside the safety button. A set of five Mobilchoke tubes comes with the gun: full, improved modified, modified, improved cylinder and cylinder bore.

Your Silver Pigeon S will travel in style and security in a lockable molded plastic case that has recesses for choke tubes, choke tube wrench, Beretta Oil and other accessories.

It has integral handles on the side and end to make handling easy, whether you're loading it in the car for a local dove hunt or driving to South Dakota for a week of pheasant hunting.

Select 12-gauge or 20-gauge models, both with 3" chambers, or the fast handling 28-gauge with a 2³/₄" chamber. The 26" barrel is ideal for hunting species like grouse or woodcock that stick to heavy cover, while the 28" barrel is the classic all-around length. Combo offers a 20-gauge with 26" and 28-gauge with 28" barrels.

PIGEON SERIES — SILVER PIGEON II & SILVER PIGEON II COMBO

The Silver Pigeon II features deep relief etchings of hunting scenes, along with an oval inlay in the buttstock for engraving the proud owner's initials. Choose your Silver Pigeon II in 12-, 20-gauge or a combination package that combines the 20- and 28-gauge with 28" barrels. The 12- and 20-gauge barrels have 3" chambers.

The oil finish stock is of select walnut, with a tasteful and traditional Schnabel at the fore-end tip. A subdued black rubber recoil pad soaks up the recoil of this trim (6.8 pounds) field

gun. As befits a gun destined for hunting in the field, the safety is automatic, with the barrel selector inlet into the safety button.

A high-impact molded carry case has compartments for five choke tubes, choke tube wrench, sling swivels, spare recoil pad and Beretta oil.

SILVER PIGEON II
J687105

Bold game scene engraving separates the Silver Pigeon II from other shotguns.

Game scenes with floral borders make the Silver Pigeon II stand out in any company.

PIGEON SERIES — SILVER PIGEON III

NEW

If you're looking for a gun that's a bit more distinctive than the Silver Pigeon S or Silver Pigeon II, while staying in the moderate price range, try the new Silver Pigeon III. It has all the features of the S and II, but with more extensive floral and scroll decoration and hunting scenes on the frame. The 12-gauge features ducks in flight and flushing pheasants, while the smaller bores feature quail and woodcock engraving.

Choose a 12- or 20-gauge Silver Pigeon III, and if you already own several Beretta 12- or 20-gauge shotguns, why not try the trim and racy 28-gauge, made on its own properly-scaled frame. All Silver Pigeon III models come with Beretta's Mobilchoke screw-in tubes that prepare you for any hunting challenge. While the Silver Pigeon III includes a classic front metal bead (installed), TruGlo front sights and a Gel-Tek recoil pad are also supplied with the Silver Pigeon III.

NEW

SILVER PIGEON III
J6871G8

Like a beautiful painting on canvas, the Silver Pigeon III's sideplates are exquisitely engraved with game scenes of ducks in flight on the 12-gauge, and quail and woodcock on 20- and 28-gauge.

Highly embellished floral and scroll engraving adorns the bottom of the Silver Pigeon III's receiver and trigger guard.

PIGEON SERIES — SILVER PIGEON IV

Beretta shotguns are carried with pride on every continent. Once in a while, though, Beretta offers a gun strictly for the American hunter, and the Silver Pigeon IV is the latest example. In contrast to most Beretta over-unders, it has a rich black frame, accented by gold inlays that reflect the typical quarry for each gauge. The 12-gauge features duck and pheasant,

while quail and grouse take flight on the 20- and 28-gauge models. A hand-filled beavertail fore-end caters to traditional American tastes. It's a striking gun that stands out—even among other Berettas.

SILVER PIGEON IV
J6871A6

The rich black frame is accented by gold inlays of game birds in flight.

PIGEON SERIES — SILVER PIGEON V **NEW**

There's a new heart of the Silver Pigeon line — the Silver Pigeon V. Admiring fellow shooters will immediately notice the unique Beretta Color-Case frame. Beretta's exclusive process gives steel the classic look of color-casehardening, but with modern durability. When combined with extra-fancy oil-finished walnut and gold game inlays, the Silver Pigeon V will get noticed in any hunting field.

Choose a 12-gauge, inlaid with pheasants and mallards, or a 20- or 28-gauge version, decorated with quail and grouse. The 28-gauge has a properly-scaled frame for perfect proportions, weight and handling. All versions are provided with a TruGlo Tru-Bead front sight that will draw your eye to the target in every lighting condition.

NEW

PIGEON SERIES — SILVER PIGEON V

For maximum security in the hunting field, the safety is automatic, with the barrel selector conveniently inset into the safety button. This prestigious hunting arm will last generations, thanks to Beretta's dual-cone locking system, which compensates for years of wear. Your Silver Pigeon V will be well-protected in a high-impact molded carrying case, which has compartments for choke tubes and other accessories.

When you're ready for the finest in a hunting shotgun, you're ready for the Silver Pigeon V.

BERETTA COLOR-CASE FINISH MAKES THE SILVER PIGEON V the most distinctive member of the Pigeon series. It has the look of color-casehardening, but will last through decades of heavy use.

FIELD GRADE OVER-AND-UNDERS

ULTRALIGHT SERIES — ULTRALIGHT & ULTRALIGHT DELUXE

When game trails are long and terrain is rugged, every ounce comes to tell as the hours pass. If you're the sort of hunter who stays on the trail until dark, day after day, you need the Beretta Ultralight. At just 5.75 pounds, the Ultralight is a 12-gauge that carries like a smallbore.

The key to the Ultralight's feathery feel is a light but strong aluminum frame, reinforced at the breech face and shoulders with hard, durable titanium. These lightweight alloys, combined with a standard-diameter Mobilchoke tube barrel, keep weight to the very minimum while preserving the smooth, sure handling you expect from a Beretta.

ULTRALIGHT
J687559

A light but sturdy aluminum frame, reinforced with titanium gives the Ultralight its feathery feel.

A standard-diameter Mobilchoke barrel helps keep weight to just 5.75 pounds.

The Ultralight is a 12-gauge that carries like a smallbore.

MOLDED CASE INCLUDES:

*See page 46 for choke tube information.

ULTRALIGHT SERIES—ULTRALIGHT & ULTRALIGHT DELUXE

The Ultralight has a semigloss-finished walnut stock with a Schnabel fore-end. Its receiver is tastefully decorated with the sort of game birds a hunter might pursue with Ultralight in hand—quail and woodcock.

For the hunter who wants an even more distinctive shotgun, the Ultralight Deluxe adds highly figured oil-finished walnut and gold inlays on either side and the bottom of the frame, complimented by full floral engraving. With the Ultralight Deluxe, you'll take on the hardest cover in high style!

ULTRALIGHT DELUXE
J687575

WHY LOW PROFILE?

Beretta's box lock mechanism allows a lower profile receiver. This benefits the shooter's accuracy allowing the hand and eye to be more closely aligned.

The Ultralight Deluxe offers an oil-finished walnut stock and gold inlays on the frame sides and bottom.

FIELD GRADE SIDE-BY-SIDES

471 SILVER HAWK

Beretta leads the world in over-under shotguns, but a certain breed of hunter demands the special handling of a classic side-by-side game gun. For that shooter, Beretta presents the 471 Silver Hawk. Combining half a millennium's worth of design skill and craftsmanship with the latest in materials and finishes, it is a hunting arm that is both beautiful and rugged.

The frame is made of a steel alloy rich in nickel, chromium and molybdenum for beauty and durability. Extensive scroll and leaf engraving and a gold-inlaid hawk's head on the top lever make the 471 Silver Hawk a prestige item you'll be proud to carry in any company.

The 12-gauge Optima-Choke tubes improve on-target performance by subjecting the shot charge to a smooth, gradual constriction as it passes through the tube.

The 20-gauge gun has conventional barrels with Mobilchoke tubes. Regardless of gauge, barrels are joined to the monobloc by a sophisticated laser system that creates the strong, secure Beretta Block. If you demand the fast handling of a classic game gun, try the 471 Silver Hawk.

471 SILVER HAWK
J471210

Receiver is beautifully adorned with exquisite engraving.

Innovative ejection/extractor system selector.

Classic diamond accents enhance the Silver Hawk fore-end.

471 EL SILVER HAWK

The 471 EL combines the innovation of the 471 Silver Hawk with lines and finishes that recall the best of a bygone era. The classic English-style butt stock and splinter fore-end are made

of oil-finished select walnut. Case-hardened sideplates are decorated with eye-catching gold inlays. If you want a gun that exudes traditional style and class, this one's for you.

471 EL SILVER HAWK
J470335

The sideplates are attached without visible screws, giving the master engraver an unobstructed canvas.

CONSERVATION OVER-AND-UNDERS

686 COVEY & RINGNECK

Beretta has for many years had a commitment to sound game management throughout the world, and in this country it shows that dedication by supporting conservation groups like Pheasants Forever and Quail Unlimited. A portion of the purchase price of these special shotguns will be donated to the appropriate organization. A maximum of 750 guns in each gauge will be sold worldwide. The 686 Ringneck offers extended chokes and is available

in 12- and 20-gauge versions, while the 686 Covey is a fast-swinging bird gun in 20- and 28-gauge models. Gold-filled pheasants or quail take flight against a gloss black receiver, while the buttstock and schnabel fore-end are gloss-finished select walnut. Even the carrying case will show your true colors: each is marked with the Pheasants Forever or Quail Unlimited logo.

686 COVEY
JS68606

A portion of the price of every Covey or Ringneck model goes to support game bird conservation.

MOLDED CASE INCLUDES:

- 5 Choke Tubes
- Choke Tube Wrench
- Sling Swivels
- Beretta Oil
- Butt Plate or Recoil Pad

AL391 RINGNECK & COVEY

Pheasants Forever and Quail Unlimited supporters who prefer an autoloader now have their own Covey and Ringneck versions of the AL391. Only 1,000 of each will be marketed worldwide, making these guns very exclusive expressions of your commitment to game conservation. The Covey is a 3" 20-gauge with Mobilchoke tubes, while the 3" 12-gauge Ringneck has an Optima-Bore overbored barrel with Optima-Choke tubes. It also features

a Gel-Tek recoil pad for shooting comfort. Both guns feature gold-filled game bird engraving and select walnut stocks. The supplied carrying case bears the Pheasants Forever or Quail Unlimited logo: no one will doubt that you support habitat preservation and sound management for America's greatest upland game.

AL391 TEKNYS

Nickeled frames have been a popular feature of double guns for many years. The AL391 Teknys has adapted that look with the proven self compensating system of the Urika family. If previous autoloaders just weren't distinctive enough for you, Teknys is your gun! Its silvery receiver is ornamented by graceful lines that blend seamlessly into the curves of the stock, which has its own distinctive checkering pattern. The receiver top is matte-finished to reduce glare, contrasting attractively with the polished sides and golden trigger.

AL 391 TEKNYS

The trigger guard is made of glass-reinforced technopolymer, a modern material that is self-lubricating, warmer feeling to the touch in cold weather, and colored through and through. Trigger guards are a typical wear point for traditional blued guns; the Teknys guard will retain its appearance through years of use in the toughest weather. As its name implies, the Teknys combines the best of modern engineering and materials science with the centuries-old Beretta tradition of craftsmanship and design excellence.

AL391 TEKNYS
J391T18

Both style and substance define the Teknys with lines and materials that stand out from the crowd.

Wood
X-TRA

See page 15 for X-Tra Wood Program details.

TRUGLO
WHEN BRIGHTNESS COUNTS™

Two interchangeable fibers are supplied and can be easily switched to fit the hunter's personal preference.

Beretta's self-compensating gas system means no O-rings or pistons to adjust when switching loads. This proven gas system diverts gas out a vent at the bottom tip of the fore-end to provide just the right pressure to cycle the gun.

AL391 TEKNYS

The distinctive Teknys receiver is complemented by Beretta's X-tra Wood waterproof wood enhancement process. An X-tra Wood stock has the look and grain pattern of premium-grade walnut, but with weather resistance that approaches synthetic stocks. The stock looks right at home with the luxurious Teknys metal work, but you won't be afraid to take it out in the harshest conditions (for more on X-tra Wood, see page 15). The butt stock of the 12-gauge model is recessed to accommodate a Beretta recoil reducer that is a little brother of the unit that helps tame 3½" 12-gauge recoil in the A391 Xtrema 3.5. A patented Gel-Tek recoil pad dampens recoil even more. You can personalize the fit of your Teknys with a set of stock spacers that allow adjustment of drop and cast.

All 12-gauge Teknys shotguns are fitted with Beretta's Optima-Bore overbored barrels for recoil reduction and more even pattern distribution. Five Optima-Choke flush tubes, ranging from cylinder bore to full choke are supplied with each gun. A TruGlo Tru-Bead fiber optic luminous front sight comes with two interchangeable colored fibers to adapt the Teknys to any target background. This distinguished field gun is presented in a fitted, lined polypropylene case that keeps all the gun's many supplied accessories in their places. If you've wanted an autoloading shotgun that makes a personal statement in any company, examine Beretta's AL391 Teknys—it will satisfy the most exacting requirements.

FIELD GRADE SEMIAUTOMATICS

AL391 TEKNYS GOLD

To meet the requirements of the most discriminating autoloader fan, Beretta offers the AL391 Teknys Gold. This distinctive sporting arm features a select oil-finished walnut buttstock and fore-end, with attractive and unique green enamel inlay at the wrist that continues the curvilinear theme of the receiver. The polished side panels are complimented by deeply engraved hunting scenes, while the receiver top is matte-finished for a glare-free

sighting plane. The bolt and shell carrier are engine-turned for a jeweled look that complements the decoration. The Teknys Gold is not just for looks, either: it will cycle ammunition ranging from feathery target loads to thumping 12-gauge 3" magnums. When you're shooting the hardest-kicking 12-gauge ammo, install the 8.5-ounce recoil reducer: it's a smaller version of the Spring-Mass system used in the A391 Xtrema 3.5.

