SHOTGUNS

BERETTA

500 YEARS. ONE PASSION.

A half millennium in the making, Beretta shotguns are designed for

History : Five hundred years of craftsmanship and tradition go into every shotgun Beretta builds. Nowhere is this more evident than in their celebrated over-and-unders, shotguns many consider the strongest and most reliable in the world. A Beretta over-and-under can rightly be considered an heirloom and inspires a fierce and loyal following. One faithful shooter has more than 700,000 documented rounds fired through his 687 EELL Sporting; both gun and shooter are still going strong.

Receiver : The walls of a Beretta receiver are more than twice as thick as many of its competitors, (in fact it is also the platform for double rifles, which create much greater pressures than experienced in any shotgun). Using easily replaceable hinge pins and locking lugs, any receiver can be completely rebuilt allowing the gun to be refurbished for another lifetime of reliable service.

UPLAND SPORTSMAN

OVER-AND-UNDERS

this generation...and the next.

Profile : Thanks to the superior design of the receiver, a Beretta over-and-under has an incredibly solid feel. The dual-conical locking system provides a vaultlike lockup that—with its self-tightening design—stays tight over the life of the gun. Because the lugs are located high on the receiver, the lock-up is also significantly stronger than on ordinary guns. In addition, the location of the lugs allows for a low-profile receiver with the barrels sitting deeper than normal. This in turn aligns the sighting plane closer to the hands, aiding in the reduction of felt recoil and muzzle rise.

Barrels : For more than five centuries, Beretta has made the best barrels in the world. Today, their over-and-under barrel starts life as a unique proprietary blend of steel, chromium and molybdenum. Forged in Northern Italy and France, all Beretta barrels are deep-hole drilled, cold-hammer forged, and chrome lined, allowing for more concentric tubes. The result: a thinner, lighter, more precise barrel wall. This superior barrel construction delivers better weight distribution and an optimum balance point just above the hinge pin, which gives it perfect swing characteristics.

“The perfect blend

Once a generation or so comes a shotgun that revolutionizes and reshapes the category. Beretta's SV10 Perennia is such a firearm. The third evolution of Beretta's celebrated over-and-unders, its lineage springs from the elegant and high-performance SO10.

BERETTA Q-STOCK, PATENTED QUICK TAKEDOWN STOCK

The new profile Q-Stock features an exclusive attachment system to the receiver, patented by Beretta, which allows its disassembly in just a few seconds—for replacement, special work or access to the trigger mechanism—without having to remove the recoil pad. This new Q-Stock design no longer requires the traditional internal through-bolt because it attaches directly to the receiver, increasing the solidity of the receiver-stock assembly. The result is a lockup that is constant over time, which also contributes to extending the life of the shotgun. Disassembly is executed by inserting the special key through the grip cap, which features an elegant and functional hinged cover plate.

KICK-OFF® RECOIL REDUCTION MECHANISM

The patented KICK-OFF® mechanism (on select models only) was conceived to significantly reduce felt recoil. Thanks to KICK-OFF® technology, the recoil energy is gradually dissipated through two hydraulic oil dampers built into the stock, with obvious increased comfort for the shooter. Vibration and muzzle rise are decreased, while durability, reliability and handling of the firearm are increased.

UPLAND SPORTSMAN

SV10 PERENNIA

of tradition and innovation.”

Machined from a solid steel alloy billet, hardened and tempered, the Perennia's over-and-under receiver provides a low and elegant profile that allows the redirection of the recoil in line to the shooter's shoulder. This reduces the felt recoil and eases shouldering. The high-strength alloy receiver is treated with an exclusive, nickel based, protective finish that increases durability and resistance to corrosion.

	SV10 PERENNIA
ENGRAVING	Laser engraved game scene, nickel-based, high-phosphorous protective finish
GAUGE	12, 20
CHAMBER	3"
WOOD FINISH	Newly designed checkering/matte oil finish on select walnut

BERETTA
500 YEARS. ONE PASSION.