AL391 TEKNYS GOLD
J391T36

TRUGLO

AL391 TEKNYS GOLD

Recoil control is a priority of the other end of the Teknys Gold, with Beretta's Optima-Bore overbored barrel that softens recoil and improves pattern performance. Five flush Optima-Choke tubes are supplied: cylinder, improved cylinder, modified, improved modified and full. A TruGlo Tru-Bead fiber optic luminous front sight tops the floating ventilated rib. Two interchangeable fibers are supplied to make the Tru-Bead stand out against any

background. The select walnut buttstock is attractively capped by a Gel-Tek recoil pad and can be adjusted for drop and cast with a supplied kit of spacers. A gun this good needs to be protected, and the AL391 Teknys Gold is presented in a fitted, lined polypropylene case that has compartments for all the accessories that are included with the gun. The Teknys Gold brings unmatched design and prestige to the shooter who prefers an autoloading shotgun.

**MOLDED CASE INCLUDES:**

- 5 Choke Tubes
- Choke Tube Wrench
- Sling Swivels
- Beretta Oil
- Butt Plate or Recoil Pad

AL391 URIKA

This is the workhorse of the Beretta autoloading line; the AL391 Urika is available in a configuration that will answer any hunting challenge. Whether you like your shotgun in basic black or in the most up-to-date and effective camouflage pattern, there's a Urika for you. All AL391s have in common a self-compensating gas system that allows them to digest everything from the lightest target loads (guns with 28" barrels can even function with subsonic ammo) to the heaviest 2-ounce magnums. Beretta's well-proven self-compensating gas system diverts excess gas out a vent located on the bottom of the fore-end, just behind

the magazine cap. By venting the gas below the fore-end, the finish is not damaged nor does gas vent towards the shooter's face. The self-compensating gas system will provide just the right pressure to function the gun. The result? A smooth-shooting, long-lasting auto shotgun whose watchword is versatility.

All 12-gauge Urikas are fitted with Beretta's Optima-Bore overbored barrels and flush Optima-Choke Plus tubes. Five tubes are provided with each gun: cylinder, improved cylinder,

AL391 URIKA

modified, improved modified and full. The Optima-Bore system reduces recoil and improves pattern performance by easing the shot charge's passage from cylinder to bore, limiting pattern-destroying shot deformation. The hammer-forged barrel is chrome-lined for corrosion resistance and easy cleaning, and lengths range from 24" for turkey hunting to 28" for doves and waterfowling. All wood-stocked Urika models can be fitted with an optional recoil reducer

whose design is based on the Spring-Mass recoil reduction system used in the A391 Xtrema 3.5. No matter what the quarry, there's an AL391 Urika shotgun ideal for pursuing it.

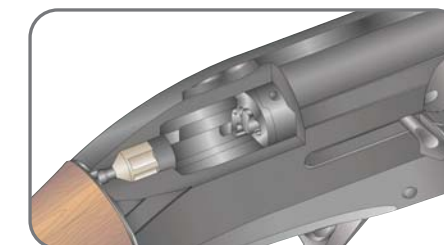

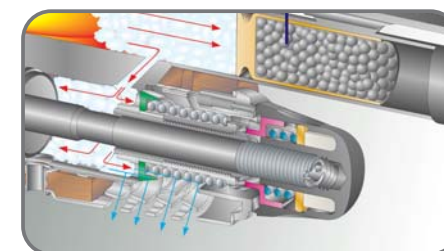

Beretta's popular gas operated semiautomatic shotguns are now being introduced in Advantage's newest camo pattern Max-4 HD.

A391 XTREMA 3.5

When the hard-kicking 3½" 12-gauge shell first appeared, most shotgun manufacturers simply adapted existing designs to feed the longer, more powerful ammunition. Not Beretta. Making the AL391 Urika handle the bigger cartridge would have spoiled the lines and handling of that

proven gun. Instead, Beretta engineers adopted a different locking system: a rotary bolt head engaging the extended barrel tang. Combined with a self-compensating gas valve and self-cleaning piston, the Xtrema offers unmatched reliability and the softest shooting 3.5" available!

A391 XTREMA 3.5

The Xtrema has several proven recoil-taming features. The Gel-Tek recoil pad, with its silicone core, spreads recoil impact. The Spring-Mass recoil reducer, fitted in a channel in the buttstock, helps smooth out the jolt of heavy waterfowl or turkey loads. An elastomer buffer in the rear of the receiver dampens shock as the bolt recoils. The Optima-Bore overbored barrel and lengthened forcing cones ease the shot charge's passage through the bore while

maximizing shot performance downrange. The result is: reduced felt recoil and pellet deformation. Even the feel and comfort of the Xtrema is superior to the competition thanks to the overmolded grip inserts in the stock and fore-end. For the toughest birds in the toughest conditions, nothing matches the A391 Xtrema 3.5.

THE XTREMA SHOTGUN IS DESIGNED to get the most out of today's high-energy shotshells. The Optima-Bore overbored barrel smoothes recoil while evening shot patterns. A supplied Spring-Mass recoil reducer cuts the punishment dealt out by waterfowl, turkey or slug loads. A synthetic stock with rubber inlays will stay in your grasp in the nastiest weather.

FIELD GRADE SEMIAUTOMATICS

A391 XTREMA 3.5

Four design features help make the Xtrema comfortable to shoot with thumping 3½" 12-gauge loads.

1. The Gel-Tek recoil pad uses a silicone core to conform to the shooter's shoulder, spreading recoil over the largest possible area.
2. The Spring-Mass recoil reducer, fitted in a buttstock channel, adds weight and serves to smooth out the sharp rearward jolt of powerful steel loads.
3. An elastomer buffer prevents the bolt from pounding against the back of the receiver in full recoil, reducing stress and vibration transmitted to the shooter's face and shoulder.
4. The Optima-Bore barrel, with its gradual forcing cone and overbored inside diameter, both helps reduce recoil and improve pattern performance.

XTREMA 3.5

Testing has shown that the Xtrema, by spreading recoil over a longer time span, reduces felt recoil by 23% compared to similar 3½" semi-auto shotguns.

Optima-Choke Plus choke tubes fit the larger inside diameter of the Optima-Bore barrel and have a long gradual constriction to minimize shot deformation. The result? Tighter, more even patterns that reach out!

The QD (quick detachable) Plug Removal System allows the hunter the ability to quickly remove the magazine plug without the need for special tools or a gunsmith.

We think you'll agree that the Xtrema 3.5 is the softest-shooting, most reliable 3½" 12-gauge on the market today!

J391P66

A391 XTREMA 3.5

While the Xtrema shares the sleek lines of the Urika, it has a distinctively rugged buttstock configuration from the internationally known Giugiaro design firm. Soft rubber inserts on the pistol grip and fore-end give a secure hold in the wettest weather. The buttstock is adjustable for drop and cast using the supplied spacers. The carrying case, also a dramatic Giugiaro design, accommodates sling swivels, spacers, Beretta Gun Oil, choke tube wrench and cylinder, improved cylinder, modified, improved modified and full choke tubes.

COMPETITION SHOTGUNS

COMPETITION SHOTGUNS

Olympic gold medals. There's no more reliable gauge of gunmaking excellence. From the 1956 to the 2000 Games, Beretta shooters stood on the top podium nine times, and brought home seven silver and nine bronze medals. Since 1978, world-class shotgunners have used Berettas to bring home a total of 147 world championship medals in trap, double trap and skeet. The record is the same in home-grown disciplines like American trap and skeet and NSCA sporting clays. Even if your competitive goals don't extend past winning the Calcutta on league night, you'll benefit from the constant improvements made in Beretta's competition shotguns. Improvements like Optima-Bore® barrels, Optima-Choke® tubes, adjustable cheekpieces and removable trigger groups. Maintaining dominance is even harder than gaining it. Beretta is committed to staying on top, and keeping you there, too.

COMPETITION OVER-AND-UNDERS

DT10 TRIDENT

This is the top of the Beretta line; a shotgun that's at home at any level of competition, from league night at your home club to the Olympics. There are models for the sporting clays fan, skeet devotee or trapshooter. All feature an ergonomic top lever. The trigger assembly can be removed from the frame without tools for cleaning or maintenance.

You'll never have to worry about a broken spring or clogged mechanism. If you're not satisfied with anything less than the ultimate in competition arms, examine the Beretta DT10 Trident. No requirements are too demanding for this masterpiece.

682 GOLD E

Whatever the target discipline, there's a 682 Gold E to help you dominate. Whether you shoot skeet, sporting clays, American or bunker trap, you'll find a version to fill the bill. All feature Beretta's Optima-Bore™ barrel system with long forcing cone and overbored internal bore diameter. Optima-Choke™ tubes give you clay-smoking patterns, thanks to a gradual constriction that reduces pellet deformation.

The 682E is designed to be shot hard. The conical locking lugs are designed to compensate for the wear of thousands of rounds and barrel shoulders are replaceable if you're the type who buys ammo by the pallet. The 682E is beautiful, too, with a distinctive receiver engraving and inlay pattern that immediately identifies it as a target gun. The trigger is adjustable for pull length, and the 682E comes with two trigger shoes. The safety is manual; you won't have to worry whether it's applied an instant after calling for a target.

COMPETITION OVER-AND-UNDERS

687 SILVER PIGEON II & III

The 687 Silver Pigeon and EL Gold Pigeon II are two of the most versatile competition shotguns in the Beretta line. Whatever the gauge or barrel length you choose, you can count on finding one of these fine shotguns to suit your taste. All 12-gauge versions now feature Beretta's Optima-Bore™ barrel system that combines a long forcing cone and overbored inside diameter for reduced recoil and pellet deformation. The Optima-Choke™ tubes that go with it are a full 2¾ inches long to guarantee target-smashing performance by a smooth, gradual constriction of the shot charge.

The 687 Silver Pigeon II action is decorated with deep relief engraved game scenes on the receiver, complimented by a gold trigger. The stock and Schnabel fore-end are cut from highly figured select walnut and a plate is embedded in the belly of the butt stock for engraving the owner's initials. The Silver Pigeon II is available in 12-, 20-, and 28-gauge.

686 WHITE ONYX SPORTING

The White Onyx Sporting offers the sporting clays competitor an elegant yet affordable target shotgun with a European flair. It will stand out on any course with its low-profile Dura-Jewel frame with attractive and durable nickel-alloy finish. The contrasting flat and jeweled surfaces of the frame and the gold trigger stand out against the subtle matte oil-finished

walnut buttstock and Schnabel fore-end. The safety is manual, preventing inadvertent engagement that can cost targets. A tapered rib will ensure quick pointing on all sorts of targets. Whether you're a seasoned competitor or just taking up the game, the White Onyx Sporting will meet your requirements.

COMPETITION SEMIAUTOMATICS

AL391 TEKNYS GOLD

The AL391 Teknys Gold is Beretta's ultimate field autoloader. With an added suite of standard and optional features, it becomes the AL391 Teknys Gold, the ultimate autoloader for the sporting clays course or trap field. You'll pick it out instantly; the receiver is distinctively engraved with a stylized Beretta logo on the left side, and both sides feature blue enameled inserts that unite the receiver and buttstock in a stylistic look and distinguish the Target model from the green-enameled field gun.

AL391 TEKNYS

Fitted in the buttstock of every Teknys Gold Sporting or Trap shotgun is an 8.5-ounce recoil reducer based on the Spring-Mass system pioneered in the 3½-inch 12-gauge Xtrema. If reduced weight is required by the shooter, the system is easily removed without the need of a gunsmith. Those who want to keep a forward balance can help counteract its weight with an optional 3.7-ounce steel magazine tube. The self-compensating gas operating system regulates ammunition of varying ballistics, and has been thoroughly proven in the successful AL391 Urika series. The Teknys Gold Sporting and Trap models add a fast bolt release feature for fatigue-free shooting when shoot-offs last all afternoon.

AL391 TEKNYS GOLD

The overbored 12-gauge Optima-Bore barrel has a long forcing cone for reduced recoil and pellet deformation. Optima-Choke tubes are a full 2¾ inches long to prove a smooth-patterning gradual constriction. The 20-gauge model uses extended Victory Mobilchoke tubes. The barrel is topped by an interchangeable rib system that allows the shooter the flexibility of customizing their rib requirements. NOTE: Optional ribs are under development. Please visit the Beretta website for future availability. All are fitted with TruGlo Tru-Bead fiber optic luminous front sights that give a bright sight picture against any background.

The select walnut buttstock can be fitted with a rubber recoil pad or with the recoil-smothering Gel-Tek silicone-core recoil pad. A supplied set of spacers allows the shooter to adjust, drop and cast to accommodate different body types and shooting styles. The redesigned checkering pattern has been developed to combine maximized comfort while preserving the stylish appearance. A gun this distinguished deserves great care, and the Teknys Gold Sporting is presented in a fitted polypropylene case that has additional storage compartments for all the supplied tools and accessories.

COMPETITION SEMIAUTOMATICS

AL391 URIKA

Add specialized competition features to the thoroughly developed AL391 Urika field gun and you have target arms that are reliable, soft shooting and beautifully designed. All the Urika 12-gauge competition guns are now fitted with Beretta's Optima-Bore barrels that soften recoil and produce more even patterns for top target-busting performance. Optima-Choke™

tubes are a full 2¾ inches long to constrict the pattern smoothly and gradually for minimum pellet deformation. Ventilated ribs are fitted with white front and metal mid-beads. Whatever your target discipline, there's an AL391 Urika to help you win!

AL391 URIKA GOLD SPORTING OPTIMA
J391941

Like the 390 Mallard series, father to the Urika family of shotguns, the AL391 Urika has been voted semiautomatic gun of the year by members of the NSCA (National Sporting Clays Association).

NATIONAL PROOF HOUSE YEAR STAMP MARKINGS

The "Banco Nazionale di Prova" (National Proof House) stamps all Italian manufactured firearms after proofing. The year stamp noted designates the year of proof. In the case of

new firearms the proof year corresponds to the year of manufacture (Italian manufactured firearms only). The markings are most commonly found on the receiver/frame and on the barrel.

YEAR	MARK	YEAR	MARK	YEAR	MARK	YEAR	MARK	YEAR	MARK	YEAR	MARK	YEAR	MARK

SAKO. Best-quality custom rifles at production price.

Buying a rifle is always an exciting experience. But with all the brands out there, with each manufacturer promising the moon, this experience also involves making decisions that are often tricky and difficult.

So why buy a Sako rifle?

We want to present you the resume of Sako rifles. Objectively. Dispassionately. We are confident that when you are done reviewing it, you will see why Sako is regarded as a truly custom rifle at production price. And you will understand why at Beretta we are proud to call this brand a prominent part of our family.

sako
FINLAND

Why is the Tikka T3 taking the American market by storm in a way that surprised even us? Simple. Because it has redefined what a hunter can expect from a rifle in its price range.

The principle around which we designed the T3 is bold: in the twenty-first century, there is no excuse for any company not to incorporate the most desirable features in a rifle, since the technology is there. So the engineers at Sako in Finland and the designers at Giugiaro in Italy went to work around this concept. The result is a rifle that incorporates MOA accuracy out of the box, a silky-smooth action, a crisp, adjustable trigger, a sleek, attractive look and a truly unbeatable price-tag.

SAKO BOLT-ACTION RIFLES

SAKO 75 HUNTER

Many riflemakers offer short and long actions, but Sako pioneered the concept of scaling the action to the cartridge. The 75 series rifles are available in five action lengths to accommodate everything from the .223 Rem. to the .375 H&H Mag. The newest is an action especially tailored for the .270 and .300 WSM cartridges. Combining a bolt throw optimized

for the cartridge length with the short bolt lift made possible by three locking lugs means there's no wasted motion in getting a follow-up shot. And with an action properly scaled to your chosen cartridge, you're not carrying any more rifle than you need—your shoulder will notice the difference at the end of a long hunting day.

FEATURE: Highest resale value.

BENEFIT: You won't want to part with your Sako, but it is good to know that Sako has one of the highest resale values of any bolt action rifle. A high-quality Sako is a good-quality investment.

FEATURE: One-piece forged bolt body with no-bind slots.

BENEFIT: The strength of the Sako 75 action is only outdone by its smooth, reliable feeding. Prove it to yourself, pick up a Sako 75 and cycle the action.

FEATURE: All-steel "Optilock" scope mounting system with unique tapered dovetail rails.

BENEFIT: Scope aligns perfectly with the barrel and will maintain zero in the roughest conditions.

FEATURE: Legendary all-steel Sako action with three massive locking lugs.

BENEFIT: The Sako 75 has one of the strongest, most torsionally-rigid actions made. Its durability and accuracy are unmatched making it perfect for even the hardest-hitting, heavy safari calibers. Four action sizes ensure optimal cartridge-to-action fit.

SAKO 75 HUNTER
JRSA116

FEATURE: Crisp, clean, easily-adjustable trigger.

BENEFIT: Trigger pull can be adjusted from 2-4 lbs. without a gunsmith and without disassembly. Our one-step adjustment system is much safer and less complex than other rifles sold today.

FEATURE: 2-position safety

BENEFIT: The Sako 75 safety is either on or off. This positive system uses a separate bolt-release button: cartridges can be loaded or unloaded with the safety on.

FEATURE: Fully free-floating match-grade, hammer-forged barrel.

BENEFIT: Sako's true match-grade barrels are famous for their accuracy. Maintaining the tightest tolerances during manufacturing translates to the tightest groups shot on paper. No rifle leaves the factory without passing a one minute-of-angle shooting test. Our obsession makes the Sako 75 a tack-driver.

Every SAKO rifle must fire a 1", 5-shot group, at 100 yards prior to leaving the factory.

SAKO 75 HUNTER LEFT-HAND

For years, left-handers could only look in envy at right-handed Sako owners. No more! The Sako 75 now is available in a true left-hand version. Three popular calibers, .25-06, .270 Win and .30-06 give the lefty the rifle he needs for everything from antelope to elk.

NEW

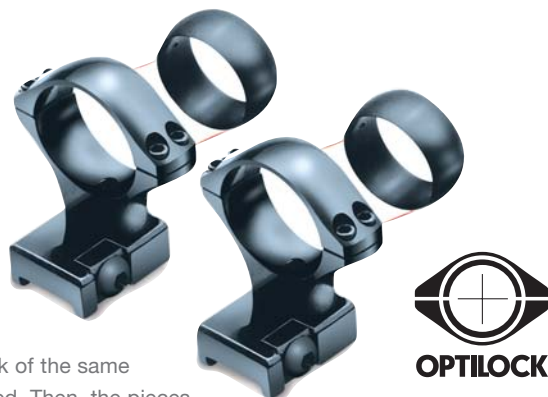

One of the most widely acclaimed features of the Sako 75 rifles is the precision with which each action is tailored to the cartridge. New for 2004 is a brand-new action size designed to fit the popular 270 WSM and 300 WSM. Now, shooters of these fast and accurate cartridges can rely on the absolute best action on the market to maximize the efficiency and the performance of their favorite round.

SAKO 75 HUNTER LEFT HAND
JRSP118

SAKO OPTILOCK™

Even the best-made rifle is ultimately dependent on its sighting equipment. This is why the engineers at Sako have designed the Optilock™ system: a sturdy, all-steel anchor that locks the scope positively into place without damaging the scope body.

Optilock™ bases and rings are machined from a solid block of the same steel we use for our rifles. No inferior materials are ever used. Then, the pieces are individually cut using precision CNC machinery to ensure the most accurate tolerances. Lastly, a smooth polymer bearing is inserted into the rings. The bearing rotates freely, making scope alignment easier and ensuring that the scope body will never be scratched.

Once in place and sighted in, Optilock™ rings and bases are the most trouble-free mounts you can ever own. Our bases provide a large contact surface that ensures permanent and accurate stability for your sighting equipment. You can even detach the scope/scopemount as a unit, put it in your suitcase as you travel and remount it when in the field: your zero will still be there.

Also, you can match different ring heights and diameters with a single base, thereby being able to use different scopes while keeping your cost down. Whether you use a Sako or a Tikka, you will maximize your performance by using our own Optilock™ rings and bases.

SAKO BOLT-ACTION RIFLES

SAKO 75 STAINLESS SYNTHETIC

When weather is at its worst, determined hunters know there's no substitute for the combination of a stainless steel barreled action and a synthetic stock. No matter how long a downpour drenches these rifles, they'll be ready!

Both rifles feature injection-molded stocks with rubber over-molding for a secure grip and a warm feel in the coldest, wettest conditions. The Stainless Synthetic has standard barrel weights and lengths, while the Finnlight uses shorter, lighter barrels to shave 1¼ pounds, a significant saving when hunting in mountain terrain or heavy cover.

FEATURE: Highest resale value.

BENEFIT: You won't want to part with your Sako, but it is good to know that Sako has one of the highest resale values of any bolt action rifle. A high-quality Sako is a good-quality investment.

FEATURE: One-piece forged bolt body with no-bind slots.

BENEFIT: The strength of the Sako 75 action is only outdone by its smooth, reliable feeding. Prove it to yourself, pick up a Sako 75 and cycle the action.

FEATURE: All-steel "Optilock" scope mounting system with unique tapered dovetail rails.

BENEFIT: Scope aligns perfectly with the barrel and will maintain zero in the roughest conditions.

FEATURE: Legendary all-steel Sako action with three massive locking lugs.

BENEFIT: The Sako 75 has one of the strongest, most torsionally-rigid actions made. Its durability and accuracy are unmatched making it perfect for even the hardest-hitting, heavy safari calibers. Four action sizes ensure optimal cartridge-to-action fit.

SAKO 75 SS SYNTHETIC
JRSB116

FEATURE: 2-position safety.

BENEFIT: The Sako 75 safety is either on or off. This positive system uses a separate bolt-release button: cartridges can be loaded or unloaded with the safety on.

FEATURE: Crisp, clean, easily-adjustable trigger.

BENEFIT: Trigger pull can be adjusted from 2-4 lbs. without a gunsmith and without disassembly. Our one-step adjustment system is much safer and less complex than other rifles sold today.

FEATURE: Synthetic stock has soft rubber inlays on fore-end and pistol grip.

BENEFIT: All Sako Synthetics have distinctive styling and a positive, comfortable grip in any weather.

FEATURE: Fully free-floating match-grade, hammer-forged barrel.

BENEFIT: Sako's true match-grade barrels are famous for their accuracy. Maintaining the tightest tolerances during manufacturing translates to the tightest groups shot on paper. No rifle leaves the factory without passing a one minute of angle shooting test. Our obsession makes the Sako 75 a tack-driver.

At Sako, when we call a rifle "stainless", we really mean "stainless". Unlike our competitors, we make even the inside components of the action stainless, not just the barrel and a few action parts. The durability this affords our rifles is a true asset for demanding hunters, and it is yet one more reason why Sako rifles are rightfully considered paragons of utility and engineering innovation.

Every SAKO rifle must fire a 1", 5-shot group, at 100 yards prior to leaving the factory.

SAKO BOLT-ACTION RIFLES

SAKO 75 DELUXE

Many regard a rifle as an object of pride as well as a hunting tool. For them, there is the Sako 75 Deluxe, available for 2004 in three action lengths, including one especially scaled for the .270 and .300 WSM cartridges. A deep blue metal finish, select walnut stock, skip-line

checkering, contrasting fore-end tip and classic red rubber recoil pad make the 75 Deluxe a rifle you'll be proud to carry in any company. Also joining the Deluxe line this year is a .416 Rem. Mag. version with a traditional oil-finished stock.

SAKO BOLT-ACTION RIFLES

SAKO 75 CUSTOM DELUXE & CUSTOM SINGLE SHOT

The Sako 75 Custom Deluxe is offered with the same superlative select walnut used in the limited-edition Safari 80th Anniversary rifle. Add a contrasting grip cap and fore-end tip, along with hand-cut checkering in a special pattern, and you have a truly distinguished rifle that will be a source of pride for years to come.

New for 2004 is the hyper-accurate Custom Single Shot. This rifle features a heavy, fluted stainless steel barrel and a rock-solid laminated stock with a beavertail fore-end. This rifle was designed for the most demanding bench-rest shooters and varmint hunters, who are rightfully demanding in their choices. As with our other stainless rifles, the inside components of the Sako Custom Single Shot are stainless.

SAKO BOLT-ACTION RIFLES

SAKO 75 VARMINT

The Sako 75 Varmint rifle features a hyper-rigid, heavy-contour, free-floating varmint-style barrel designed to produce sub-MOA accuracy right out of the box. The scaled-down action is securely anchored to a true varmint stock that sports a beavertail fore-end with

a wide, flat bottom. As with all Sako rifles, the trigger is pure perfection. The Sako 75 Varmint is a true reflection of why Sako is regarded as a custom rifle at production price.

SAKO 75 VARMINT SS LAMINATED

This rifle incorporates all the features and benefits of the Sako 75 Varmint. In addition, it has a stainless-steel barreled action and a super-solid laminated stock. Many shooters in fact consider laminated wood as possessing most of the desirable qualities of composite

polymers while retaining the attractive looks of wood. As with all Sako 75 Stainless models, the inside of the Sako 75 Varmint Stainless Laminated is also stainless. This rifle is one of the most attractive ones in our lineup.

SAKO BOLT-ACTION RIFLES

SAKO FINNFIRE HUNTER, VARMINT & SPORTER

At Sako, we place the same care in our rimfire line as we do in our centerfire families. We use the same best-quality, cold-hammer-forged steel for our barrels, resulting in a level of accuracy that could previously only be expected in a fully-custom .22LR. The Sako Finnfire line is built around our proven P94 action, a scaled-down variation of our centerfire actions.

This makes for a very rigid and solid core, complemented by a crisp, positive trigger that is easily adjustable for weight of pull (2-4lbs). Furthermore, one of the great features of the P94 action is its short lock-time: this makes it very attractive to demanding target-shooters.

The Sako Finnfire comes in three configurations: the Hunter, with a standard-contour barrel and a hunting-style stock; the Varmint, with a heavy barrel and a beavertail fore-end; and the Sporter, which features a heavy barrel and a competition-style stock.

SAKO FINNFIRE VARMINT

Sako Finnfire Hunter	JRSJ100	80326-5	22 LR	P94S	22"	Wood/Blued	5 rounds	\$950	Look and feel of centerfire model
Sako Finnfire Varmint	JRSJ200	80327-2	22 LR	P94S	23"	Wood/Blued	5 rounds	\$950	Beavertail fore-end, heavy barrel
Sako Finnfire Sporter	JRSJ300	80328-9	22 LR	P94S	23"	Wood/Blued	10 rounds	\$1,065	Competition-style stock with adjustable butt pad and cheekpiece

SAKO FINNFIRE

For the no-compromise competitor, Sako offers the Finnfire Sporter. The deep fore-end conceals a 10-round magazine for sustained-fire events, while the buttpad and cheekpiece are adjustable for shooter comfort in any firing position. The receiver is grooved for quick

installation of a scope or open sights. This is a target rifle that doesn't forget beauty and pride of ownership!

SAKO TRG 22

Nothing says “professional” like the TRG series. Whether you’re trying to win a CISM championship or you’re a police designated marksman, you’ll count on the accuracy the .308 Win TRG 22 brings straight out of the box. A free-floating heavy barrel and rugged composite stock mean no weather will stay this professional’s tool from delivering its

payload. Cheekpiece and buttpad are adjustable to tailor the TRG to your build. To complement the Sako TRG series a variety of accessories of the highest quality are available, such as muzzlebrake, bipod, mirage-sling, etc. Please see our accessories section for a complete list.

SAKO TRG 42

Sometimes you need to reach out a lot further. That's where the TRG 42 comes in. Chambered for the potent .300 Win. Mag. and the even more powerful .338 Lapua Mag., this is the rifle to reach for when ranges stretch a quarter-mile and more. Like the TRG 22, the stock is adjustable to your specifications, and a detachable magazine makes reloads fast and sure. When you bring the TRG 42, you're ready for anything.

Adjustable stock cheekpiece.

Muzzle threaded for brake.