The 680 series: designed and built in the

From the luxury of the EELL Diamond Pigeon, to the no-nonsense White Onyx, there's a 680 for every need and budget. All are built to the same exacting standard, with the slim, low-profile receiver that Beretta is known for. These over-and-unders rest low in the hands for superb pointability. From elegant to rugged, every gun has one thing in common: 500 years of Beretta knowledge and craftsmanship.

687 EELL DIAMOND PIGEON J6873A0

In Italian, EL stands for extra lusso (extra luxury). The EELL designation takes that quality to an even higher level. This is an over-under with the feel and allure of a classic game gun for the discriminating sportsman who appreciates all the finer points of a well-made shotgun. The patented locking system creates a particularly slim receiver, making it one of the most elegant, finely balanced and responsive shotguns in the world. The extensive hand-chased engraving, combined with the highly figured oil-finished walnut, makes a classic statement of your good taste. The 687 EELL Diamond Pigeon is also available in 20/28 and 28/410-gauge Combo set.

687 SILVER PIGEON V J6871R8S

The pinnacle of the Silver Pigeon line, this prestigious over-under is stocked in richly figured, oil-finished walnut and detailed with gold game-bird inlays and a Beretta gold medallion underneath. The receiver is treated with Beretta's proprietary process, which imparts a classic color-case finish that ensures metallurgical integrity and a distortion-free part. A joy to own and shoot, thanks to Beretta's superior mechanical refinement and innovative technology, the Silver Pigeon V will last for generations.

687 SILVER PIGEON III J6871J8

There's no need to sacrifice style for function with this attractively priced member of the Silver Pigeon family. The distinctive Silver Pigeon III has all the features of the Silver Pigeon I, but with more extensive engraving, including game scenes, on the frame. Available in a trim and racy 28-gauge made on its own properly scaled frame, this finely crafted shotgun with natural pointability is up to any hunting challenge.

UPLAND SPORTSMAN

680 SERIES

best tradition of Beretta.

686 SILVER PIGEON I J6863J6

Beretta's new 686 Silver Pigeon I provides comfort and accuracy to the upland shooter with its signature low-profile monobloc receiver design. The satin nickel receiver is embellished with English style engraving and accented with a gold-plated trigger. Beyond the aesthetics, the integrated Mobile choke and bore system create less felt recoil and a more refined pattern for the shooter. The 686 Silver Pigeon I provides a versatile solution at an attractive price point.

686 WHITE ONYX J6862K6

At some point in every sportsman's hunting life—whether as a novice or a seasoned shooter in need of an additional gauge—a no-nonsense, versatile tool is called for. The 686 White Onyx—with its streamlined stock design for fast target acquisition, top mounted bolt-lug design for secure barrel lockup, and easy maintenance—fits the bill. The satin nickel frame is accented with Beretta's Dura-Jewel finish for a classic look.

The A400 Xplor Unico. eXpect the uneXpe

It's not hype to say the new A400 Xplor will shatter your expectations of what a semiautomatic. Built on a compact receiver, the Xplor was conceived and designed to shoot any 12-gauge shell, high performance 3" receiver. From quail or geese, to dove or sporting clays the Xplor can handle different engineering firsts, and 500 years of Beretta knowledge, know-how, and expertise.

KICK-OFF KICK-OFF³

70% Less recoil than the competition.

Beretta's exclusive Kick-Off® and Kick-Off³ systems consist of two hydraulic dampers that provide the world's best recoil reduction and eliminate muzzle rise. A third hydraulic damper was added behind the bolt to further decrease recoil.

UNICO

Shoots all 12-gauge shotgun shells.

The A400 Xplor can shoot all 12-gauge loads from 2¾" to 3½" with the same weight and balance of a high performance 3" shotgun.

Green Receiver

Functional yet elegant, the anodized aluminum receiver offers the best corrosion resistance possible. The exclusive green color is an absolute innovation only by Beretta.

Superior comfort and perfect shouldering.

Micro-Core is an innovative new recoil pad produced from open cell techno-polymer that results in greatly enhanced recoil reduction and is softer and lighter than standard rubber.

36% faster than any other shotgun.

The innovative Beretta gas operating system is 36% faster than any other operating system. Featuring a rotating bolt, new feeding system and a self-cleaning piston, the A400 Xplor possesses unmatched reliability, speed and performance.