T3 LITE

While the T3 is designed to appeal to the traditionalist with its satin-finished walnut stock, the T3 Lite uses a lightweight injection-molded synthetic stock that reduces weight a full 7 ounces. You'll notice the difference after a long day in the mountains! Giugiaro Design gave the T3 Lite a stock that combines classic and modern designs in a harmonious and

functional layout that is both handsome and fast-handling. Synthetic stocks are the choice of hunters who must face tough weather conditions. Choose calibers from .223 Rem. for varmints to the .338 Win Mag for moose and bears. Rings are supplied with all T3 models— just install a scope and you're ready to hunt!

NEW T3 TACTICAL

This rifle was engineered for the demanding and precise tasks of the law enforcement professional. It features a 20" barrel with non-reflective black phosphate finish, a synthetic varmint-style stock with adjustable cheekpiece and a 5-round, drop-free detachable magazine. The top of the action comes complete with Picatinny-style rail, designed to fit

most types of optic bases and accessories. Also, the rifle comes ready to accept many accessories such as a muzzle-brake and a bipod. Like all Sako and Tikka rifles, this rifle does not leave the factory in Finland without shooting a 1" group or smaller at 100 yards, making it an ideal tool for the law enforcement and civilian market alike.

Cheekpiece allows for 5-position adjustment and is reversible to right or left.

TIKKA BOLT-ACTION RIFLES

T3 VARMINT & T3 VARMINT STAINLESS STEEL

NEW

If our Tikka T3 big-game hunting models are gaining a reputation for legendary accuracy, imagine what kind of groups our varmint models can produce. These rifles are designed with the most demanding varmint hunter in mind, and they possess all the desirable features that the varmint discipline demands. The modular synthetic stock has a wide beavertail

fore-end, a raised-comb cheekpiece and a non-reflective finish. Barrels are of a true varmint type, featuring a heavy contour and 23³/₈" length. The magazine holds five rounds and is drop-free detachable. Naturally, these rifles incorporate all the other features that have made the Tikka T3 a winner.

NEW**T3 LAMINATED STAINLESS**

This elegant and sturdy model joins the Tikka T3 family and promises to be a smashing success. This rifle incorporates all the features that have made the T3 a blockbuster in 2003: glass-smooth action, crisp, adjustable trigger (2-4 lbs), free-floating cold-hammer-forged barrel and drop-free detachable magazine. The exterior of this rifle is designed to be equally

pleasing to the eye and tough to the elements. The all-stainless construction, coupled with the durable laminated stock, will ensure that the legendary Tikka accuracy and performance is maintained for a lifetime of enjoyment. Available in ten popular calibers from the .243 Win to the .338 Win Mag, including the .270 and .300 WSM chamberings.

PISTOLS & HOME PROTECTION

When howling sandstorms raged during Operation Iraqi Freedom, America's troops counted on their Beretta M9 pistols when danger threatened. More than 450 years of gunmaking tradition, combined with the best of today's materials and engineering, meant they carried sidearms built to stand up to every hazard. Whether you're selecting a pistol for service or sport, Beretta autoloaders and revolvers are guns you can trust!

BERETTA SINGLE ACTION REVOLVERS

STAMPEDE

There's no gun more quintessentially American than the single-action revolver. So some might ask, what do Italians know about cowboy revolvers? The answer is easy: the craftsmen of Italy's "Gun Valley" created the modern replica arms industry in the 1950s, and that skill is reflected in the Beretta Stampede. It combines the feel and handling

qualities of the original "hogleg" with a transfer-bar safety system that makes it safe to carry with all six chambers loaded. Whether you're a hardcore cowboy competitor or just a weekend plinker who feels the lure of the Old West, the Stampede is your gun!

BERETTA SINGLE ACTION REVOLVERS

STAMPEDE

There's a Stampede for every holster! The Stampede Inox, new for 2004, combines lustrous stainless steel with traditional black synthetic grips for an eye-catching contrast. The standard version combines a blued barrel and black polymer grip with a frame finished in Beretta Color-Case, which duplicates the classic look of color-casehardening.

The Deluxe model adds select walnut grips and a lustrous charcoal-blued barrel and cylinder. Or if you like to stand out a bit more at the range, select full polished nickel plating with walnut grips. Choose the original cavalry barrel length of 7½" or the more handy 5½" or 4¾" barrels. Choose the traditional .45 Colt or powerful .357 Mag.

STAMPEDE DELUXE
JEC1401

STAMPEDE INOX
JED1401

NEW

STAMPEDE INOX
Traditional black grips contrast with corrosion-resistant stainless steel in the latest addition to the Stampede line. It's available in the classic .45 Colt and in all three traditional barrel lengths.

Classic styling: modern safety features. A transfer-bar safety means unmatched security for the Stampede user.

Beretta Color-Case™ finish combines the romance of the Old West with durable modern materials.

The .45 Colt is the classic Western cartridge. The .357 Magnum can also fire light .38 Special loads.

STAMPEDE

For the pistolero who likes something a bit more distinctive, Beretta has added the new Stampede Marshall with a 3½" barrel and bird's-head grip. Many who find the standard "plow-handle" grip uncomfortable find this style fits like a glove.

STAMPEDE MARSHALL
JEE1403 **NEW**

STAMPEDE
JEA1401

The Stampede gives shooters the proven sight picture of the classic single-action revolver.

Beretta's Color-Case™ finish will remind you of Old West "hoglegs," but will outlast traditional finishes.

American design, Italian craftsmanship. It's a combination you'll find hard to beat!

BERETTA SEMIAUTOMATIC PISTOLS

U22 NEOS

Neos means "new" in Greek, and Beretta's American design staff started with a clean sheet when drawing up this new line of .22 pistols. The lines are meant to appeal to a new generation of shooting enthusiasts who are respectful of the past while bringing a fresh attitude to the shooting sports. The Neos pistols feature cutting-edge design, modular

construction that allows personalization and the flexibility for many shooting disciplines. Available at popular prices, the Neos is ideal for new shooters, but it won't easily be outgrown as skills improve.

U22 neos

U22 NEOS 6.0 INOX
JU2S60X

The Neos is easily disassembled for cleaning and maintenance without special tools. Just remove the magazine from the grip, barrel from frame and grip from frame. This is simplicity by design!

BERETTA SEMIAUTOMATIC PISTOLS

U22 NEOS

The modular design and parts interchangeability of the Neos make it the top value in its class, with category-leading features at an affordable price. Grip frames in a variety of colors and interchangeable rubber inserts make it easy for the user to personalize the Neos from mild to wild. All three barrel lengths (4½", 6" and 7½") are fitted with integral rails that

accept all standard Weaver-style rings for easy scope mounting. Changing barrels doesn't mean rezeroing, either: both front and rear sights are fixed to the integral rail and stay with the barrel. Neos is a pistol that can grow and change to fit your shooting interests, from plinking to small game hunting to competition.

ACCESSORY BARREL ASSEMBLY
Choose from three barrel lengths, all fitted with accessory rails that accept Weaver-style rings.

ACCESSORY REAR AND FRONT SIGHTS
Select the right sight color for the target: black, red or white. Both front and rear sights are replaceable.

ACCESSORY GRIPS
Personalize your Neos with a grip frame in your choice of vibrant colors.

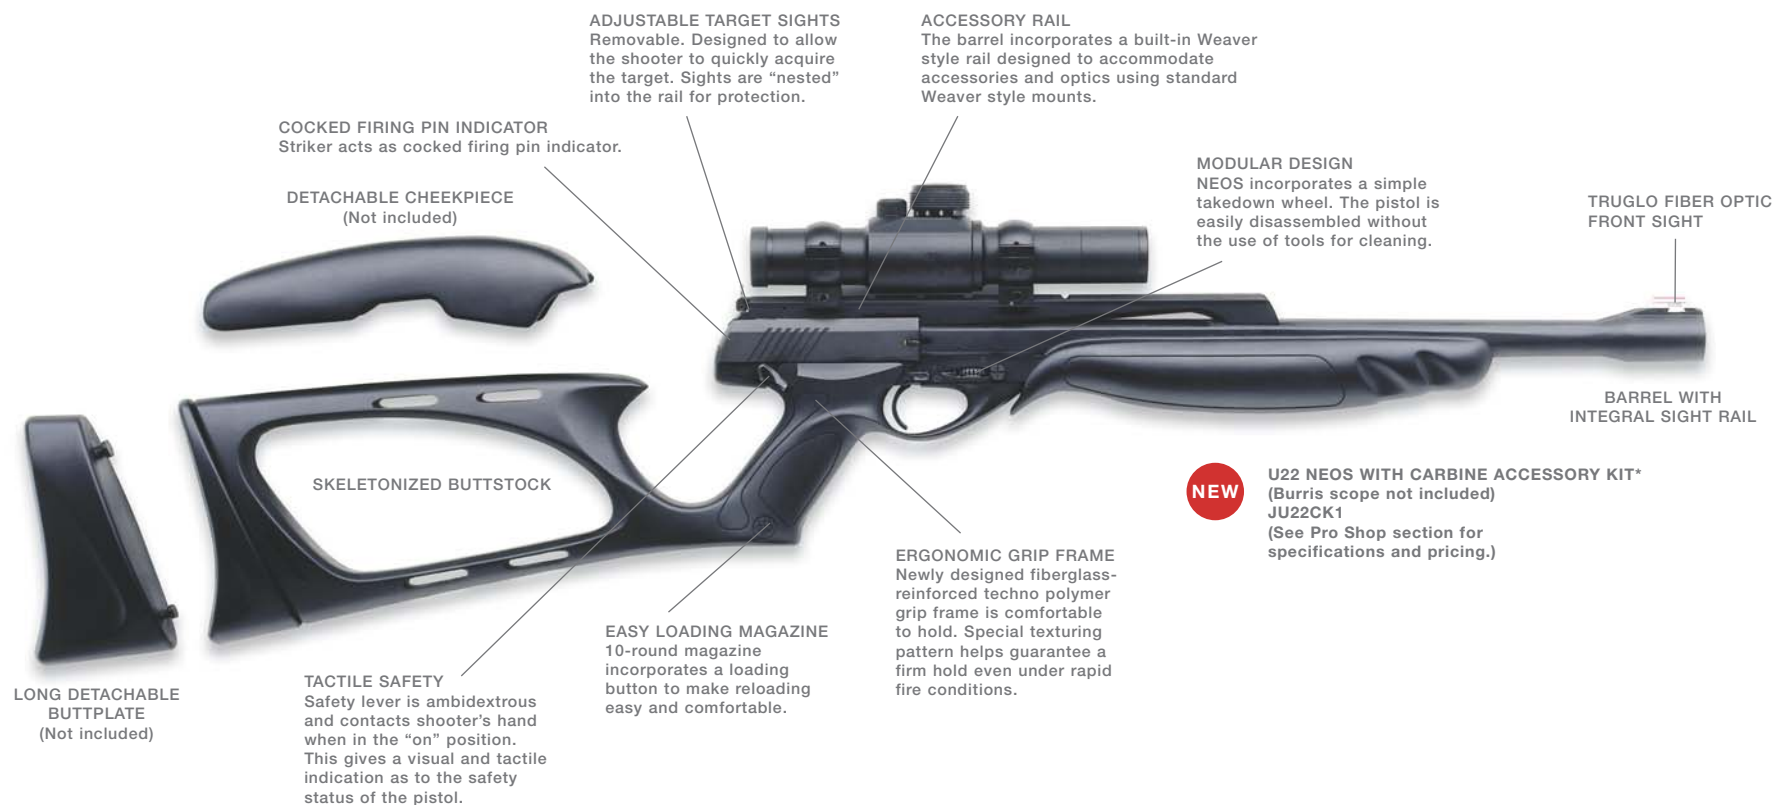

ACCESSORY SLIDE ASSEMBLY
Choose a blued or Inox slide.

ACCESSORY GRIPS WITH RUBBER INLAYS
Upgrade to the DLX-style grip frame with comfortable rubber inlays.

U22 NEOS

For 2004, Beretta offers the Neos Carbine Kit*, a shoulder stock and barrel that turns the pistol into a handy, accurate long gun. Without special tools, you can return it to pistol configuration.*

*Carbine Kit may not be sold in California. **WARNING:** A rifle with a barrel less than 16 inches in length is classified as a "short barreled rifle" and must be registered as such with the BATF in accordance with the National Firearms Act. Consult your local BATF office for registration information (some states do not allow registration of short barreled rifles; consult your local authorities for more information).

BERETTA SEMIAUTOMATIC PISTOLS

92/96

From the jungle heat of Panama to the sandstorms of Iraq, the U.S. Armed Forces have counted on Beretta pistols for almost two decades of distinguished service. The 92FS most resembles the military M9 9mm pistol, while the 96 offers the same features, but is chambered for the popular .40 S&W cartridge.

Both are available with the heavier, recoil-reducing Brigadier slide and in blue or Inox finishes. It's even easier to master your Beretta when you add the 22LR Practice kit, which adapts the 92 or 96 pistols to fire inexpensive .22 Long Rifle ammunition.

**22LR PRACTICE KIT
J9022PK**
Build your shooting skills with the optional .22 conversion kit for the 92/96 pistols. It's easily installed and removed.

BERETTA SEMIAUTOMATIC PISTOLS

92/96

New for 2004, the 92/96 Steel I has been designed with the competitive shooter in mind, that desire the recoil reducing benefits of a steel frame, this pistol also features Beretta's slim "vertical" grip, frame mounted safety and nickel alloy finish. Available in double/single and single action only, both in 9mm and 40 S&W.

Nothing reduces recoil like a little extra weight, and Beretta engineers added it to this full-race competition pistol by specifying a steel frame. When you combine a bit more heft with the M1911-style Vertec grip style, you have a soft-shooting 9mm or .40 S&W pistol that's ready for the range, right out of the box. Choose single- or double-action variants to match your shooting style.

92/96

To celebrate the 470th anniversary of the world's oldest gun maker, Beretta USA proudly offers this limited edition 92FS 9mm pistol for the most discriminating collector.

Only 470 pistols will be sold worldwide. Unique features include a mirror polished finish, stainless steel construction, and figured select walnut grips with inlaid gold plated medallions. Special and unique gold-filled engraving includes the signature of Beretta's President Cav. Ugo Gussalli-Beretta. The 470th anniversary logo is engraved on the top

of the slide and the back of the magazine. Each pistol is identified by a "1 of 470" (through "470 of 470") gold-filled individual number.

The set includes a special chrome plated magazine and it is presented in a deluxe lockable walnut display case with distinctive teak inlays and the 470th Anniversary engraving on the outside.

Special and unique gold-filled engraving includes the signature of Beretta's President Cav. Ugo Gussalli-Beretta.

92FS 470TH ANNIVERSARY
SPEC0230A

A special logo designates 470 years of gunmaking excellence.

Only 470 will be made, and each pistol will have a gold-filled number between 1 and 470.

BERETTA SEMIAUTOMATIC PISTOLS

92/96

Developed to meet the “Special Duty” requirements of elite law enforcement and military units, this advanced pistol is also ideal for IDPA competition shooting. The “G” decock-only mechanism guarantees that the pistol is always ready to fire, eliminating the possibility that the safety is accidentally left engaged during stressful competitive shooting events. The “SD” features an integral accessory rail machined into the frame to attach a variety of popular

white light and laser devices. The Brigadier style recoil-reducing heavy slide, and removable front and rear Trijicon 3-dot tritium sights come standard. The frame is customized to include front and back strap checkering and an aggressively beveled magazine for faster reloading. The stainless barrel, finished in our proprietary Bruniton™ finish, boasts a machined target crown. The extended magazine button allows for quick magazine drops.

As the name implies, the Elite pistols are for advanced competition shooters who want to carry only the best when gunning for IDPA and IPSC championships. The "IA" model combines a slim vertical grip frame with the integral accessory rail of the Vertec and the Brigadier slide. Practical competitors will like the forward slide serrations, skeletonized hammer, beveled magazine well and stainless barrel cut flush with the front

of the slide. Like the "IA", the Elite II uses the "G"-style decocker lockwork, but with the traditional curved-butt Beretta frame. It adds a stainless steel slide with Novak rear and thin serrated front sights. Both guns feature beveled magazine wells and a flush hammer spring cap that deletes the lanyard loop of the service models.

BERETTA SEMIAUTOMATIC PISTOLS

8000 COUGAR

Most of today's autoloading pistols use a barrel that tilts away from the line of sight during firing. Not the Beretta 8000 Cougar! Its barrel rotates to lock with the slide, meaning greater strength and that it stays in the same plane for each shot for greater accuracy. Choose from four of the most popular service and sport cartridges: 9mm Parabellum, .357 SIG, .40 S&W and .45 Auto. The standard Cougar has a full-sized frame, while the compact and lighter Cougar L has a shorter grip and is proportioned for a 10-round 9mm magazine.

The 8000F Cougar Inox brings stainless steel to the Cougar design. Checkered walnut grips make this a distinctive pistol for the connoisseur. A limited number will be offered in 9mm (Model 8000F) and .40 S&W (Model 8040F).

BERETTA SEMIAUTOMATIC PISTOLS

9000S

There's no doubt you're looking at a work of art when you see the Beretta 9000S. Its styling, by legendary Italian design house Giugiaro, is one-of-a-kind. Soft wrap-around polymer grip insert makes it easy to grasp in the toughest conditions, and resistant to corrosion. It's available in both 9mm Parabellum and .40 S&W calibers, both with 10-round magazines.

It will accept "pre-ban" 92/96 magazines for increased capacity (using optional adapter). An extendable magazine "bottom", that extends $\frac{1}{32}$ " when the pistol is drawn and retracts when it is holstered, is included. (See Pistol Pro Shop section for details.)

GIUGIARO
D E S I G N

The polymer frame makes the 9000S both comfortable to shoot and resistant to corrosion and wear.

Experts prefer a double-action trigger in a pistol designed for concealed carry.

The 9000S is simple, robust and reliable; the hallmarks of a pistol you can count on.

CHROME-PLATED BARREL
Steel barrel sandblasted and matte blued. The bore is chrome lined for maximum corrosion resistance and durability.

COMPACT DIMENSIONS
The reduced dimensions, especially in length and height, make this pistol particularly convenient for carry.

TECHNOPOLYMER FRAME
The use of the latest generation glass-reinforced technopolymers reduces the overall weight of the pistol.

9000S TYPE F
J909F10

GEOMETRIC LOCKING SYSTEM WITH TILT BARREL
The innovative and patented locking system is based on direct barrel-to-slide engagement. The absence of any intermediate locking components increases the durability of the firearm.

SLIDE
It is manufactured from steel alloy, sand-blasted, phosphated and Brunton finished for maximum corrosion resistance and durability.

SIGHT SYSTEM
The white 3-dot sight is designed for quick target acquisition. Both the rear and front sights are dovetailed to the slide for windage adjustments and may be replaced.

EXTERNAL HAMMER
The external hammer retains the traditional Beretta design with through-hole and gripping serrations.

ERGONOMIC GRIP
Featuring a soft yet durable polymer insert, the grip absorbs vibrations and ensures positive pistol retention.

ERGONOMIC GIUGIARO DESIGN
The distinctive Giugiaro design is aesthetically and functionally superior.

FIREPOWER
Two high capacity magazines (10 rounds) are included with each pistol. The model 9000S also accepts the magazines of the 92 Series pistols with the use of an optional adapter.

CHEETAH

If you prefer the light recoil and report of the .380 Auto cartridge, the Beretta Cheetah is for you. While the 84FS and 85FS offer conventional blowback operation, the 86 Cheetah adds an unusual front-hinged barrel that allows loading and unloading without having to retract the slide.

The 87 Cheetah is a sporting version in .22 Long Rifle. All the Cheetahs are light, fast-handling pistols that are ideal for personal defense or police back-up carry. Beretta's proprietary black Bruniton finish provides a wear-resistant coating. Back by popular demand, the nickel finish models carry checkered, walnut grips.

BERETTA SEMIAUTOMATIC PISTOLS

CHEETAH

BARREL
High-strength nickel-chromium-molybdenum steel with hard chromed bore for longer life.

OPEN SLIDE DESIGN
Open top slide virtually eliminates jamming and stovepiping.

SIGHTS
Fast, sure target acquisition from standard 3-dot system. Notched rear sight is dovetailed for windage adjustment. Blade front sight is integral with slide.

COMBAT-STYLE TRIGGER GUARD
Provides support for a two hand grip and offers an enlarged opening for easy access with gloves.

FIRING PIN BLOCK

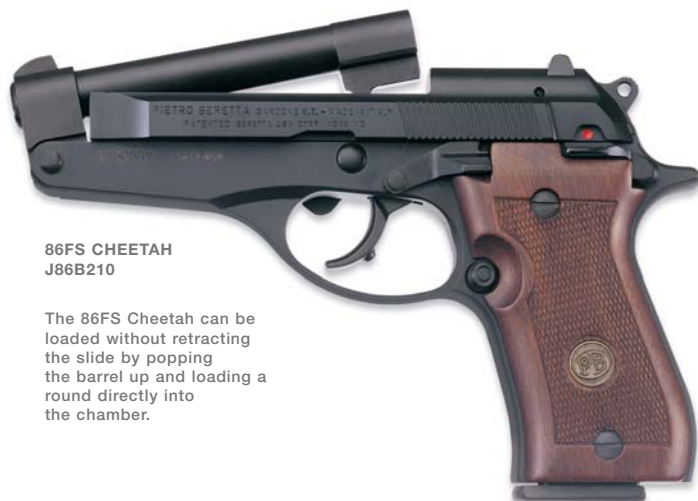

AMBIDEXTROUS SAFETY
Easily accessible by the thumb for right or left handed shooters.

DURABLE FRAME
An anodized alloy offers superior corrosion resistance. Matte black finish is non-reflective.

85FS CHEETAH
J85F200

The 85FS Cheetah is an ideal defensive pistol for those who prefer the milder recoil and report of the .380 Auto cartridge.

DOUBLE ACTION TRIGGER
The first round is full double-action mode, and the second and all subsequent rounds are fired single-action.

86FS CHEETAH
J86B210

The 86FS Cheetah can be loaded without retracting the slide by popping the barrel up and loading a round directly into the chamber.

87 CHEETAH
J87B210

The 87 Cheetah is a sporting autoloader you'll want to take along on every outing.

BERETTA POCKET PISTOLS

BOBCAT AND TOMCAT

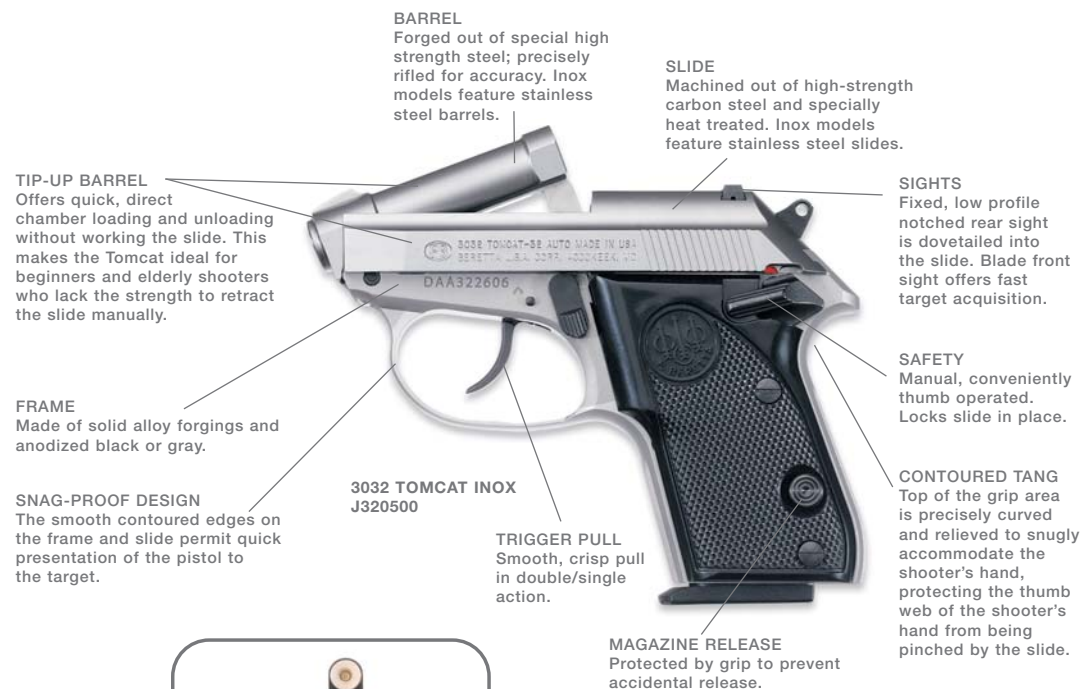

When police officers or concealed carry permit holders look for the ultimate in concealability, they look to the Beretta Tomcat in .32 Auto and the Bobcat in .25 Auto and .22 Long Rifle. These double-action pistols may be tiny, but they're reliable defensive arms. Both pocket

pistols are available in blued or Beretta Inox (stainless) finishes. The tip-up barrels allow rounds to be loaded directly into the chamber without slide retraction. Tomcat and Bobcat: unobtrusive companions for the toughest streets.

BERETTA CARBINE

Cx4 STORM

Cx4 Storm

Beretta's Cx4 Storm redefines the pistol-caliber carbine, with racy and radical lines from the masters of industrial design at Giugiaro. Form follows function in a symphony of smooth, sweeping curves made possible by the use of modern high-strength technopolymers. Beretta's use of cutting-edge materials also keeps weight down to just 5³/₄ lbs., making

the Cx4 a pleasure to carry, whether in the field or on duty. Five different models accept full-size Beretta magazines from the 92/96 and Cougar series pistols in 9mm, .40 S&W and .45 Auto, including large-capacity restricted and pre-ban styles. The cold hammer-forged 16.6-inch barrel is chrome-lined for long life and corrosion resistance with any ammo.

SIGHTS

Front sight is fully adjustable for windage and elevation. The rear sight has two apertures for long and short range use. Both may be folded down when optics are used.

BARREL

16.6 inches in steel, cold hammer forged, chrome lined.

ACCESSORY RAILS

May be added to the top, side and bottom of the Cx4. Internal rail may be extracted from the front of the Cx4 by pushing in on the front sling swivel.

SEMI-AUTOMATIC, STRAIGHT BLOWBACK OPERATION
Simple, rugged and reliable operating system.

REVERSIBLE CONTROLS
Extractor, ejector, operating handle, ejection port cover, magazine release, and manual safety button are reversible for right or left hand use.

BOLT RELEASE LEVER

Allows closing of the bolt which remains in the open position after the last round from the magazine has been fired. (With the magazine inserted.) This permits the user to immediately determine that the carbine does not have a round in the chamber or magazine.

RUBBER CHEEK PIECE

Allows the operator to comfortably maintain tight control of the firearm even when wet.

ADJUSTABLE STOCK
Stock spacers allow the user to increase the length of the stock by .60 inches per spacer.

TECHNOPOLYMER FRAME
Ultra tough, light, technically advanced firearm. Technopolymer guarantees corrosion resistance and color consistency.

SIMPLE FIELD STRIPPING
By removing one friction-fit pin the Cx4 may be completely disassembled for easy cleaning.

SINGLE ACTION TRIGGER
Short, light SA trigger allows for fast, accurate discharge of subsequent rounds.

REMOVABLE MAGAZINE

The Cx4 Storm is able to utilize the same magazines as the 92/96 and 8000/8040/8045 Cougar pistol series.

SLING SWIVELS
Come preinstalled in the front and rear part of the stock. Sling loop attachment points are located on both sides of the butt stock allowing for a variety of sling configurations.

Retractable fore-end rail.