The A400 Xplor Light is a fast, controllable—6.28

Evolved from the trend-setting A400 Xplor Unico, this new Beretta is the ideal shotgun for upland shotgun, the Beretta A400 Xplor Light delivers. Developed from the versatile Beretta gas operated, uses an exclusive exhaust valve that allows the shotgun to “fire” a broad range of ammunition. In system further reduces the already low felt recoil, directing the recoil force directly in line with the firing and lends additional stability to the shotgun in firing subsequent rounds.

“Proven, reliable, durable—no semi-automatic

Proven in the field millions of times over, the Urika2 is one tough shotgun. No semi-automatic has been tested more. All models feature the latest version of the best gas-operating system in the world—technology that lets the Urika2 perform shot after shot, season after season.

3901 STANDARD SYNTHETIC J390140

Made in America, the 3901 Standard is a true no-nonsense synthetic stock shotgun that you'll feel comfortable throwing behind the seat of your pickup, but it is an old friend you can rely on when the shooting heats up—no matter what the weather conditions. Featuring the softest-shooting gas system around, a high-strength steel alloy hammer-forged barrel and Mobil-Choke versatility, the autoloading Standard is a model of rugged reliability, uncomplicated adornment and American pride.

AL391 URIKA2 CLASSIC J39TA18

For upland hunters, the Urika2 Classic comes in a standard model that features the X-Tra Grain wood enhancement treatment and, for the first time on the base Urika, tasteful fine-line scroll engraving on either side panel of the receiver.

*WEIGHTS ARE APPROXIMATE, DEPENDENT ON WOOD DENSITY AND BARREL LENGTH.

THE BERETTA GAS SYSTEM IS TWICE AS FAST AS ANY OTHER OPERATING SYSTEM. The gas system has been improved by the addition of a spinning and self-cleaning action. As gas pressure is fed into the gas cylinder, a series of expandable fingers on the piston move outwardly to clean the gas cylinder as the action cycles. Additionally, the gas piston is imparted with a spinning motion and “scraper teeth” to ensure carbon deposits are thoroughly dislodged and removed from the gas system. This improves reliability and increases the time between manual cleaning.

Beretta’s proprietary X-Tra Grain wood treatment is a standard feature on classic models. This wood surface enhancement process—applied to the walnut of the stock and fore-end—is a new technology that highlights the color and contrast of the wood, resulting in a beautiful, rich pattern.

WAXWEAR FIELD PARKA

GU6H2061-0832 (SIZES M-XL/XXL)

An ideal layering piece in wet weather. Vented cape back, attached hood, adjustable wind cuffs and drainage grommets help keep you dry and comfortable.

FIELD BAG

BS712061

This durable bag will float fully loaded with six boxes of shells. Newly designed to give you more pockets, inside and out, including a new padded pistol sleeve behind the choke tubes. All brass hardware and top-quality leather trim. Comfort-curved, anti-slip shoulder strap. 17" x 11" x 12". Available in spice (shown, 0087) and loden green (0076).

CORDURA®

UPLAND CORDURA® JACKET

GU6B3570-22 (SIZES M-XL/XXL-XXXL)

Constructed of abrasion-resistant, high-performance Cordura®, this bi-swing back jacket features ambidextrous recoil pockets, easy-clean no-seam game bag, easy-access full shell box pockets, non-skid shoulder gun rests, and too many other features to list.

UPLAND CORDURA® BLAZE CAP

BC139168-25

Traditional cap is constructed of water-repellent Cordura® nylon with a waxed-cotton brim to protect you in all kinds of weather.

EASY-ENTRY FRONT-LOADING SHOOTING SHIRT

LU227697 (SIZES M-XL/XXL-XXXL)

The Cordura®-faced front-loading game pocket makes bringing home the day's spoils simple. The lined pocket extends all the way around to the back of the shirt. This 100% cotton shirt has a vented cape back, roll-tab sleeves, Cordura® shooting patch and forearm guards, and two shell openings above the bellows pocket. Shown in field tan/hunter brown (09) and field tan/blaze (25).