Retractable fore-end rail with Surefire Nitrolon light attached. (Not included)

Cx4 STORM

The Cx4 is unsurpassed in its adaptability for right- or left-handed users. Ejection and operating handle can be switched from the standard right side to the left without the use of tools or spare parts. The crossbolt safety and magazine release are reversible for the left-hander, too. The firing pin and hammer are blocked until the trigger is pulled, and

a bolt safety locks the bolt to prevent it cycling should the Cx4 be dropped on its butt. The magazine is protected inside the grip, helping keep it safe from damage in vigorous maneuvers. Sling studs and loops on both sides of the butt stock allow a variety of sling configurations for comfortable carrying.

Side and bottom accessory rails allow easy mounting of tactical lights, lasers and other accessories, one side rail included. Bottom accessory rail available as accessory.

BERETTA CARBINE

Cx4 STORM

Unlike folding-stock carbines, the Cx4 is comfortable to fire, with a rubber comb insert for a comfortable cheek rest. Adding spacers allows length of pull adjustment from 13 to 15 inches in .6 inch increments, letting the Cx4 fit users of all heights and making it easy to accommodate winter clothing, protective vests and other gear. Today's shooter demands

a gun that can accept a large assortment of accessories, and here the Cx4 caters for all tastes. A retractable accessory rail extends from the fore-end for mounting tactical lights. Rails can be installed on either side or the bottom of the fore-end for lasers or forward grips.

Cx4 Storm

Adjust pull length to your specifications with supplied spacer. (Two more spacers may be added and removed)

The optional Picatinny (MIL-STD-1913) top rail allows easy installation of dot sights or scopes.

Cx4 STORM

Controls are very similar to those found on our popular 92FS pistol, so most shooters will be immediately familiar with the operation of this firearm. Length of pull can be lengthened in .6" increments, from 13 _" to 15" by addition one to three stock spacers (one provided). Multiple sling attachment points allow a multitude of carry options. A retractable forward accessory rail extends out from the fore-end, allowing quick mounting of a tactical light or

laser unit. Hard mounting points allow the addition of various accessories, including side, top and bottom "Picatinny" rails. These will accept optics, tactical lights, lasers and vertical grips. One side rail is included. The front post sight is adjustable for windage and elevation, while the rear sight has long-range and ghost ring apertures. Both sights are protected by rugged "ears" and may be folded down when optics are used..

Cx4 STORM

The optional carrying case protects the Cx4 from the elements.

BERETTA PRO SHOP

Make your Beretta truly yours with accessories from the Beretta Pro Shop. Turn your autoloader into a competition champ with adjustable sights and a skeletonized hammer for fast lock time. Select a magazine floorplate with rubber bumper and an oversized

KNIVES

The Beretta Knife Advantage. From tactical to field, from pocket models to Collector Editions, Beretta offers a full range of knives. Materials and constructions are chosen for the best performance for intended end use. Designed by some of the world's foremost knife makers, each knife has a meticulous fit and finish. Whatever your intended use may be, you will find the right knife to go along with your Beretta pistol, shotgun or rifle.

TACTICAL KNIVES

MODEL 92, AVENGER II & CHEETAH

Your pistol is a Beretta Model 92, why shouldn't your knife be one, too? The Model 92's blade, made of AUS 8 steel, bears the same rollmarks you'll see on the pistol's slide. It's available with plain or serrated edge. A prominent thumb stud makes for sure one-hand operation, and a husky clip will hold it in your pocket, ready for immediate action. The Zytel handle reflects the classic lines of the Model 92 pistol grip. Now you can carry two Model 92s!

MODEL 92
JK100A02

Slide markings appear on Model 92 blade.

MODEL 92 SERRATED
JK101B02

The Avenger II has a Tanto-style blade laminated from VG-10 stainless steel and ultralight carbon fiber that matches the knife's handle. You'll want this rugged but easy to carry tactical tool clipped in your pocket all the time. With just a flick of the thumb, it's liner-locked and ready for service.

Like Beretta's pocket pistol of the same name, the Cheetah is a drop-point folder that's intended for daily carry. A fast and secure sliding thumb button brings its AUS 8 blade into the extended and locked position, ready for duty.

AIRLIGHT 'UNITED WE STAND'

These are the times that try men's souls, but a way to remember, thank, and welcome home those we care about is with a great gift. And when the fit is as functional as a Beretta knife and it is used day in and day out, on the job or in the field, then it is a gift worth giving.

HUNTING KNIVES

FIELDLIGHT & STAG FOLDERS

The Beretta Fieldlights are rugged, lightweight knives for the active hunter. All have 3¼" AUS 8 blades. Choose a single plain-edged blade, a single gut-hook blade or combos: a plain blade and saw or plain blade, gut hook and saw. All have durable, non-slip Zytel handles and are supplied in a nylon belt sheath.

STAG BIRD 2 KNIFE
JK303B02

FIELDLIGHT 3 BLADE
JK304A02

STAG BIG GAME KNIFE
JK304B02

The new Stag knives feature classic staghorn handles and are available in big game or bird hunting styles. The Stag Big Game features a clip-point main blade of 440C steel, a gut hook and a bone saw, while the bird knife combines the main blade with a bird hook. Silvered bolsters and the Beretta trident logo make these knives you'll carry with pride.

LOVELESS FIXED BLADES

In the knife world, no name has greater magic than R.W. Loveless. If you want an original Loveless, be prepared to wait three years or pay thousands because demand has outstripped supply for three decades. Beretta teamed up with the master maker to create the first line of series-manufactured Loveless-style knives, available at prices that will

surprise you. For rugged hunting use, choose the Zytel™-handled drop point or skinner versions, or the drop point with gut hook. Or select the prestige of oriental quince wood handles in either blade style. All Loveless models come with a leather sheath stamped with the Beretta Trident logo.

HUNTING KNIVES

ZYTEL™ AIRLIGHT & CAMO

Like the Aluminum Airlight, the Zytel™ and Camo Airlight knives feature AUS 8 steel blades in a variety of lengths and styles, all secured by a rugged back lock. Whether you're looking for a 2½" pocket knife for opening things around the office or a 3¾" gut hook model for packing

out an elk, there's a knife for you in this line. Choose a lightweight skeletonized blade, a solid blade with plain edge or a 30% serrated blade for the toughest cutting.

NEW

STAMPEDE

Beretta's Stampede single-action revolver brings back some of the spirit of the Old West, and a series of Stampede knives does the same.

No working cowboy, pioneer or prospector would have been without a pocket folder, and most would have been overjoyed to have a fine example like Beretta's Stampede, with walnut scales, brass bolsters and AUS 6 steel blades. A clip point main blade, combined with sheepsfoot and pen blades, make this a versatile tool you'll carry every day.

A sturdy boot knife would be mighty handy if your six-shooter ran dry at the wrong time. Beretta's interpretation has a 3 1/4" AUS 8 San Francisco-style blade, with full-length tang covered by oiled walnut scales and fittings in brass. A leather sheath makes it easy to pack this one in a boot, whether you're at a cowboy match or in the field.

No knife recalls the triumph and tragedy of the Old West like the Bowie, the big knife that was both tool and weapon for frontiersmen. Beretta's Bowie has a 7 1/2" blade of AUS 8 steel, with a full-length tang fitted with a brass guard and oiled walnut scales, and a big knife like this one really needs a matching leather sheath, marked with the Beretta trident logo.

You can have a set of all three Stampede knives as part of a limited edition of 300 sets. Each blade is specially marked with an etched Stampede buffalo. The knives are elegantly displayed in a distinctive walnut case that will be a focal point in your gun or trophy room.

TRIDENT & TOOLS

The Trident is a classic liner-lock gentleman's folder with a racy Wharnccliffe-style 2½" blade forged from VG-10 steel. Choose distinctive cocobolo wood or G-10 only with black Micarta for the handles.

The Beretta shotgun and pistol tools are ingeniously designed combinations that will let you perform field maintenance and minor repairs on the spot. Made of stainless steel, they'll serve you for years to come.

COLLECTOR KNIVES

M9 AMERICA'S DEFENDER & LOVELESS HUNTER WHITETAIL COLLECTOR

The Beretta M9 has burnished an already distinguished service record on the burning sands and in the dark alleyways of Iraq. The Beretta M9 America's Defender honors that service with a limited edition of 1,000 cased knives. The solid black hollow-ground Tanto-style blade is finished in the same Bruniton that protects the pistol, and has the same rollmarking used on the M9. An oak display case with glass top will make this a conversation piece in any room.

M9 AMERICA'S DEFENDER
JK600A02

- AUS 8 steel, hollow ground tanto style blade
- 1 of 1000
- Solid black blade
- M9 pistol marking on blade
- Oak presentation case

The Loveless Hunter Whitetail Collector is a limited edition of 1,000 knives with a distinctive whitetail track decorative scheme that distinguishes both the quince-handled knife and its glass-topped walnut case. Michael Collins designed the whitetail etching pattern, filled with gold leaf, that decorates the blade. If you've wanted an art knife with traditional Loveless styling, now's your chance to have it!

LOVELESS HUNTER WHITETAIL COLLECTOR

CASES & ACCESSORIES

Beretta owners have made the discerning choice to own one of the finest firearms in the world. That is why Beretta puts the same attention to detail in its accessories as it does all Beretta handguns, rifles and shotguns. No other after-market accessory will fit your Beretta or Sako better than a genuine, Beretta made accessory. Our cases, sights, rings, bases, grips and choke tubes are made by Beretta for Beretta and we are continually working to make new products to enhance your shooting experience.

CASES & ACCESSORIES

LUGGAGE

NEW

Beretta owners are travelers. Whether they're jetting halfway across the world to win a gold medal or deep into the wilderness in pursuit of a once-in-a-lifetime trophy, they and their Beretta firearms are on the move. It's natural then, that Beretta should offer a line of luggage especially designed for the traveling hunter and shooter. Given today's heightened airport security, carrying a gun case can bring unwelcome stares. With the Beretta Takedown and Rifle bags, your gun and your clothes ride in one rugged and unobtrusive package. When it's

time for baggage inspection, the case opens for a quick and easy check. Security straps cover all zippered compartments, and mesh pocket compression dividers keep clothes folded and in place. High-density polyurethane wheels make pulling easy, and handles lock both in the extended and packed positions. Choose a coordinated wheeled carry-on for smaller items.

HUNTING ACCESSORIES

Sling swivels. European shooters swear by them, American hunters swear at them. Still, a sling's mighty handy when you're slogging out to the blind with a load of decoys. The new Swiftach Sling and Swivel let you sling your shotgun for the walk, then park the sling in the

blind. The front loop attaches to the magazine tube cap, while the gun's butt fits into a molded stock cap at the rear. The articulated sling conforms to your shoulder for a comfortable carry on the longest trudge.

LONG GUN SOFT CASES

All Beretta shotguns come with molded carry cases, but there are times when a soft case is just handier. When you're traveling bumpy roads in a pickup or floating quietly in a boat, a soft case fits the bill. Beretta's line covers the range from 35" takedown carriers to 52" shotgun cases for long-barreled waterfowl guns. There's even a distinct line of Sako cases for carrying your scoped rifle.

CASES & ACCESSORIES

MOLDED LONG GUN CASES

Beretta cases for rifles and shotguns are molded of high-impact ABS plastic, and are as elegant as the guns that ride in them, thanks to design by Giugiaro. The longer cases have handles on both long and short ends and wheels so they can be rolled as well as carried. Sako rifles have their own distinctive cases, and there's even a case for shotgun combinations.

SECURITY NEW

eXomesh™ technology:

What is eXomesh™?

eXomesh is a revolutionary system that is built into all Beretta Security Pack products enabling you to secure your firearm when you are out and about - anywhere from the concrete jungles of the western world to the untamed deep green jungles of other worlds.

eXomesh uses high-tech materials and specially designed components to balance product strength, durability and reliability with the weight constraints that are vital when travelling.

Beretta Security Packs with/eXomesh™

For Pistols, Rifles and Shotguns

eXomesh™

interlocking security system

How does eXomesh™ work?

There are three key design "interlocking" features:

Core protective cell of slash-proof high tensile stainless steel

eXomesh technology uses a combination of lightweight, flexible, high tensile 1.5 mm stainless steel cable and crimps to create a **slash-proof** core protective cell around luggage or valuables, with a mean cable strength of approximately 198 Kg. In the Beretta Security Sack™ the core protective cell is fused with a rugged yet lightweight next generation nylon-canvas laminate to provide added protection against the elements and keep personal items and valuables safe, secure and out of sight.

Snatch-proof wire reinforced straps & belts

It can take a split second of looking at a map or asking for directions for a seasoned pickpocket to cut through a conventional belt or strap. So eXomesh system features belt and neck straps embedded with **snatch-proof** flexible high tensile stainless steel wire.

Unique tamper-proof locking stainless steel & polycarbonate devices

The unique eXomesh design locking device, featuring steel reinforced, impact resistant polycarbonate and 4mm high tensile stainless draw-wire, along with lockable belts and zippers, allows users to lock the eXomesh protective cell in place around immovable objects, in effect creating a **tamper-proof** cage for valuable items wherever you are.

What are the benefits of eXomesh™ technology?

The Beretta Security Packs are engineered and tested to be:

- ✓ slashproof
- ✓ snatchproof
- ✓ tamperproof

NEW

SECURITY PRODUCTS

Any firearm is a tempting target for thieves. Protecting your investment from smash-and-grab criminals, while keeping it close at hand, requires a special sort of case: the Beretta Security Pack. There are three models for pistols, takedown shotguns and rifles, that are laminated with what looks like a chain-link fence. It is a lot tougher than fence wire; it's

made of stainless steel, and no criminal is going to cut his way to your gun with a switchblade. Each loop would have to be cut individually. A 4mm stainless steel cable loop and a brass key lock let you secure the Security Pack to a structural member of your car. Your gun will be there when you get back!

NEW

SECURITY PACK SHOTGUN
SVPW1056

- Prevent the smash and grab
- Concealable carry for a shotgun case

NEW

SECURITY PACK PISTOL
SCC2056

- Concealed carry, pistol security, in car or van

- 4mm stainless steel security loop
- 4 pin brass lock

NEW

SECURITY RIFLE PACK
SCC2057

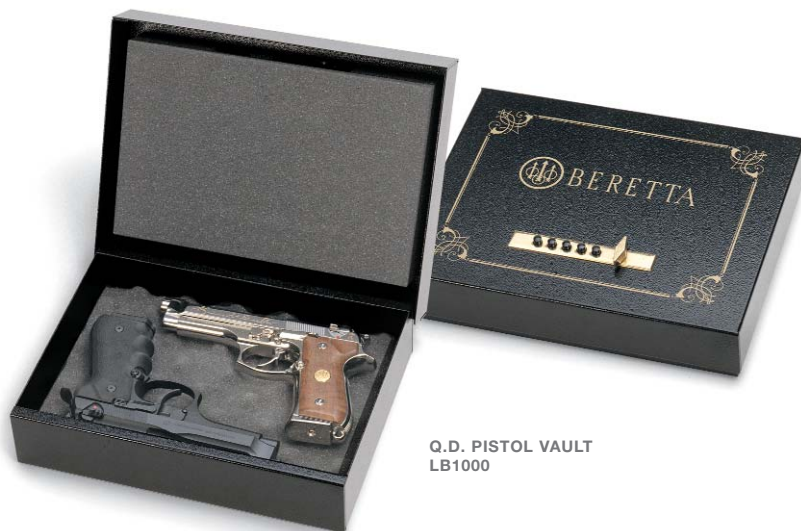

- The Beretta Security Sack for pistols is the perfect answer to a concealed carry stash when banking or doing business in City Hall.
- Hanging locked around the steering column the Beretta Security Pistol Sack is a nondescript auto accessory.
- Feel quite a bit more secure stopping for dinner or a night in the hotel while on the competition circuit knowing your Beretta Competitions Over & Under is secure.
- The Rifle Security Sack is great urban-camo when transporting the deer rifle in season, almost invisible under the seat on the floor of a van or truck.

CASES & ACCESSORIES

SECURITY & SAFETY PRODUCTS

No shooter's kit is complete without shooting glasses, and Beretta offers a full line in a variety of target-sharpening colors. New for 2004 is a pair of medium purple shooting glasses. A relatively light purple that makes targets stand out against green backgrounds. All colors block 98% of ultraviolet rays, meaning your eyes will be fresh at the end of the brightest summer day.

CLEANING PRODUCTS

Beretta pistols and shotguns, Sako and Tikka rifles are all made to last several lifetimes, given proper care and cleaning. Original Beretta cleaning products are specially designed and formulated to match your Beretta, Sako or Tikka firearm. New for 2004 are Beretta Bore Snakes, handy one-piece accessories that let you give your gun a quick field cleaning simply by pulling the snake through the bore. A handy pocket cleaning kit for .380 ACP and 9mm pistols includes a jointed rod, brush, mops and Beretta Oil in a handy case.

Beretta's Pro Shop offers a wide selection of parts for your shotgun, pistol or Sako or Tikka rifle. The Pistol Pro Shop offers a variety of grips and magazines for many Beretta pistols. Now you can order accessories to customize your U22 Neos.

Choose from a wide range of stocks, barrels or replacement chokes for your Beretta over-and-under or semiautomatic shotgun. A wide range of Gel-Tek pads are available for all shooting environments.

You can also find additional Optilock rings and bases for your Sako or Tikka Rifle as well as extra magazines.

Beretta continues to develop Pro Shop accessories to complement our product line of firearms. Visit a dealer near you to see a complete selection of items or www.berettausa.com

GEL•TEK RECOIL PADS

Applicability: All competition stocks 12 gauge & AL391/A391 Xtrema Synthetic & Camo

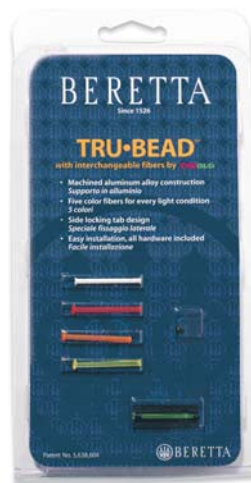

The exclusive and patented Beretta Gel•Tek pad is an innovative product designed for the frequent or recoil-sensitive shooter. It consists of a soft yet scratch resistant and durable polymer shell and recoil-absorbing silicon gel core unaltered by time and temperature. This non-toxic and inert gel distributes the recoil effect over the entire pad surface, reducing the felt recoil and vibrations transmitted to the shooter, and eliminating the rubbing of the stock against the cheek. The Gel•Tek recoil pad features a patented retaining clasp system that permits the easy and fast application and removal of the pad.

NEW

GUN 6 JACKET

NEW

GUN 6 HAT

The rising sounds of a hail call beacon you to the blind. Whispering winds calm the hollow as grouse settle in for the winter. A distant report signals that the game is on the move. Beretta's Hunting Series is here to prepare you for whatever adventure unfolds this autumn.

GUN 6 PANT

You know how quickly cold wet pants can ruin a hunt, but that's not a worry with Beretta's new insulated Gun 6 Pants. A Gore-Tex® lining completely seals out moisture, but still allows them to breathe, so perspiration won't build up. They're constructed of rugged snag-resistant Cordura®.

Knee length leg zippers with snap down storm flaps permit you to pull them on and off over boots. Other features include: belt loops, three fleece lined zipper pockets, and a kidney warmer elastic back.

JG920P75 Hunter Green

Available in: 30-42/44-46.

MSRP: \$225.00/\$250.00

GUN 6 JACKET

Trekking for miles through fields in search of sharptails and pursuing quail and pheasant along the edges of scrubby stands of timber is tough enough without the inconvenience of wet clothes. Beretta's new Gun 6 Jacket upland gear combines all the rugged, traditional style hunters demand with the benefit of a waterproof Gore-tex® barrier that lets perspiration vapor vent to keep you dry on misty morning hunts. The outer shell is constructed of tough Cordura® that withstands snags of upland thorns. Inside this durable shell is the Signature Beretta lining with removable braces. When you're hunting hard and get too warm just take your arms out of the sleeves and the braces allow the jacket to hang on your back so you can keep up the pursuit. Two front oversized bellows pockets with hold up flaps, fleece lined hand warmer pockets, scoop shaped easy-reach lower shell pockets, a radio/cell pocket, two inside security pockets, and a back game bag handle all your gear with space to spare. Soft adjustable waterproof inside cuffs and external adjustable cuffs make for a custom fit.

Also includes a stowaway waterproof hood.

JG920J75 Hunter Green

Available in: S-XL/XXL-VL.

MSRP: \$400.00/\$440.00

GUN 6 HAT

Perfect for the outdoorsman who prefers the field-cap style when hunting but likes the warmth of an insulated hat. The Gun 6 Hat is made of rugged Cordura® and a waterproof, breathable Gore-Tex® liner. Ear flaps can be secured in the up or down position, giving you the flexibility to change your level of protection as the weather dictates. Also, the Gun 6 Hat is reversible to blaze orange when needed.

JG500C75 Hunter Green

Available in: S-XL.

MSRP: \$60.00

GUN 6 CHAPS (NOT SHOWN)

An innovative one-piece design with an adjustable waistband. Made of rugged Cordura®, these Gun 6 Chaps were designed for flexibility to change your protection as quickly as the weather.

JG921P75 Hunter Green

Available in: S-XL/XXL-VL

MSRP: \$90.00/\$94.00

HUNTING SERIES

GUNNER CAMO JACKET

This is a jacket that will take you through the seasons. Use it alone on cool fall days; combine it with the Morning Frost jackets when there's a bite in the north wind. Any hunting coat needs a profusion of pockets, and the Gunner has oversized shell pockets with fold-up flaps, as well as a pair of chest pockets, upper hand warmer pockets and a "Napoleon" security pocket for those important items. Grommets holes under the armpits keep you dry when things warm up, or you can slip the jacket off and carry it with Beretta removable braces. When you get home from a successful hunt, the game bag in hardwoods and interior version in MAX-4HD drops down for easy cleaning.

JG901J77 Max-4HD Camo
Available in S-XL/XXL-XXXL

JG901J91 Hardwoods Camo
MSRP: \$250.00/\$274.00

THE GUNNER PANT

You'll be ready for any day in the upland fields with these Gore-Tex field pants. They have a pair of pockets with nylon and mesh lining for comfort and breathability. Zippered cuffs mean you can take them on or off over boots, and there are reinforced at the cuffs to resist the stubborn briars.

JG900P75 Hunter Green
Available in S-XL/XXL-XXXL

MSRP: \$140.00/\$154.00

THE CAMO GUNNER PANT (NOT SHOWN)

It's off to the blind or your tree-stand with these Gore-tex camo pants. Zippered cuffs allow you to take them on or over boots and the reinforced cuffs resist the most stubborn briars. The two pockets allow for quick hand warm-ups. The nylon and mesh lining allow for breathability during all seasons.

JG901P77 Max-4 Camo
Available in S-XL/XXL-XXXL

JG901P91 Hardwoods Camo
MSRP: \$140.00/\$154.00

THE GUNNER JACKET

This lightweight yet versatile Gore-tex jacket will accompany you on all your hunting trips. It can be combined with the Morning Frost jackets for added warmth from the winter winds (men's version only). Oversized pockets are abundant in the Gunner jacket, to accommodate extra shells, while making them easy to reach with a hold up flaps. There's a "Napoleon" security pocket for important items as well upper hand warmer pockets. When the sun comes out, slip off the jacket and carry it with Beretta removable braces. The interior drop down game bag allows for easy cleaning, a must in a hunting jacket.

Men's Gunner Jacket

JG900J75 Hunter Green
Available in S-XL/XXL-XXXL

MORNING FROST
SHORT-ZIP JACKET

MORNING FROST VEST

If you like the comfort and freedom of movement only a vest can provide, the Morning Frost Vest can be worn alone or under the Gunner coats. It has two bottom pockets and a chest security pocket for carrying the many tools and accessories you need in the field. Personalize it with Beretta embroidery.

JG314V58 Navy Blue
JG314V78 Loden Green
 Available in S-XL/XXL-XXXL

JG314V99 Black
JG314V39 Red
 MSRP: \$50.00/\$60.00

MORNING FROST LONG-ZIP JACKET

This is the perfect jacket to wear alone when there's a nip in the air, or combine it with the Gunner Camo coat for the coldest hunting days. An elastic bottom keeps drafts out. Soft Alpine fleece resists pilling—this is a jacket that will look good for years! Panel construction means ease of movement, whether you're shooting or just gathering firewood for the camp.

JG314J58 Navy Blue

 Available in S-XL/XXL-XXXL

JG314J99 Black
JG314J39 Red
 MSRP: \$88.00/\$96.00

MORNING FROST SHORT-ZIP JACKET

This 100% polyester Alpine fleece jacket has a horizontal chest security pocket and elastic bottom to keep those chilly drafts from coming up your back. Like the Long-Zip Jacket, you can have it personalized with Beretta embroidery.

JG315J58 Navy Blue
JG315J78 Loden Green
 Available in S-XL/XXL-XXXL

JG315J99 Black
JG315J39 Red
 MSRP: \$75.00/\$80.00

DOWN SHOOTING JACKET

When the wind is whistling, there's nothing quite as warm as down. Beretta's Down Shooting Jacket features double-bagged down filling with a non-reflective nylon finish. Both shoulders have leather padded gun patches—the left-hander's not left out here! Two big bottom pockets keep your shells organized with elastic loops, while your hands will find warmth in a pair of leather-trimmed chest pockets. Inside security pockets keep valuables safe. The cuffs adjust to your personal arm length, and the rear utility pouch has a convenient Velcro closure. When afternoons get warm, use the removable Beretta braces to carry your jacket.

Men's Down Shooting Jacket

DOWN SHOOTING VEST

A down vest is just the thing for cool days or for adding warmth to an outer coat. The Beretta Down Shooting Vest has a rounded bottom for easy movement in the boat or truck, and a Velcro closure for its rear utility pouch. Like other Beretta garments, the snaps are scratch-resistant to keep your Beretta shotgun looking good. Your shells will stay clean and ready in the two bottom pockets, equipped with elastic shell loops. Leather trim on the chest pockets coordinates with the padded gun patches on either shoulder. Personalize it with Beretta embroidery.

THE GAMEKEEPER'S JACKET

The new Gamekeeper's Jacket is a warm and comfortable upland hunting garment with quilted finishing padded with warm polyfill. Color-coordinated leather trim matches the two large recoil pads. Rib knit side panels mean you'll move easily, and knit neck and internal cuffs will keep cold breezes out. Two large shell pockets have Velcro closures, and large inside pockets keep important items warm and secure.

OUTFITTER'S CLOTH/BLAZE COAT

Many states require blaze orange when you're in the game field, and you'll be in full compliance with this Beretta coat. Blaze covers the heavy shooting patches on either shoulder, the back yoke and the large front pocket flaps. You'll be visible in this coat! It's comfortable, too, with pivot sleeve construction, adjustable cuffs and grommated armhole inserts. A generous wind flap covers the two-way zipper to protect your Beretta shotgun. Reload from either internal or external shell pockets. There is an interior drop down game bag for ease of cleaning and a loop on the back for pinning our license.

JG081J25 Saddle Tan/Blaze
Available in S-XL/XXL-XXXL

MSRP: \$150.00/\$160.00

OUTFITTER'S CLOTH COAT

At once traditional and modern, this canvas coat features an internal interchangeable recoil pad that fits under either of the two heavy canvas shooting patches. Left-handers are welcome here! A generous wind flap over the double-opening zipper, along with covered anti-scratch snap buttons, with help keep your prized Beretta shotgun pristine. There is an interior game bag drops down for ease of cleaning. When the afternoon gets balmy, use the removable Beretta braces to carry your Outfitter's Coat.

JG080J87 Saddle Tan
Available in S-XL/XXL-XXX

MSRP: \$150.00/\$160.00

OUTFITTER'S CLOTH JEANS

Beretta buttons and anti-scratch rivets identify these as very special five-pocket jeans. Rugged outfitter's heavy-duty canvas stands up to thorns and briars.

32-42/44-46 waist,
30 & 32 inseam

JG081P85 Brown

MSRP: \$80.00/\$90.00

OUTFITTER'S CLOTH MESH VEST (NOT SHOWN)

For early-season hunting, nothing beats the traditional canvas vest, and Beretta keeps things cool with a breathable mesh back and mesh-faced detachable game bag. The heavy-duty canvas back yoke and shooting patches accommodate an internal interchangeable recoil pad that serves righties or southpaws equally. Double security shell pockets have opening tabs and elastic loops to keep shells where they belong.

JG083V87 Saddle Tan
Available in S-XL/XXL-XXXL

MSRP: \$85.00/\$89.00

OUTFITTER'S CLOTH VEST

Nothing beats Beretta's traditional canvas vest for early-season hunting. The heavy-duty canvas and interchangeable shooting patches house an internal interchangeable recoil pad that accommodates both right and left-handers. The game bag is detachable for ease of cleaning, while the to shell pockets have easy opening tabs and elastic loops.

JG080V87 Saddle Tan/Blaze
Available in S-XL/XXL-XXXL

MSRP: \$85.00/\$89.00

OUTFITTER'S CLOTH BRIARPROOF CHAPS

Upland birds survive because they live in thorny places, and your legs need protection when you go after them. These rugged chaps have heavy-duty canvas reinforcement on the legs, with adjustable snap-on tabs to set the length just right.

JG083P87 Saddle Tan
Available in I/II

MSRP: \$85.00/\$89.00

HUNTING SERIES

UPLAND CORDURA MESH VEST

You'll stand out in any field in this blaze orange upland vest made of rugged Cordura nylon. The polyester mesh back keeps you cool when doves are flying hot. A pair of shell pockets with hold-open tabs holds plenty of ammo for the fastest shooting. A front or back-loading game pouch holds the day's reward. If things get chilly, fill zippered pockets with hand warmers.

SGUU1350125 Blaze

Available in S-XL/XXL-XXXL

MSRP: \$105.00/\$115.00

UPLAND CORDURA VEST TAN W/BLAZE

If prefer the two-tone look of tan and blaze, choose this mesh-lined vest in Cordura nylon. A back zipper ventilation port helps keep you cool and dry. Gun patches on either shoulder make it suitable for both left- and right-handers. You'll load the game back from front or back, while a pair of big pockets at the bottom hold plenty of shells.

SGUU2350082 Field Tan with Blaze

Available in S-XL/XXL-XXXL

MSRP: \$125.00/\$137.00

UPLAND CORDURA PANT

You'll stride through any briar patch in these rugged, water-repellent Cordura nylon trousers. They're mesh lined in the seat and have zippered vent pockets for cool comfort on warm fall days. You can take them on and off over shoes with the zippered cuffs.

SCUU1350082 Field Tan

32-42/44-46 waist,
32 inseam

MSRP: \$98.00/\$106.00

BLAZE UPLAND CORDURA COAT

When you're busting through the thorniest briar patches, there's nothing like Cordura nylon. Very little sticks to it! A front/back loading blood-proof game bag opens fully with a zipper for easy cleaning—you can even hose it out. A zipper back ventilation port keeps you cool and dry on warm days, and left-handers will appreciate gun patches on either side. Large shell pockets with tabs can be secured open or closed.

SIGNATURE SERIES

TUSCANY JACKET

This is Italy's equivalent of our traditional upland jacket. Ruggedly constructed of heavy-duty brushed cotton, it features a modified pivot sleeve and bi-swing back for easy movement. There's plenty of carrying room in two large shell pockets, two inside security pockets and a hand warmer pocket. When a sunny afternoon gets sultry, use the removable Beretta braces to carry your Tuscany jacket. Soft corduroy at collar and cuffs will make slipping into this classic seem like shaking hands with an old friend.

JG512J82 Tuscany

Available in S-XL/XXL-VL

MSRP: \$200.00/\$220.00

TUSCANY VEST

Want to bring a touch of Italy to your hunting field? This heavy-duty cotton 10-pocket vest, accented with traditional leather details, combines continental styling with ruggedness and utility. You'll pack everything needed for an afternoon hunt into two front cargo pockets, two zippered security pockets, two large shell pockets, a zippered cargo pocket in back and a drop-down game bag.

JG510V82 Tuscany

Available in 36-46/48-52

MSRP: \$170.00/\$180.00

TUSCANY PANT

Traditional tailored European styling in heavy-duty brushed cotton. Large pleated, flapped thigh cargo pockets let you load up and go!

LAMU WOMEN'S VEST

This trim and tailored vest is not only flattering, is tough and durable, with Teflon-finished prewashed 100% cotton twill construction. Comfortable side panels mean easy swings at every angle, and two big bottom pockets carry plenty of ammo. A stylish four-button front and stand-up collar make this vest as distinctive as it is practical.

JG420J09 Tan
Available in S-XL

MSRP: \$110.00

LAMU WOMEN'S SHIRT

Here's an outdoorsy shirt that's cut right for a woman. It's rugged Teflon-finished 100% cotton twill, but prewashing makes it soft and comfortable. A pair of pleated, flapped pockets are bar tacked to carry whatever you put in them. Threaded grommets under the arms give extra ventilation for warm days.

JG420S09 Tan
Available in S-XL

MSRP: \$60.00

LAMU WOMEN'S PANT

These sturdy field pants will take you through the toughest terrain. They are double-reinforced in the seat and leg fronts to fight off the stickiest brambles, and support strapping inside helps them keep their shape. Tabs at the bottom of the legs adjust for close or loose fit around the boots. Teflon-finished 100% cotton twill is prewashed for proper sizing and a soft feel.

JG110P83 Khaki
Available in S-XL

MSRP: \$110.00

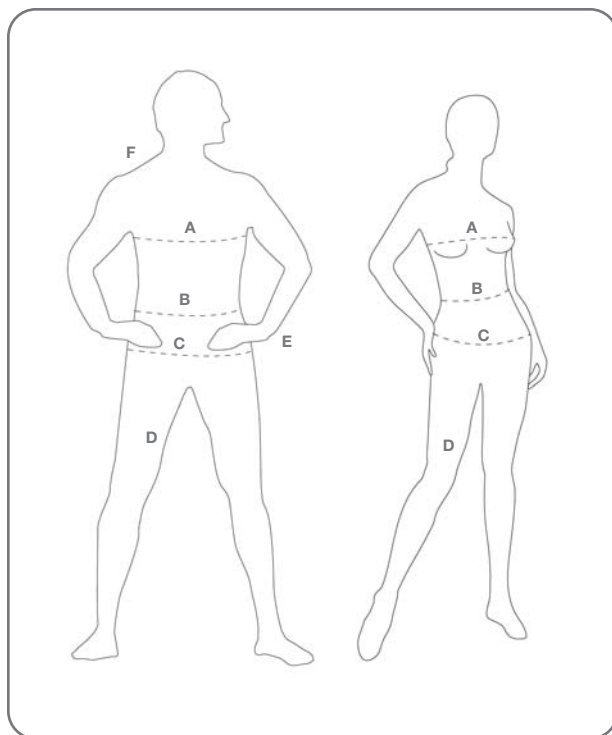

CLOTHING SIZE CHART

CLOTHING SIZE MEASUREMENT:

Measure your body (In all instances, hold tape firm and level, but not tight).

- A. Bust/Chest:** Wrap a tape measure evenly around the fullest part under the arms.
- B. Waist:** Wrap tape around your natural waistline, or where you actually wear your pants.
- C. Seat/Hip:** Standing with your feet together, measure around the fullest part of your hip (approximately 7-8" below the waist). Don't forget to keep tape level.
- D. Inseam:** Best taken from a pair of your own pants which you like the length of when wearing. Measure along the garment inseam from the crotch seam to the hem.
- E. Men – Sleeve Length:** From the center back of your neck with your arm slightly bent, follow the tape around to your wrist bone.
- F. Men – Neck Circumference:** Wrap tape around to the base of your neck in the front and allow extra room for comfort, OR measure the collar length of a favorite shirt.

PREMIUM GRADE SHOTGUNS

Beretta is proud to offer a full range of Premium Grade products at select dealers throughout the USA and the Beretta Galleries.

GIUBILEO/12

Masterpieces of the Gunmaker's Art

Meticulous attention to detail has always been our forte. Nowhere is this better illustrated than in our Premium Grade firearms, where Beretta's master gunsmiths, barrel makers and engravers are given total freedom to produce these masterpieces, the culmination of five centuries of the perfection of the gun maker's art.

The Barrel Construction

Guided by the heritage of Bartolomeo Beretta, who by 1526 perfected the demanding barrel making standards inherited by succeeding generations, creation begins with the choice of material. Only the highest quality steel is used in Beretta's premium grade models to ensure corrosion resistance allowing for continuous use by future generations.

Beretta makes barrels that are distinctive both inside and out. In the bore, Beretta's advanced design allows for the simple installation of a standard universal or Magnum chamber, fixed-choke or Mobilchoke housing. The tubes are cold hammer forged and the blanks are precision drilled and internally honed. The tube is then turned, ground and polished to its final external profile and preset for precision assembly. The tubes are given a final polish for perfect ballistic performance before receiving an oxidation-surface cleaning to create the resilient, recognizable black finish.

Receiver & Mechanisms

In a shotgun the action is everything: it governs speed and precision in firing, while its locking system determines durability and performance. This crucial component begins as a solid block of Nickel-Chromium-Molybdenum alloy and is tooled into shape by computer-guided precision milling machines. The action is then hand-crafted by a master gunsmith, who employs file and emery cloth to hone the lugs, bolts and hinge pins to ensure a perfect fit -- a technique confirmed by centuries of fine craftsmanship to ensure flawless operation time after time.

The exterior, top moldings and carefully rounded the edges, are sculpted and chiseled by hand. Fine emery cloth is used to refine and polish the firing mechanism to achieve the desired release speed. The action is then perfectly fitted to the hand-finished stock and the surfaces cleaned and mechanical parts assembled to finish the firearm in bianco or "in the white." The gun is then broken down and inspected before the action, fittings and mechanical components are given a rigorous hardening treatment. Finally, the gun is reassembled for further checks and a firing test.

Stocks & Fore-ends

Only select European and American walnut of the finest grain, color and strength is chosen for the Beretta Premium Grades. The configuration of the stock can be determined by client's specific measurements: wood is cut to fit by calibrated milling machines which form the basic sections, and finished by the stock-maker, whose time-honored tools create and refine. After final fitting the wooden surfaces are prepared for detailing: hand-cut diamond checkering on the grip, butt plate and fore-end blends aesthetics and anti-slip functionality. The finishing touch is the polish: an amalgam of wax and oil coatings that best enhance the wood's natural beauty.

The Engraver's Signature

The creativity and skill of Beretta's master engravers is expressed by a variety of techniques. Be it chased by hammer and chisel, detailed by fine bulino engraving or inset with fine wire inlay, each is a masterpiece in miniature. From floral motifs to fine English scrollwork, game scenes to mythical episodes, the most sophisticated designs can be executed on the Premium Grades. Upon completion, the engraver inscribes his signature, conferring authenticity and confirming the status of these guns as works of art.

To find a Beretta Premium Dealer near you or to obtain a Premium Grades catalog, please visit www.berettausa.com or call 800.524.7453.

BERETTA GALLERY

Every Beretta product, from hand finished custom firearms to those produced with the most advanced precision machinery in modern factories, from classically inspired sport clothing to hunting accessories and knives, can be found in fine firearms stores and in the Beretta Galleries. In the elegant gallery setting our expert staff, all outdoors enthusiasts and con-

noisseurs of fine firearms, will assist you whether you are choosing your ideal custom firearm or selecting the ideal Beretta sportswear and hunting accessories to suit your taste, lifestyle and needs.

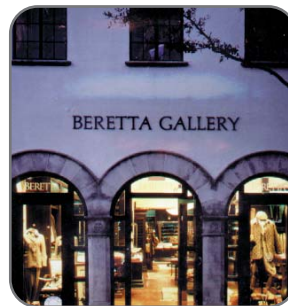

NEW YORK

718 Madison Ave. 212.319.3235

Established in the heart of New York's Madison Avenue in 1995, the façade of the flagship Beretta Gallery has undergone a complete facelift for the new Millennium. Modeled after the Beretta home in Gardone Val Trompia, to embody the traditional values of its residents, the stone for the New York Gallery's new hand-chiseled, white and gray façade was extracted from local quarries in Brescia home province of Beretta gunmakers since 1526.

Within the impressive three-story Gallery, passionate sportsmen will also find an extensive book selection filled with important works by top writers and photographers in the hunting and outdoors field.

DALLAS

41 Highland Park Village 214.559.9800

The Beretta Gallery in Dallas, Texas exemplifies traditional Beretta quality in every detail. The beautiful, well-stocked gunroom features Beretta's full line of firearms, from pistols to shotguns to Premium Grade side-by-side Express rifles. Today the Beretta Galleries continue Beretta's almost 500 year-old tradition of producing fine firearms for the discriminating gun owner.

Located in the exclusive Highland Park area, the Dallas Beretta gallery is the destination for those wishing to participate in the rich heritage of Beretta.

For nearly five centuries, the name Beretta has stood as an undying symbol of resolute quality and perfection. Now Beretta lends its name to quality timepieces, designed by Swiss master designer Jorg Hysek..

These fine watches are designed specifically around the Beretta Cougar and Tomcat pistol lines. In typical Beretta style, only the finest, most advanced materials are used in these precision instruments. The cases reflect the functional angular design of Beretta pistols and are crafted in either matte or polished stainless steel in black, gray or PVD-coated gunmetal gray.

The water-resistant cases replicate the lines of the correlating pistols featuring corresponding accents such as screws, rivets and pushbuttons. Indeed, on the bezel of each Beretta watch there is a replica of the Cougar or Tomcat, neatly placed at 12:00. The pushbuttons on the Cougar model are reminiscent of the pistol's barrel, and the crown was inspired by the design of the muzzle.

Currently Beretta watches are found in the United States at the Beretta Galleries in New York and Dallas and outside the United States in the Beretta Galleries in Buenos Aires, Paris and Milan.
